In addition, the word size of the PL-400 study guide is suitable for you to read. And you can take it conveniently.

Microsoft Power Platform Developer Sample Questions (Q33-Q38):

NEW QUESTION # 33

You create solutions in a development environment and export the solution for testing by various departments in your organization. Power users in each department control the testing environments.

You must display department-specific wording at the beginning of any custom notifications that are displayed in testing environments. You need to package solutions to ensure that the power users can customize the notification content.

Which three actions should you perform in sequence inside a solution? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

- Create an empty environment variable named **Custom Text Placeholder**.
- Create a configuration page in the classic solution by using a text field named **Custom Text Placeholder** that uses the HTML file format.
- Set the default value of the text field Custom Text Placeholder to **Enter custom text**.
- Create a function to retrieve the value from the custom text placeholder and display the notification.
- Export the solution.
- Create a solution component configuration named **Custom Text Placeholder** that uses the JSON file format.

Answer area

Answer:

Explanation:

Answer Area

Create an empty environment variable named Custom Text Placeholder.

Create a function to retrieve the value from the custom text placeholder and display the notification.

Export the solution

- 1 - Create an empty environment variable named Custom Text Placeholder.
- 2 - Create a function to retrieve the value from the custom text placeholder and display the notification.
- 3 - Export the solution

NEW QUESTION # 34

You are composing a request to the Microsoft Dataverse Web API that updates existing account records in Dataverse and returns resulting records in the response.

You need to complete the request.

Which value should you use for each property? To answer, select the appropriate options in the Value for Property area.

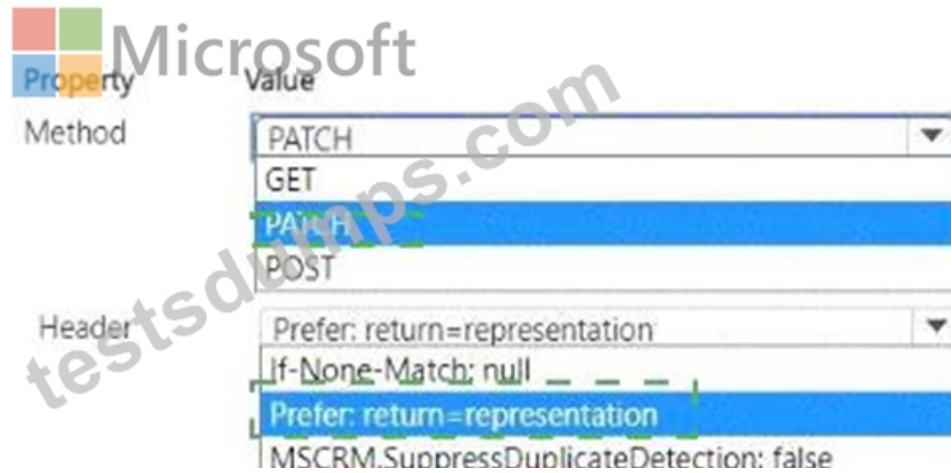

NOTE: Each correct selection is worth one point.

Property values

Property Method	Value
	PATCH
	GET
	PATCH
	POST
Header	Prefer: return=representation
	If-None-Match: null
	Prefer: return=representation
	MSCRM.SuppressDuplicateDetection: false

Answer:

Explanation:
Property values

Explanation:

NEW QUESTION # 35

You are creating a model-driven app that requires complex business logic when a Dataverse record is updated. The app must provide the following functionality:

- * Update a record using a REST API and able to manually retry in the event of a failure without additional development.
- * Validate the record values and display an error message next to those that are invalid.

You need to configure the app with the required business logic.

Which implementation method should you use? To answer, move the appropriate implementation methods to the correct functionalities. You may use each implementation method once, more than once, or not at all. You may need to move the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 36

You need to select visualization components.

What should you use? To answer, select the appropriate options from the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Component
Mailing list opt-in/opt-out	<input type="text"/> ▼ Flip switch Linear gauge Radial knob Linear slider
Number of store visits	<input type="text"/> ▼ Linear gauge Flip switch Pen control Input mask
Purpose of visit	<input type="text"/> ▼ Linear gauge Flip switch Radial knob Option set

Answer:

NEW QUESTION # 37

A travel company has a Common Data Service (CDS) environment.

The company requires the following:

- * Custom entities that track which countries/regions their clients have traveled.
- * The dates their clients traveled to these countries/regions.

You need to create the entities and relationships to meet the requirements.

Which three actions should perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct order you select.

Actions

Answer Area

- On the main form for ContactCountry, add the lookup fields for the Contact and Country, and a date field for the visit date.
- Create a 1:N relationship from Contact to the Country entity.
- Create a N:N relationship from Contact to the Country entity.
- Create a 1:N relationship from ContactCountry intersect entity and Country.
- Create the Country entity.
- On the main form for ContactCountry, add a sub grid to view the country information.
- Create an intersect entity named ContactCountry and create two N:1 relationships to Contact and Country.
- Create an intersect entity named ContactCountry and create two 1:N relationships to Contact and Country.

Answer:
