CV0-004 Testdump | CV0-004 Free Exam Questions

We offer you free update for one year if you buy CV0-004 training materials from us. That is to say, in the following year, you will get the latest version once the CV0-004 exam dumps update. It can save your money for buying new version. In addition, the CV0-004 learning materials of us is compiled by experienced experts, and the quality can be guaranteed, you can pass your exam just one time by using ourCV0-004 Exam Dumps. We also have online and offline service stuff, if you have any question, you can consult us.

CompTIA Cloud+ (2025) Sample Questions (Q19-Q24):

NEW QUESTION # 19
Which of the following refers to the idea that data should stay within certain borders or territories?

- A. Data sovereignty
- B. Data ownership
- C. Data retention
- D. Data classification

Answer: A

Explanation:

Data sovereignty refers to the concept that data is subject to the laws and governance structures within the nation it is collected or stored. It implies that regardless of where a company's data is stored, the data must comply with the laws of the country where it is physically located.

Reference: The principle of data sovereignty is a critical consideration in international cloud services and is included in the governance, risk, and compliance domain of CompTIA Cloud+.

NEW QUESTION # 20

A manager wants information about which users signed in to a certain VM during the past month. Which of the following can the cloud administrator use to obtain this information?

- A. Aggregation
- B. Retention
- C. Alerting
- D. Collection

Answer: D

Explanation:

To obtain information about which users signed in to a certain VM during the past month, a cloud administrator can use log collection. Log collection involves gathering and storing logs from various sources, including VMs, to provide historical data on system access and activity, which can then be analyzed to identify user login instances.

Reference: The CompTIA Cloud+ certification emphasizes the importance of monitoring and visibility in cloud environments, which includes log collection and analysis as key components of operational management and security monitoring.

NEW QUESTION # 21

A cloud engineer is provisioning a new application that requires access to the organization's public cloud resources. Which of the following is the best way for the cloud engineer to authenticate the application?

- A. Access key
- B. API
- C. MFA token
- D. Username and Password

Answer: A

Explanation:

The best way to authenticate an application requiring access to an organization's public cloud resources is through the use of an access key. Access keys provide a secure means of authentication for applications and services without the need for interactive login credentials. This method is particularly useful for automated processes or applications that need to interact with cloud services programmatically, ensuring secure and efficient access control.

CompTIA Cloud+ content emphasizes the importance of secure authentication mechanisms, such as access keys, in managing and securing access to cloud resources, aligning with best practices for cloud security and application deployment.

NEW QUESTION # 22

Department supervisors have requested a report that will help them understand the utilization of cloud resources, make decisions about budgeting for the following year, and reduce costs. Which of the following are the most important requisite steps to create the report? (Choose two.)

- A. Set the desired retention of resource logs.
- B. Configure the collection of performance/utilization logs.
- C. Enable resource tagging.
- D. Integrate email alerts with ticketing software.
- E. Configure metric threshold alerts.
- F. Configure application tracing.

Answer: B,C

Explanation:
Enabling resource tagging allows categorization of resources by department, project, or purpose. This enables more granular tracking and reporting of costs associated with specific departments or initiatives, which is essential for budgeting and cost management.
Configuring the collection of performance/utilization logs provides the necessary data on how cloud resources are being used. This information is crucial for understanding resource utilization, identifying potential inefficiencies, and making informed budgeting decisions.

NEW QUESTION # 23
A company needs to deploy its own code directly in the cloud without provisioning additional infrastructure. Which of the following is the best cloud service model for the company to use?

- A. XaaS
- B. SaaS
- C. PaaS
- D. IaaS

Answer: C

Explanation:
PaaS (Platform as a Service) provides a platform that allows companies to deploy their own code directly without managing the underlying infrastructure. It offers the runtime environment and tools needed to develop, test, and deploy applications, so developers can focus on coding rather than managing servers or networking.

NEW QUESTION # 24

......

Our practice exams are designed solely to help you get your CompTIA CV0-004 certification on your first try. A CompTIA CV0-004 practice test will help you understand the exam inside out and you will get better marks overall. It is only because you have practical experience of the exam even before the exam itself. ExamDiscuss offers authentic and up-to-date study material that every candidate can rely on for good preparation. Our top priority is to help you pass the CompTIA Cloud+ (2025) (CV0-004) exam on the first try.
