Palo Alto Networks Certification evolves swiftly, and a practice test may become obsolete within weeks of its publication. We provide free updates for Palo Alto Networks Certified Network Security Engineer Exam PCNSE exam questions after the purchase to ensure you are studying the most recent solutions. Furthermore, ExamcollectionPass is a very responsible and trustworthy platform dedicated to certifying you as a specialist. We provide a free sample before purchasing Palo Alto Networks PCNSE valid questions so that you may try and be happy with its varied quality features.

To pass the PCNSE exam, candidates must achieve a minimum score of 70%. This means that they must correctly answer at least 53 of the 75 questions. PCNSE exam is administered by Pearson VUE, a leading provider of certification exams. Candidates can register for the exam through the Palo Alto Networks website or through Pearson VUE's website.

The PCNSE exam focuses on the latest version of PAN-OS 10.0, which is the operating system that powers Palo Alto Networks' next-generation firewalls. PCNSE exam tests candidates on their ability to configure and deploy firewall policies, implement advanced security features, and troubleshoot common issues. The PCNSE Certification is a globally recognized credential that demonstrates a security professional's expertise in protecting against cyber threats using Palo Alto Networks' technology.

The PCNSE certification exam is a comprehensive test that covers a wide range of topics, including network security fundamentals, firewall configuration, VPN configuration, advanced threat detection and prevention, and more. PCNSE exam consists of 75 multiple-choice questions and must be completed within 90 minutes. Candidates must score at least 70% to pass the exam.

Valid PCNSE Study Plan, Regualer PCNSE Update

This is a good way to purchase valid exam preparation materials for your coming PCNSE test. Good choice will make you get double results with half efforts. Good exam preparation will point you a clear direction and help you prepare efficiently. Our PCNSE exam preparation can not only give a right direction but also cover most of the real test questions so that you can know the content of exam in advance. You can master the questions and answers of Palo Alto Networks PCNSE Exam Preparation, even adjust your exam mood actively.

Palo Alto Networks Certified Network Security Engineer Exam Sample Questions (Q298-Q303):

NEW QUESTION # 298
What can the Log Forwarding built-in action with tagging be used to accomplish?

- A. Block the source zones of selected unwanted traffic.
- B. Block the destination IP addresses of selected unwanted traffic.
- C. Forward selected logs to the Azure Security Center.
- D. Block the destination zones of selected unwanted traffic.

Answer: B

Explanation:
The Log Forwarding feature in Palo Alto Networks firewalls allows administrators to perform automated actions based on logs. One of the actions that can be configured is to tag an IP address, which can then be used in conjunction with Dynamic Address Groups (DAG) to enforce security policies. By tagging the destination IP addresses of unwanted traffic, an administrator can dynamically update policies to block traffic to those destinations.
This method is particularly useful for responding quickly to detected threats by creating and enforcing a policy that blocks traffic to tagged destinations without the need for manual intervention or policy changes.
For a detailed explanation, the Palo Alto Networks' "PAN-OS Administrator's Guide" provides information on log forwarding and automated actions.

NEW QUESTION # 299
An administrator troubleshoots an issue that causes packet drops.
Which log type will help the engineer verify whether packet buffer protection was activated?

- A. Configuration
- B. Data Filtering
- C. Traffic
- D. Threat

Answer: D

Explanation:

NEW QUESTION # 300
Which two features can be used to tag a username so that it is included in a dynamic user group?
(Choose two.)

- A. log forwarding auto-tagging
- B. GlobalProtect agent
- C. User-ID Windows-based agent
- D. XML API

Answer: A,D

Explanation:
https://docs.paloaltonetworks.com/pan-os/10-0/pan-os-admin/policy/register-ip-addresses-and- tags-dynamically

NEW QUESTION # 301
An engineer has been given approval to upgrade their environment 10 PAN-OS 10 2 The environment consists of both physical and virtual firewalls a virtual Panorama HA pair, and virtual log collectors What is the recommended order when upgrading to PAN-OS 10.2?

- A. Upgrade the firewalls upgrade log collectors, upgrade Panorama
- B. Upgrade the firewalls upgrade Panorama, upgrade the log collectors
- C. Upgrade the log collectors, upgrade the firewalls, upgrade Panorama
- D. Upgrade Panorama, upgrade the log collectors, upgrade the firewalls

Answer: A

NEW QUESTION # 302
Which User-ID mapping method should be used in a high-security environment where all IP address-to-user mappings should always be explicitly known?

- A. PAN-OS integrated User-ID agent
- B. Windows-based User-ID agent
- C. GlobalProtect
- D. LDAP Server Profile configuration

Answer: C

Explanation:
Explanation
https://docs.paloaltonetworks.com/pan-os/10-1/pan-os-admin/user-id/user-id-concepts/user-mapping/globalprote Because GlobalProtect users must authenticate to gain access to the network, the IP address-to-username mapping is explicitly known. Because GlobalProtect users must authenticate to gain access to the network, the IP address-to-username mapping is explicitly known. This is the best solution in sensitive environments where you must be certain of who a user is in order to allow access to an application or service.
https://docs.paloaltonetworks.com/pan-os/10-1/pan-os-admin/user-id/user-id-concepts/user-mapping/globalprote
"On sensitive and high security networks, WMI probing increases the overall attack surface, and administrators are recommended to disable WMI probing and instead rely upon User-ID mappings obtained from more isolated and trusted sources, such as domain controllers. If you are using the User-ID Agent to parse AD security event logs, syslog messages, or the XML API to obtain User-ID mappings, then WMI probing should be disabled. Captive portal can be used as a fallback mechanism to re-authenticate users where security event log data may be stale."
