Qlik Sense System Administrator Certification Exam - February 2021 Release Sample Questions (Q42-Q47):

NEW QUESTION # 42

A developer creates a new extension for Qlik Sense and needs to make it available in the Qlik Sense Enterprise environment. How does the system administrator make the use of this new extension available to users?

- A. If it is not compressed, create a .zip file and import the extension into the environment via QMC
- B. Unzip the extension in the folder StaticContent\Extensions\your_extension_name located in the shared folder
- C. Keep the extension uncompressed and import files via QMC
- D. Import the extension via API and unzip the files in the StaticContent\Extensions folder in the Shared Folder

Answer: A

NEW QUESTION # 43

A system administrator is installing and configuring a new Qlik Sense deployment. The system administrator completes the following steps:

- Makes sure the IT-provisioned server, named Server1, meets the required specifications
 - Installs Qlik Sense on Server1
 - Tests the installation by opening Qlik Sense from the server desktop shortcut
 - Modifies default virtual proxy prefix to "qliksense"
 - Creates a new virtual proxy for users with a prefix of "QSE"
 - Links the new virtual proxy to the central proxy
 - Configures the new virtual proxy to load balance with the central node
 - Configures the new virtual proxy host white list with the server name, FQDN, and server IP address
- When the system administrator tests the new virtual proxy using the URL, <http://Server1/sense/hub>, this error message displays: Error 404 The requested resource cannot be found. What is causing this error?

- A. The new central proxy was NOT created
- **B. The new virtual proxy is configured incorrectly**
- C. The central proxy was NOT configured correctly
- D. The incorrect virtual proxy was used in the test

Answer: B

NEW QUESTION # 44

A system administrator needs to create a new security rule in the Qlik Management Console (QMC) to grant a specific group of users access to a particular application while restricting other groups.

What are the correct steps to achieve this? (Choose the correct sequence) A) Open QMC and navigate to the Security Rules section.

B) Click "Create New Rule" and assign a name to the rule.

C) Define the appropriate resource filter for the application.

D) Set the conditions to allow access only to the required user group.

- A. C -> A -> B -> D
- B. B -> D -> C -> A
- C. D -> B -> A -> C
- **D. A -> B -> C -> D**

Answer: D

NEW QUESTION # 45

The marketing department creates a content library with all company logos and branding images. All business analysts are instructed to use only those images. Business analysts can NOT see these images when they create the apps.

What should the system administrator review first to troubleshoot this issue?

- A. Custom properties for the virtual proxy
- **B. Security rule for the content library**
- C. File permissions in Content folder
- D. Business analyst's browser proxy configuration

Answer: B

NEW QUESTION # 46

A customer has heard that it is possible to access your Qlik Sense environment through Mobile applications specific to smartphones and tablets. You want to make sure that iOS devices will have access even outside the business and without a compatible tunnel solution, but of course, access securely through a gateway.

How can this requirement be met?

- A. Set up an access to Qlik via VPN
- **B. Use enterprise mobile management (EMM) and Qlik Sense Mobile**
- C. Copy SSL certificates to mobile devices and make them access through the hub

- Answer: B**
