When should the project baseline be updated in order to meet the purpose of the 'issues' practice?

- A. When a request for change is recorded on the issue register
- **B. When a change has been approved by the change authority**
- C. When a business opportunity has been recognized
- D. When the project manager receives a request for change

Answer: B

Explanation:

In PRINCE2, the project baseline should be updated when a change has been formally approved by the change authority. This is because the baseline represents the agreed standards and plan against which the project's performance is measured. Updating the baseline after the approval of changes ensures that the project documentation accurately reflects the current scope, timescales, and resource allocations, which are essential for tracking progress and managing by exception effectively.

NEW QUESTION # 208

What is the purpose of the 'progress' practice?

- A. To measure actual achievements against the planned time and cost targets for the project
- B. To review whether the use of the products is likely to lead to the expected benefits
- C. To define the roles and responsibilities for monitoring progress
- D. To control events that could have a positive or negative effect on project objectives

Answer: A

Explanation:

The purpose of the 'Progress' practice in PRINCE2 is to provide a mechanism to monitor and compare the actual project progress against the planned objectives, particularly in terms of time and cost.
