

질문 # 80

To ensure efficient use of OneAgent monitoring, which modes are recommended for a Database server?
(Select all that apply)

- A. Infrastructure
- B. Full support
- C. Discovery
- D. Full stack
- E. Half stack

정답: A,D

설명:

Dynatrace recommends selecting the appropriate OneAgent mode depending on the role of the host:

* Infrastructure mode is recommended when only host-level monitoring is required with minimal overhead

* Full-Stack mode is used when deep monitoring is needed, including process-level visibility and full observability Options like Full support , Discovery , and Half stack are not valid OneAgent monitoring modes in Dynatrace.

Reference: Based on official Dynatrace University training materials on OneAgent deployment modes.

질문 # 81

I need to take my live environment offline while I perform an upgrade. However, the upgrade will overlap with scheduled Synthetic tests. What can I configure in Dynatrace to avoid false alerting?

- A. Credential vault
- B. Synthetic On-demand execution
- C. Maintenance Window
- D. Delete the Synthetic monitors

정답: C

설명:

A Maintenance Window in Dynatrace allows you to suppress monitoring alerts during planned downtime or maintenance activities. When configured, it prevents problem detection and alerting for the specified entities and timeframe.

This ensures that:

* Scheduled Synthetic failures during maintenance are not treated as real incidents

* Alert noise is reduced

* Teams can perform upgrades without triggering unnecessary alerts

Other options are not suitable:

* Credential vault manages secrets

* Synthetic on-demand execution manually triggers tests

* Deleting monitors is not a practical or recommended solution

Reference: Based on official Dynatrace University training materials on maintenance windows and alert suppression.

질문 # 82

A problem opened with the event category of "Slowdown". Assuming Dynatrace is using the default anomaly detection settings, what entity types can be the root cause of this problem? (Select all that apply)

- A. Services
- B. Cloud Providers
- C. Hosts
- D. Applications
- E. Processes

정답: A,C,E

설명:

In Dynatrace, "Slowdown" problems are typically triggered by performance degradation detected through anomaly detection on monitored entities.

With default settings, the root cause of slowdown problems is usually identified at:

Services, where response time degradation is detected

Processes, where CPU, memory, or other resource bottlenecks occur

Hosts, where infrastructure-level issues impact performance

Applications are higher-level aggregations and are not typically identified as the root cause entity.

Cloud Providers are not treated as root cause entities in anomaly detection.

Dynatrace's AI (Davis) correlates these entities to pinpoint the most likely root cause in the topology.

Reference: Based on official Dynatrace University training materials covering problem detection and Davis AI root cause analysis.

질문 # 83

A developer wants to know how long it took for their application to load a specific resource request as a part of a button being clicked. What tool would be appropriate to find this information?

- A. Waterfall analysis
- B. The "Web" application
- C. User Session Query Language
- D. User action analysis

정답: A

설명:

Waterfall analysis provides a detailed breakdown of all resource requests triggered by a user action, including timing for each request.

It allows developers to:

- * See exactly how long each resource takes to load
- * Analyze dependencies between requests
- * Identify bottlenecks in frontend performance

This is especially useful for analyzing resource loading triggered by actions such as button clicks.

Other options:

- * Web application view provides overview data
- * User Session Query Language is for querying session data
- * User action analysis provides aggregated insights, not detailed request timing Reference: Based on official Dynatrace University training materials covering Real User Monitoring and waterfall analysis.

질문 # 84

Credential vault stores sensitive information for which Dynatrace capabilities?

- A. Dynatrace API
- B. Dynatrace Extensions v2
- C. Dynatrace Apps
- D. Synthetic HTTP monitors
- E. Synthetic Browser monitors

정답: B,D,E

설명:

The Credential Vault in Dynatrace is used to securely store sensitive data such as usernames, passwords, and tokens for capabilities that require authentication.

It is used by:

- * Synthetic Browser monitors for login simulations and scripted interactions
- * Synthetic HTTP monitors for authenticated API testing
- * Dynatrace Extensions v2 for connecting to external systems that require credentials Other options are not applicable:
- * Dynatrace API uses tokens but not stored via Credential Vault in this context
- * Dynatrace Apps do not rely on Credential Vault for authentication storage This ensures secure handling of credentials without exposing them in plain text.

Reference: Based on official Dynatrace University training materials covering Credential Vault usage.

Itcertkr Dynatrace Dynatrace-Associate덤프의 질문들과 답변들은 100%의 지식 요점과 적어도 98%의 시험 문제들을 커버하는,수년동안 가장 최근의Dynatrace Dynatrace-Associate시험 요점들을 컨설팅 해 온 시니어 프로 IT 전문가들의 그룹에 의해 구축 됩니다. Itcertkr의 IT전문가들이 자신만의 경험과 끊임없는 노력으로 최고의Dynatrace Dynatrace-Associate학습자료를 작성해 여러분들이Dynatrace Dynatrace-Associate시험에서 패스하도록 도와드립니다.

Dynatrace-Associate시험대비 인증덤프 : https://www.itcertkr.com/Dynatrace-Associate_exam.html

Dynatrace Dynatrace-Associate 100% 시험패스 덤프 회사일도 바쁜데 시험공부까지 스트레스가 장난아니게 싸이고 몸도 많이 상하겠죠, Dynatrace Dynatrace-Associate 100% 시험패스 덤프 Pass4Tes의 인증시험적중율은 아주 높습니다, 우리Itcertkr의Dynatrace Dynatrace-Associate시험관련자료로 여러분은 짧은시간내에 간단하게 시험을 패스할수 있습니다, 퍼펙트한 자료만이Dynatrace인증Dynatrace-Associate시험에서 성공할수 있습니다, Itcertkr Dynatrace Dynatrace-Associate 덤프는Dynatrace Dynatrace-Associate실제시험 변화의 기반에서 스케줄에 따라 업데이트 합니다, IT업계의 선구자로서 저희의 목표는 Dynatrace-Associate 시험에 참가하는 여러분들께 조금이나마 도움이 되어드리 는것입니다.

이제는 가슴을 펴고 숨을 크게 들이마셨다, 그런데 그런 그들이 천무진과 백아린의Dynatrace-Associate주장에 힘을 실켰다 나셨다, 회사일도 바쁜데 시험공부까지 스트레스가 장난아니게 싸이고 몸도 많이 상하겠죠, Pass4Tes의 인증시험적중율은 아주 높습니다.

Dynatrace-Associate 100% 시험패스 덤프 시험대비 인증덤프

우리Itcertkr의Dynatrace Dynatrace-Associate시험관련자료로 여러분은 짧은시간내에 간단하게 시험을 패스할수 있습니다, 퍼펙트한 자료만이Dynatrace인증Dynatrace-Associate시험에서 성공할수 있습니다, Itcertkr Dynatrace Dynatrace-Associate 덤프는Dynatrace Dynatrace-Associate실제시험 변화의 기반에서 스케줄에 따라 업데이트 합니다.
