Salesforce Certified B2C Commerce Architect Sample Questions (Q64-Q69):

NEW QUESTION # 64

A client has a single site with multiple domains, locales, and languages. After launch, there is a need for the client to perform offline maintenance. The client would like to show the same maintenance page for each locale.

Which version of aliases,Json file below will accomplish this task?

- A. ☐
- B. ☐
- C. ☐
- D. ☒

Answer: D

NEW QUESTION # 65

Due to an integration issue, logs files are full. Because of that no new logs have been logged. Given this Business Manager logging configuration how would you solve the issue your client is experimenting in their site?

- A. Remove all log levels and activate them again when the issue is solved.
- B. Change root log level to error.
- C. Remove integration log level.
- D. Change integration log level to error.
- E. Disable integration log level by putting log level to OFF.

Answer: E

NEW QUESTION # 66

The Client wants to have a flash sale on a few products every day. These products are sold through B2C Commerce as well as in a store Point of Sale system that is tied to the same inventory.

An Architect analyzes the following proposed solution:

Inventory feed will continue to run daily but add a web-service call to compare and update B2C Commerce inventory in real time during checkout after a flash product's inventory reaches a threshold.

Which two risks should the Architect communicate to the Client about this solution?

Choose 2 answers

- A. If the external hosted web-service is unreliable. It could be a point of failure in the site's order placement flow.
- B. The default rate limiter configuration for the web-service could cause the web-service to return an exception during high traffic.
- C. If the product inventory threshold that triggers the web service calls is reached too often. It will have a negative impact on site performance.
- D. Because the job would still be configured to run daily there will be a degrade in performance during non-flash sales periods

Answer: A,C

NEW QUESTION # 67

The developer has been given the following business requirement:

The shipping method, "Free Standard Ground Shipping" has an exclusion for products with 'category equals or is child of electronics-televisions.' The marketing department has scheduled a sale offering a "Free Standard Ground Shipping" method for brand XyzTV televisions for the next 3 months.

What method accomplishes this while following best practices?

- A. Create an allow list for the existing shipping method by adding a product exclusion for 'brand equals XyzTV' to the exclusion list for "Free Standard Ground Shipping."
- B. Create a new shipping method and label it "Free Standard Ground Shipping". Give it the qualifier 'brand equals XyzTV', and add it to the checkout options.
- C. Extend the code in `cartridge/models/shipping/shippingMethod.js` using `module.superModule` and add an exception for the specified brand.
- D. Extend the `CheckoutShippingServices` controller using `module.superModule` and add an exception for the specified brand.

Answer: D

NEW QUESTION # 68

A B2C Commerce Developer has just finished implementing a new promotion code form on checkout. During review, an Architect notes that the form is not using CSRF validation correctly.

Which two options are best practice recommendations for dealing with CSRF validation? Choose 2 answers

- A. Only use POST methods over HTTPS.
- B. Ensure the CSRF protection is validated on form submission.
- C. Only use GET methods over HTTPS.
- D. Automatically renew the CSRF Token if expired.

Answer: A,B

Explanation:

For implementing CSRF (Cross-Site Request Forgery) protection correctly, especially in forms like promotion code submissions during checkout, best practices include:

* Option A (Ensure the CSRF protection is validated on form submission): It is crucial to validate the CSRF token upon the form's submission to ensure that the request originates from a legitimate source and corresponds to the user's intended actions, enhancing security against CSRF attacks.

* Option D (Only use POST methods over HTTPS): Using POST methods for transmitting form data helps mitigate the risk of CSRF attacks as opposed to GET methods which can be manipulated more easily via URL. Ensuring the communication is over HTTPS encrypts the transmission, securing the data from interception or tampering during transit.

These practices safeguard against common security vulnerabilities and ensure that the application adheres to secure coding standards.

NEW QUESTION # 69

.....

B2C-Commerce-Architect study material is in the form of questions and answers like the real exam that help you to master knowledge in the process of practicing and help you to get rid of those drowsy descriptions in the textbook.
