TestPassKing also offers a demo of the Palo Alto Networks NetSec-Pro exam product which is absolutely free. Up to 1 year of free Palo Alto Networks Network Security Professional (NetSec-Pro) questions updates are also available if in any case the sections of the Palo Alto Networks NetSec-Pro Actual Test changes after your purchase. Lastly, we also offer a full refund guarantee according to terms and conditions if you do not get success in the Palo Alto Networks Network Security Professional exam after using our NetSec-Pro product.

We are equipped with a team of IT elites who have a good knowledge of IT field and do lots of study in Palo Alto Networks certification exam. All dumps free of TestPassKing are creating based on the actual test. Our colleagues check the updating of NetSec-Pro Test Questions everyday to make sure that all answers are latest and valid. Our NetSec-Pro test study material contains valid top questions and detailed exam answers.

Valid NetSec-Pro Exam Guide & Valid NetSec-Pro Braindumps

TestPassKing provides Palo Alto Networks NetSec-Pro desktop-based practice software for you to test your knowledge and abilities. The NetSec-Pro desktop-based practice software has an easy-to-use interface. You will become accustomed to and familiar with the free demo for Palo Alto Networks NetSec-Pro Exam Questions. Exam self-evaluation techniques in our NetSec-Pro desktop-based software include randomized questions and timed tests. These tools assist you in assessing your ability and identifying areas for improvement to pass the Palo Alto Networks Network Security Professional exam.

Palo Alto Networks NetSec-Pro Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> Platform Solutions, Services, and Tools: This section measures the expertise of security engineers and platform administrators in Palo Alto Networks NGFW and Prisma SASE products. It involves creating security and NAT policies, configuring Cloud-Delivered Security Services (CDSS) such as security profiles, User-ID and App-ID, decryption, and monitoring. It also covers the application of CDSS for IoT security, Enterprise Data Loss Prevention, SaaS Security, SD-WAN, GlobalProtect, Advanced WildFire, Threat Prevention, URL Filtering, and DNS security. Furthermore, it includes aligning AIOps with best practices through administration, dashboards, and Best Practice Assessments.
Topic 2	<ul style="list-style-type: none"> Infrastructure Management and CDSS: This section tests the abilities of security operations specialists and infrastructure managers in maintaining and configuring Cloud-Delivered Security Services (CDSS) including security policies, profiles, and updates. It includes managing IoT security with device IDs and monitoring, as well as Enterprise Data Loss Prevention and SaaS Security focusing on data encryption, access control, and logging. It also covers maintenance and configuration of Strata Cloud Manager and Panorama for network security environments including supported products, device addition, reporting, and configuration management.
Topic 3	<ul style="list-style-type: none"> Network Security Fundamentals: This section of the exam measures skills of network security engineers and covers key concepts such as application layer inspection for Strata and SASE products, differentiating between slow and fast path packet inspection, and the use of decryption methods including SSL Forward Proxy, SSL Inbound Inspection, SSH Proxy, and scenarios where no decryption is applied. It also includes applying network hardening techniques like Content-ID, Zero Trust principles, User-ID (including Cloud Identity Engine), Device-ID, and network zoning to enhance security on Strata and SASE platforms.

Palo Alto Networks Network Security Professional Sample Questions (Q18-Q23):

NEW QUESTION # 18

Which two components of a Security policy, when configured, allow third-party contractors access to internal applications outside business hours? (Choose two.)

- A. App-ID
- B. Service
- C. Schedule
- D. User-ID

Answer: C,D

Explanation:

To allow third-party contractors controlled access, security policies must combine user identification and time-based access controls: User-ID

User-ID enables security policies to be based on user identity rather than IP addresses, ensuring precise policy enforcement for specific users such as contractors.

Schedule

Schedules allow policies to be active only during specific times, providing time-based access control (e.g., after business hours). Together, they ensure that only authorized users (contractors) have access, and only when explicitly allowed.

NEW QUESTION # 19

Which two prerequisites must be evaluated when decrypting internet-bound traffic? (Choose two.)

- A. Incomplete certificate chains
- B. Certificate pinning
- C. RADIUS profile
- D. SAML certificate

Answer: A,B

Explanation:

When implementing SSL Forward Proxy decryption for outbound traffic, two key challenges that must be evaluated are:
Incomplete certificate chains: This occurs when the firewall cannot validate the entire certificate chain for a site, which may cause decryption failures.

Certificate pinning: Applications like banking apps may use certificate pinning to prevent MITM (man-in-the-middle) attacks, and these applications will break if SSL Forward Proxy is used.

When decrypting outbound SSL traffic, you must consider incomplete certificate chains, which can cause decryption to fail if the firewall cannot validate the entire chain. Also, be aware of certificate pinning in applications that prevents decryption by rejecting forged certificates.

NEW QUESTION # 20

What feature ensures smooth upgrades in Prisma Access without interrupting service?

- A. Disabling all policies before upgrade
- B. Multi-phase firmware staging
- C. Zero-downtime upgrade architecture
- D. Backup-based deployment

Answer: C

Explanation:

Prisma Access is designed with mechanisms that allow upgrades to be performed without impacting network traffic or service availability, specifically leveraging phased, resilient upgrade processes with built-in failover and redundancy to guarantee continuous operation during upgrades. Disabling policies, backup-based deployment, and multi-phase firmware staging are not unique to Prisma Access's seamless upgrade capabilities.

NEW QUESTION # 21

Which two features are available in Strata Cloud Manager (SCM)? (Choose two)

- A. GlobalProtect Portal Hosting
- B. Real-time logging and visualization
- C. Centralized decryption key generation
- D. AI/ops-driven security best practice recommendations

Answer: B,D

Explanation:

Real-time logging and visualization: SCM provides centralized visibility with real-time insights into network activities, threats, user behavior, and logs through interactive dashboards and reporting.

AI/ops-driven security best practice recommendations: SCM leverages AI-powered analysis to provide best practice recommendations, proactive threat detection, policy anomaly resolution, and operational health insights to improve security posture.

NEW QUESTION # 22

Which set of attributes is used by IoT Security to identify and classify appliances on a network when determining Device-ID?

- A. Device model, firmware version, and user credential
- B. MAC address, device manufacturer, and operating system
- C. IP address, network traffic patterns, and device type
- D. Hostname, application usage, and encryption method

Answer: B

Explanation:

IoT Security uses MAC address, device manufacturer, and OS information to identify and classify devices via Device-ID.

"IoT Security uses passive network traffic analysis to fingerprint devices based on the MAC address, manufacturer, and operating system to ensure accurate classification." (Source: IoT Security Device-ID and Classification) These attributes provide a robust, manufacturer-agnostic method to fingerprint IoT devices.

NEW QUESTION # 23

.....

The biggest advantage of our NetSec-Pro study question to stand the test of time and the market is that our sincere and warm service. To help examinee to pass NetSec-Pro exam, we are establishing a perfect product and service system between us. We can supply right and satisfactory NetSec-Pro exam questions you will enjoy the corresponding product and service. We can't say we are the absolutely 100% good, but we are doing our best to service every customer. Only in this way can we keep our customers and be long-term cooperative partners. Looking forwarding to your NetSec-Pro Test Guide use try!
