Quiz Salesforce - Mule-Dev-301 - Unparalleled Free Salesforce Certified MuleSoft Developer II Exam

Today is the right time to learn new and in demands skills. You can do this easily, just get registered in certification exam and start preparation with Salesforce Certified MuleSoft Developer II Mule-Dev-301 exam dumps. The Salesforce Certified MuleSoft Developer II Mule-Dev-301 pdf questions and practice test are ready for download. Just pay the affordable Mule-Dev-301 authentic dumps charges and click on the download button. Get the Mule-Dev-301 latest dumps and start preparing today.

Salesforce Certified MuleSoft Developer II Sample Questions (Q38-Q43):

NEW QUESTION # 38

Which plugin or dependency is required to unit test modules created with XML SDK?

- A. MUnit Extensions Maven plugin
- B. MUnit Maven plugin
- C. Junit
- D. XMLUnit

Answer: A

Explanation:

To unit test modules created with XML SDK, the developer needs to use the MUnit Extensions Maven plugin. This plugin allows

testing XML SDK modules using MUnit by adding a dependency to the module under test and using a custom processor tag to invoke it. Reference: <https://docs.mulesoft.com/mule-sdk/1.1/xml-sdk#testing>

NEW QUESTION # 39

A scatter-gather router is configured with four routes: Route A, B, C and D.
Route C fails.

- A. Payload failures['2']
- B. Payload ['2']
- C. Error,errorMessage,payload.failures['2']
- D. Error,errorMessage,payload.results ['2']

Answer: D

Explanation:

The result of accessing route C failure is Error,errorMessage,payload.failures['2']. This is because a scatter-gather router returns an aggregated message that contains an array of results from each route and an array of failures from each route. The failures array contains error objects with information about each failed route execution. To access route C failure, which is the third route (index 2), the developer needs to use Error.errorMessage.payload.failures['2'] expression. Reference: <https://docs.mulesoft.com/mule-runtime/4.3/scatter-gather-reference#scatter-gather-output>

NEW QUESTION # 40

A Mule application deployed to multiple Cloudhub 2.0 replicas needs to temporarily persist large files over 10MB between flow executions, and routinely needs to query whether the file data exists on separate executions.
How can this be achieved?

- A. Store the contents of the file on separate storage, and store the key and location of the file Object using Object Store v2
- B. Store the key and full contents of the file in an Object Store
- C. Store the key and full contents of the file, caching the filename and location between requests
- D. Use an in-memory Object Store

Answer: A

Explanation:

To temporarily persist large files over 10MB between flow executions, and routinely query whether the file data exists on separate executions, the developer should store the contents of the file on separate storage, and store the key and location of the file object using Object Store v2. This way, the developer can avoid storing large files in memory or exceeding the size limit of Object Store v2 (10MB per object). The developer can also use Object Store v2 operations to query, retrieve, or delete the file object by its key. Reference: <https://docs.mulesoft.com/object-store/osv2-faq#can-i-store-files-in-object-store-v2>

NEW QUESTION # 41

Refer to the exhibit.

```
<flow name="implementation" >
  <raise-error doc:name="Raise error" type="APP:CUSTOM_ERROR"/>
</flow>
```

```
<munit:test name="start-up-test" description="Test that Mule app starts up" expectedErrorType="APP:CUSTOM_ERROR">
  <munit:execution>
    <flow-ref doc:name="implementation" name="implementation"/>
  </munit:execution>
  <munit:validation >
    <munit-tools:assert-that doc:name="Assert that" expression="#[true]" is="#[MunitTools::equalTo(false)]"/>
  </munit:validation>
</munit:test>
```

The flow name is "implementation" with code for the MUnit test case.

When the MUnit test case is executed, what is the expected result?

- A. The test case fails with an assertion error
- B. The test throws an error and does not start
- C. The test case passes

- D. The test case fails with an unexpected error type

Answer: A

Explanation:

Based on the code snippet and MUnit test case below, when the MUnit test case is executed, the expected result is that the test case fails with an assertion error. This is because the assert-equals processor compares two values for equality, and fails if they are not equal. In this case, the expected value is 'Hello World', but the actual value returned by the implementation flow is 'Hello Mule'. Therefore, the assertion fails and an error is thrown. Reference: <https://docs.mulesoft.com/munit/2.3/assert-equals-processor>

NEW QUESTION # 42

Refer to the exhibit.

```
traits:
  client-id-required:
    headers:
      client_id:
        type: string
      client_secret:
        type: string

protocols:
- HTTPS
- HTTP

types:
  Customers: !include datatypes/Customers-request.raml

/customers:
  is: [client-id-required]
  put:
    body:
      application/json:
        type: Customers
        example: !include examples/Customers-request.json
    responses:
      200:
        description: Successfull
        body:
          application/json:
            example: !include examples/Customers-response.json
      400:
        description: Bad request
        headers:
          application/json:
            example: !include examples/postErrorCode403.json
      404:
        description: Resource not found
        body:
          application/json:
            example:
              !include examples/postErrorCode404.json
      500:
        description: Internal server error
        body:
          application/json:
            example:
              !include examples/postErrorCode500.json
      501:
        description: Not implemented
        body:
          application/json:
            example:
              !include examples/postErrorCode501.json
```

A developer generates the base scaffolding for an API in Anypoint Studio.

Which HTTP status code is returned while testing using the API Kit console if no values are entered in client-secret?

- A. HTTP status code:200
- B. HTTP status code:500
- C. HTTP status code:400
- **D. HTTP status code:403**

Answer: D

Explanation:

Based on the code snippet and schema.json file below, when testing using the API Kit console if no values are entered in client-secret, HTTP status code 403 (FORBIDDEN) is returned. This is because client-secret is defined as a required header parameter in schema.json file, which means that it must be present in every request. If no values are entered in client-secret, then it is equivalent to omitting this header parameter, which violates the schema and causes APIKit Router to return HTTP status code 403. Reference: <https://docs.mulesoft.com/apikit/4.x/apikit-4-headers>

NEW QUESTION # 43

.....

All of the traits above are available in this web-based Salesforce Certified MuleSoft Developer II (Mule-Dev-301) practice test of ITExamDownload. The main distinction is that the Salesforce Certified MuleSoft Developer II (Mule-Dev-301) online practice test works with not only Windows but also Mac, Linux, iOS, and Android. Above all, taking the Salesforce Certified MuleSoft Developer II (Mule-Dev-301) web-based practice test while preparing for the examination does not need any software installation.

Mule-Dev-301 Latest Braindumps Book: <https://www.itexamdownload.com/Mule-Dev-301-valid-questions.html>

Salesforce Free Mule-Dev-301 Exam Therefore, you have more opportunities and possibilities to get high salary and prestigious position and at the same time you can enjoy comfortable working conditions, which are never imagined before, Besides, our IT experts and trainers insist to updating Salesforce Mule-Dev-301 Latest Braindumps Book vce dumps to keep the accuracy of test questions, Salesforce Free Mule-Dev-301 Exam It will boost users' confidence.

As discussed earlier, IT will remain a great career choice, Exam Dumps Mule-Dev-301 Zip Hold on to your hats it's going to be a bumpy ride, Therefore, you have more opportunities and possibilities to get high salary and prestigious position Exam Dumps Mule-Dev-301 Zip and at the same time you can enjoy comfortable working conditions, which are never imagined before.

ITExamDownload Salesforce Mule-Dev-301 Dumps PDF Preparation Material is Available

Besides, our IT experts and trainers insist to updating Salesforce vce dumps to keep the accuracy of test questions, It will boost users' confidence, Buy today and start your journey to Salesforce Certified MuleSoft Developer II (Mule-Dev-301) exam success with ITExamDownload!

Our Mule-Dev-301 guide questions have the most authoritative test counseling platform, and each topic in Mule-Dev-301 practice engine is carefully written by experts who are engaged Mule-Dev-301 in researching in the field of professional qualification exams all the year round.
