Microsoft AI Business Professional Sample Questions (Q19-Q24):

NEW QUESTION # 19

Select the answer that correctly completes the sentence.

The screenshot shows a question interface from a Microsoft exam. At the top, it says 'Answer Area'. Below that is a dropdown menu with the following options: 'Microsoft Defender for Cloud', 'Microsoft Entra ID', 'Microsoft Intune', and 'Microsoft Purview'. To the right of the dropdown, there is a partial sentence: 'enables organizations to apply governance policies to conversations generated by using Microsoft 365 Copilot.' The Microsoft logo is visible in the top right corner of the interface. A watermark 'mprepaway' is visible diagonally across the image.

Answer:

Explanation:

Answer Area

Microsoft enables organizations to apply governance policies to conversations generated by using Microsoft 365 Copilot.

- Microsoft Defender for Cloud
- Microsoft Entra ID
- Microsoft Intune
- Microsoft Purview**

NEW QUESTION # 20

You attend many Microsoft Teams meetings.

You want to ensure that you can catch up on key points and next steps after each meeting.

Which Microsoft 365 Copilot feature should you use after the meetings?

- A. Meeting Whiteboard
- B. Meeting info
- C. Thread summaries
- **D. Recap**

Answer: D

Explanation:

Comprehensive and Detailed 150 to 200 words of Explanation Microsoft AI Business professional documents:

After a Microsoft Teams meeting ends, the Microsoft 365 Copilot feature designed specifically to help you catch up on what happened-including key discussion points, decisions, and next steps-is Recap (often referred to as intelligent recap). Recap aggregates post-meeting artifacts such as the recording, transcript, and AI-generated insights, and surfaces actionable items so attendees can quickly understand outcomes without rewatching the full meeting. This aligns directly with the requirement to review "key points and next steps" after each meeting.

Meeting Whiteboard is a collaborative canvas used during meetings for brainstorming and sketches; it does not automatically produce a structured summary of decisions and actions. Meeting info provides logistical details (participants, agenda, attachments) rather than a synthesized outcomes summary. Thread summaries focus on chat or channel message threads, not the meeting's recorded and transcribed content.

Therefore, to consistently catch up on key points and next steps after meetings, the correct Copilot feature to use is Recap.

NEW QUESTION # 21

Select the answer that correctly completes the sentence.

Answer Area

When you are creating an agent in Microsoft 365 Copilot, you can leverage generative AI to build the agent by using

- the Configure tab
- a Copilot notebook
- a Copilot page
- the Describe tab

Answer:

Explanation:

Answer Area

When you are creating an agent in Microsoft 365 Copilot, you can leverage generative AI to build the agent by using

- the Configure tab
- a Copilot notebook
- a Copilot page
- the Describe tab**

Explanation:

The Describe tab is where you leverage generative AI to help build an agent by describing what you want the agent to do in natural language. Instead of manually configuring everything first, you provide the agent's purpose, target users, tone, and the tasks it should perform (for example: "Create an onboarding agent that answers HR policy questions in a friendly tone and references SharePoint policies"). Copilot then uses that description to propose an initial agent setup—such as suggested behaviors, starter prompts, and structure—accelerating agent creation and improving consistency. By contrast, the Configure tab is typically used to fine-tune and finalize settings (such as knowledge sources, actions, and other parameters) after the agent concept is established. A Copilot notebook or Copilot page can help organize content and outputs, but they are not the primary place where generative AI "builds" the agent definition. Using the Describe tab reflects best practice: start with clear intent and constraints, then refine configuration for governance, accuracy, and usability.

NEW QUESTION # 22

Select the answer that correctly completes the sentence.

Answer:

Explanation:

NEW QUESTION # 23

You create a prompt in Microsoft 365 Copilot to help you create a draft project report.

You need the prompt to be available in the Copilot Prompt Gallery.

What should you do first?

- A. Run the prompt.
- B. Create a page.
- C. Add an agent.
- D. Create a notebook.

Answer: A

Explanation:

Comprehensive and Detailed 150 to 200 words of Explanation Microsoft AI Business professional documents:

In Microsoft 365 Copilot, the Copilot Prompt Gallery is used to store and reuse prompts that have been created and tested. To save a prompt into the gallery, Copilot must first have the prompt as an executed interaction so it can be captured as a reusable prompt (often alongside the context and intended outcome).

Microsoft guidance for prompt management emphasizes validating prompts by running them and reviewing the output, then saving the prompt for reuse once it produces the desired results.

Option D is therefore the correct first step: run the prompt. After execution, you can save it to the Prompt Gallery so it becomes easily discoverable and reusable for future project reports or for sharing within your organization (subject to policy).

Creating a notebook is useful for organizing reference materials across related conversations, but it is not required to publish a prompt to the gallery. Adding an agent is for creating specialized assistants with knowledge and capabilities, not for saving a single prompt. Creating a page is used to refine and collaborate on generated content, not to make a prompt available in the gallery. Therefore, the first action is to run the prompt.
