

100% Pass Salesforce Marvelous Valid Braindumps Data-Cloud-Consultant Free

P.S. Free & New Data-Cloud-Consultant dumps are available on Google Drive shared by ActualTestsIT: <https://drive.google.com/open?id=1jjZAJyya1o5TvJ5jHuZswWrtceVR6YzP>

Our company is widely acclaimed in the industry, and our Data-Cloud-Consultant study materials have won the favor of many customers by virtue of their high quality. Started when the user needs to pass the qualification test, choose the Data-Cloud-Consultant study materials, they will not have any second or even third backup options, because they will be the first choice of our practice exam materials. Our Data-Cloud-Consultant Study Materials are devoted to research on which methods are used to enable users to pass the test faster.

ActualTestsIT is a website that specializes in providing IT exam information. The pass rate can achieve 100%. Which is one of the reasons that most candidates willing to believe the ActualTestsIT. ActualTestsIT have been always concerned about the needs of the majority of candidates. We always with the greatest ability to meet the needs of the candidates. ActualTestsIT's Salesforce Data-Cloud-Consultant Exam Training materials is an unprecedented IT certification training materials. With it, your future career will be rain or shine.

Test Data-Cloud-Consultant Pdf & Test Data-Cloud-Consultant Simulator Free

Many candidates are interested in our software test engine of Data-Cloud-Consultant. This version is software. If you download and install on your personal computer online, you can copy to any other electronic products and use offline. The software test engine of Data-Cloud-Consultant is very practical. It can be used on Phone, Ipad and so on. You can study any time anywhere you want. Comparing to PDF version, the software test engine of Salesforce Data-Cloud-Consultant also can simulate the real exam scene so that you can overcome your bad mood for the real exam and attend exam casually.

Salesforce Data-Cloud-Consultant Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Data Ingestion and Modeling: This topic covers the different transformation capabilities within Data Cloud. It includes describing processes and considerations for data ingestion from various sources, defining, mapping, and modeling data using best practices aligned with identity resolution. Lastly, it discusses using available tools to inspect and validate ingested and modeled data.
Topic 2	<ul style="list-style-type: none">• Identity Resolution: It describes matching and how its rule sets are applied. Furthermore, it discusses reconciling data and its rule sets, the results of identity resolution, and use cases.

Topic 3	<ul style="list-style-type: none"> Segmentation and Insights: This topic defines basic concepts of segmentation and use cases, identifies scenarios for analyzing segment membership, configuring, refining, and maintaining segments within Data Cloud, and differentiating between calculated and streaming insights.
Topic 4	<ul style="list-style-type: none"> Data Cloud Setup and Administration: This topic includes applying Data Cloud permissions, permission sets, org-wide settings. It describes and configures data stream types, and data bundles. Moreover, it discusses use cases for data spaces, creating data spaces, managing and administering Data Cloud using reports, dashboards, flows, packaging, data kits, diagnosing and exploring data using Data Explorer, Profile Explorer, and APIs.
Topic 5	<ul style="list-style-type: none"> Act on Data: This topic defines activations and their basic use cases, using attributes and related attributes, identifying and analyzing timing dependencies affecting the Data Cloud lifecycle. Additionally it focuses on troubleshooting common problems with activations, and using data actions, including their requirements and intended use cases.

Salesforce Certified Data Cloud Consultant Sample Questions (Q113-Q118):

NEW QUESTION # 113

A consultant is troubleshooting a segment error.

Which error message is solved by using calculated insights Instead of nested segments?

- A. Segment population count failed.
- B. Segment can't be published.
- C. Multiple population counts are in progress.
- D. Segment is too complex.

Answer: D

NEW QUESTION # 114

The recruiting team at Cumulus Financial wants to identify which candidates have browsed the jobs page on its website at least twice within the last 24 hours. They want the information about these candidates to be available for segmentation in Data Cloud and the candidates added to their recruiting system.

Which feature should a consultant recommend to achieve this goal?

- A. Batch data transform
- B. Calculated insight
- C. Streaming data transform
- D. Streaming insight

Answer: D

Explanation:

Explanation

A streaming insight is a feature that allows users to create and monitor real-time metrics from streaming data sources, such as web and mobile events. A streaming insight can also trigger data actions, such as sending notifications, creating records, or updating fields, based on the metric values and conditions. Therefore, a streaming insight is the best feature to achieve the goal of identifying candidates who have browsed the jobs page on the website at least twice within the last 24 hours, and adding them to the recruiting system. The other options are incorrect because:

* A streaming data transform is a feature that allows users to transform and enrich streaming data using SQL expressions, such as filtering, joining, aggregating, or calculating values. However, a streaming data transform does not provide the ability to monitor metrics or trigger data actions based on conditions.

* A calculated insight is a feature that allows users to define and calculate multidimensional metrics from data using SQL expressions, such as LTV, CSAT, or average order value. However, a calculated insight is not suitable for real-time data analysis, as it runs on a scheduled basis and does not support data actions.

* A batch data transform is a feature that allows users to create and schedule complex data transformations using a visual editor,

such as joining, aggregating, filtering, or appending data.

However, a batch data transform is not suitable for real-time data analysis, as it runs on a scheduled basis and does not support data actions. NEW QUESTION # 115

Cloud Kicks wants to be able to build a segment of customers who have visited its website within the previous 7 days. Which filter operator on the Engagement Date field fits this use case?

- A. Is Between
- **B. Last Number of Days**
- C. Next Number of Days
- D. Greater than Last Number of

Answer: B

Explanation:

The filter operator Last Number of Days allows you to filter on date fields using a relative date range that specifies the number of days before today. For example, you can use this operator to filter on customers who have visited your website in the last 7 days, or the last 30 days, or any number of days you want. This operator is useful for creating dynamic segments that update automatically based on the current date¹². References:

Create Filtered Segments

NEW QUESTION # 116

The leadership team at Cumulus Financial has determined that customers who deposited more than \$250,000 in the last five years and are not using advisory services will be the central focus for all new campaigns in the next year.

Which features support this use case?

- A. Streaming insight and segment
- **B. Calculated insight and segment**
- C. Streaming insight and data action
- D. Calculated insight and data action

Answer: B

Explanation:

Understanding the Use Case:

The leadership team wants to focus on customers who have deposited more than \$250,000 in the last five years and are not using advisory services.

Reference: Salesforce Data Cloud Use Case Documentation

Features Involved:

Calculated Insight: This feature helps derive metrics and values based on existing data. In this case, it can calculate total deposits over the last five years.

Segment: Segmentation allows targeting specific groups of customers based on defined criteria, such as total deposits and usage of advisory services.

Reference: Salesforce Calculated Insights and Segmentation Guide

Steps to Implement:

Create a Calculated Insight:

Navigate to Visual Insights Builder in Salesforce Data Cloud.

Create a new calculated insight to sum deposits for each customer over the last five years.

Create a Segment:

Use the Segment Canvas to create a new segment.

Apply filters to include customers with deposits over \$250,000 and exclude those using advisory services.

Reference: Salesforce Calculated Insights Tutorial and Segment Creation Guide Practical Application:

Example: Identify high-value customers who are not leveraging additional services and target them with personalized marketing campaigns to promote advisory services.

Reference: Salesforce High-Value Customer Segmentation Case Study

NEW QUESTION # 117

A customer has multiple team members who create segment audiences that work in different time zones. One team member works at the home office in the Pacific time zone, that matches the org Time Zones setting.

Another team member works remotely in the Eastern time zone.

Which user will see their home time zone in the segment and activation schedule areas?

- A. The team member in the Pacific time zone.
- B. The team member in the Eastern time zone.
- C. Both team members; Data Cloud adjusts the segment and activation schedules to the time zone of the logged-in user
- D. Neither team member; Data Cloud shows all schedules in GMT.

Answer: C

Explanation:

Explanation

The correct answer is D, both team members; Data Cloud adjusts the segment and activation schedules to the time zone of the logged-in user. Data Cloud uses the time zone settings of the logged-in user to display the segment and activation schedules. This means that each user will see the schedules in their own home time zone, regardless of the org time zone setting or the location of other team members. This feature helps users to avoid confusion and errors when scheduling segments and activations across different time zones. The other options are incorrect because they do not reflect how Data Cloud handles time zones. The team member in the Pacific time zone will not see the same time zone as the org time zone setting, unless their personal time zone setting matches the org time zone setting. The team member in the Eastern time zone will not see the schedules in the org time zone setting, unless their personal time zone setting matches the org time zone setting. Data Cloud does not show all schedules in GMT, but rather in the user's local time zone. References:

* Data Cloud Time Zones

* Change default time zones for Users and the organization

* Change your time zone settings in Salesforce, Google & Outlook

* DateTime field and Time Zone Settings in Salesforce

NEW QUESTION # 118

.....

Unfortunately, many candidates don't pass the Data-Cloud-Consultant exam because they rely on outdated Salesforce Certified Data Cloud Consultant exam preparation material. Failure leads to anxiety and money loss. You can avoid this situation with ActualTestsIT that provides you with the most reliable and actual Salesforce Data-Cloud-Consultant Dumps with their real answers for Data-Cloud-Consultant exam preparation. This Data-Cloud-Consultant exam material contains all kinds of actual Salesforce Certified Data Cloud Consultant exam questions and practice tests to help you to ace your exam on the first attempt.
