

DP-600 Der beste Partner bei Ihrer Vorbereitung der Implementing Analytics Solutions Using Microsoft Fabric

2026 Die neuesten ZertPruefung DP-600 PDF- Versionen Prüfungsfragen und DP-600 Fragen und Antworten sind kostenlos verfügbar: https://drive.google.com/open?id=1s_sYs8vRn4I7f4jPkIJG5DAbns3Xal_4

Die Schulungsunterlagen zur Microsoft DP-600 Zertifizierungsprüfung von ZertPruefung werden die größte Erfolgsquote erzielen. Neben den Büchern sind heutzutage das Internet als ein Wissensschatz angesehen. In ZertPruefung können Sie Ihren Wissensschatz finden. Das ist eine Website, die Ihnen sehr helfen können. Sie werden sicher komplizierte Übungen treffen, Unser ZertPruefung wird Ihnen helfen, die Prüfung ganz einfach zu bestehen, weil es alle erforderlichen Kenntnisse zur Microsoft DP-600 Zertifizierungsprüfung enthält.

ZertPruefung wird nicht nur Ihren Wunsch erfüllen, sondern Ihnen einen einjährigen kostenlosen Update-Service und Kundendienst bieten. Die Prüfungsfragen von ZertPruefung sind alle richtig, die Ihnen beim Bestehen der Microsoft DP-600 Zertifizierungsprüfung helfen. Im ZertPruefung können Sie kostenlos einen Teil der Fragen und Antworten zur Microsoft DP-600 Zertifizierungsprüfung als Probe herunterladen.

DP-600 Trainingsunterlagen - DP-600 Testengine

Wenn Sie sorgen darum, dass die Vorbereitungszeit für Microsoft DP-600 nicht genug ist oder wie die autoritative Prüfungsunterlagen finden können, dann können Sie ganz beruhigt sein. Wir ZertPruefung bieten Ihnen die neuesten Prüfungsunterlagen der Microsoft DP-600, die Ihnen helfen können, innerhalb einer kurzen Zeit auf die Microsoft DP-600 Prüfung vorbereitet zu sein. Wir besitzen die autoritativen Prüfungsunterlagen sowie erfahrens und verantwortungsvolles Team. Das Ziel aller Bemühungen von uns ist, dass Sie die Microsoft DP-600 Prüfung unbelastet bestehen.

Microsoft DP-600 Prüfungsplan:

Thema	Einzelheiten
Thema 1	Implement and manage semantic models: This section of the exam measures the skills of architects and focuses on designing and optimizing semantic models to support enterprise-scale analytics. It evaluates understanding of storage modes and implementing star schemas and complex relationships, such as bridge tables and many-to-many joins. Architects must write DAX-based calculations using variables, iterators, and filtering techniques. The use of calculation groups, dynamic format strings, and field parameters is included. The section also includes configuring large semantic models and designing composite models. For optimization, candidates are expected to improve report visual and DAX performance, configure Direct Lake behaviors, and implement incremental refresh strategies effectively.

Thema 2	• Maintain a data analytics solution: This section of the exam measures the skills of administrators and covers tasks related to enforcing security and managing the Power BI environment. It involves setting up access controls at both workspace and item levels, ensuring appropriate permissions for users and groups. Row-level, column-level, object-level, and file-level access controls are also included, alongside the application of sensitivity labels to classify data securely. This section also tests the ability to endorse Power BI items for organizational use and oversee the complete development lifecycle of analytics assets by configuring version control, managing Power BI Desktop projects, setting up deployment pipelines, assessing downstream impacts from various data assets, and handling semantic model deployments using XMLA endpoint. Reusable asset management is also a part of this domain.
Thema 3	• Prepare data: This section of the exam measures the skills of engineers and covers essential data preparation tasks. It includes establishing data connections and discovering sources through tools like the OneLake data hub and the real-time hub. Candidates must demonstrate knowledge of selecting the appropriate storage type—lakehouse, warehouse, or eventhouse—depending on the use case. It also includes implementing OneLake integrations with Eventhouse and semantic models. The transformation part involves creating views, stored procedures, and functions, as well as enriching, merging, denormalizing, and aggregating data. Engineers are also expected to handle data quality issues like duplicates, missing values, and nulls, along with converting data types and filtering. Furthermore, querying and analyzing data using tools like SQL, KQL, and the Visual Query Editor is tested in this domain.

Microsoft Implementing Analytics Solutions Using Microsoft Fabric DP-600 Prüfungsfragen mit Lösungen (Q146-Q151):

146. Frage

You have source data in a folder on a local computer.

You need to create a solution that will use Fabric to populate a data store. The solution must meet the following requirements:

- * Support the use of dataflows to load and append data to the data store.
- * Ensure that Delta tables are V-Order optimized and compacted automatically.

Which type of data store should you use?

- A. a warehouse
- B. an Azure SQL database
- C. a lakehouse
- D. a KQL database

Antwort: A,C

Begründung:

A lakehouse (A) is the type of data store you should use. It supports dataflows to load and append data and ensures that Delta tables are Z-Order optimized and compacted automatically. References = The capabilities of a lakehouse and its support for Delta tables are described in the lakehouse and Delta table documentation.

147. Frage

You need to ensure that Contoso can use version control to meet the data analytics requirements and the general requirements. What should you do?

- A. Store all the semantic models and reports in Microsoft OneDrive.
- B. Modify the settings of the Research division workspaces to use an Azure Repos repository.
- C. Store all the semantic models and reports in Data Lake Gen2 storage.
- D. Modify the settings of the Research workspaces to use a GitHub repository.

Antwort: B

Begründung:

You need to ensure that Contoso can use version control to meet the data analytics requirements and the general requirements. Requirement: "All the semantic models and reports for the Research division must use version control that supports branching." Fabric supports Git integration (Azure Repos or GitHub) for semantic models and reports.

Storing in Data Lake Gen2 or OneDrive does not provide version control with branching.
The correct action is to integrate workspaces with a Git repository.
Modify the settings of the Research division workspaces to use an Azure Repos repository.

148. Frage

You have a Fabric tenant that contains 30 CSV files in OneLake. The files are updated daily.
You create a Microsoft Power BI semantic model named Modell1 that uses the CSV files as a data source. You configure incremental refresh for Modell1 and publish the model to a Premium capacity in the Fabric tenant.
When you initiate a refresh of Modell1, the refresh fails after running out of resources.
What is a possible cause of the failure?

- A. Only refresh complete days is selected.
- B. XMLA Endpoint is set to Read Only.
- C. Query folding is NOT occurring.
- D. Query folding is occurring.
- E. The delta type of the column used to partition the data has changed.

Antwort: C

Begründung:

<https://learn.microsoft.com/en-us/power-bi/connect-data/incremental-refresh-troubleshoot#problem-loading-data-takes-too-long>

149. Frage

You have a Fabric tenant that contains a warehouse named Warehouse1. You have a large 1 TB dataset in an external data source.
You need to recommend a method to ingest the dataset into Warehouse1. The solution must provide the highest throughput and support a low-code/no-code development model.
What should you recommend?

- A. Spark notebook
- B. Shortcut
- C. Dataflow Gen2
- D. Copy data activity

Antwort: D

150. Frage

Hotspot Question

You have an Azure Data Lake Storage Gen2 account named storage1 that contains a Parquet file named sales.parquet.
You have a Fabric tenant that contains a workspace named Workspace1.

Using a notebook in Workspace1, you need to load the content of the file to the default lakehouse. The solution must ensure that the content will display automatically as a table named Sales in Lakehouse explorer.

How should you complete the code? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

☐

Antwort:

Begründung:

☐

Explanation:

<https://learn.microsoft.com/en-us/fabric/data-engineering/lakehouse-notebook-load-data>.
