PMI Cognitive Project Management in AI CPMAI v7 - Training & Certification Exam Sample Questions (Q31-Q36):

NEW QUESTION # 31
Leadership wants a new HR system built that will better handle potential candidate matching. The project manager assigned to this project believes that the project is well-suited for AI, however they are unsure which pattern of AI this would be.
What should the project manager do?

- A. Move forward without determining which pattern of AI this falls under.
- B. Conduct a straw poll with stakeholders to determine which pattern of AI this project falls under so they can best collect the data needed and skill sets for the team.
- C. Determine which pattern of AI this project falls under so they can best collect the data needed and skill sets for the team.
- D. Pick an algorithm that seems best suited for the problem and then determine which pattern of AI it is based on the algorithm selected.

Answer: C

Explanation:
In Phase I: Business Understanding, after performing the Go/No Go assessment, the CPMAI methodology requires teams to perform AI Pattern identification-mapping business objectives to one or more of the Seven Patterns of AI-so that the right data requirements, algorithms, and team skills can be scoped effectively. This early pattern identification helps accelerate design by leveraging best practices for that pattern .

NEW QUESTION # 32
You are establishing the data requirements for the project. Which of the following tasks is the least likely to impact data requirements?

- A. The volume of the data you collect
- B. The quality of the data you collect
- C. The location/source of your data collection
- D. The makeup of your data team

Answer: D

Explanation:
In Phase II: Data Understanding, CPMAI's Generic Task Groups focus on:
Collecting initial data (identifying sources and volumes) and describing data (location/source) .
Verifying data quality to ensure completeness and correctness .
Team composition (the makeup of your data team) is addressed earlier under Phase I: Assess Situation, not during the Data
Understanding phase where data requirements (quality, volume, source) are determined.

NEW QUESTION # 33

You want to create a model to figure out if a customer would be likely to repurchase a certain item. The project owner doesn't want
you to create anything too complicated, and you have a limited data set to work with.

- A. Neural Networks
- B. Generative AI
- C. Naive Bayes
- D. Ensemble models

Answer: C

Explanation:
The CPMAI Glossary defines a naive Bayes classifier as "a family of simple probabilistic classifiers based on Bayes' theorem with
the assumption of feature independence," making it ideal for small or limited datasets where model simplicity and interpretability are
priorities.
=========

NEW QUESTION # 34

During CPMAI Phase IV: Model Development, which of the following is not done during this phase?

- A. Model Selection
- B. Model tuning
- C. Model training
- D. Algorithm Selection

Answer: A

Explanation:
The Phase IV: Model Development generic tasks include:
Select Modeling Technique (algorithm selection)
Generate model test design
Model Training / Model Building
Hyperparameter Optimization (model tuning)
Final Model Selection (choosing the best candidate against business criteria) is performed in Phase V: Model Evaluation, not in
Phase IV .
=========

NEW QUESTION # 35

Enhancing and cleaning data is an important action during which phase of CPMAI?

- A. Phase I
- B. Phase IV
- C. Phase II
- D. Phase V
- E. Phase VI
- F. Phase III

Answer: F

Explanation:

Phase III: Data Preparation is dedicated to all data-centric tasks, including cleaning ("Clean data") and enhancement ("Enhance & Augment data") of raw inputs so they're ready for model consumption.
