It is closely associated, as our experts in constantly update products every day to ensure the accuracy of the problem, so all Cloud-Digital-Leader practice materials are high accuracy.

Google Cloud Digital Leader Sample Questions (Q68-Q73):

NEW QUESTION # 68

What according to you are NOT the key capabilities of In-App Messaging?

- A. Increasing conversion for user-to-user sharing
- B. Sending relevant messages to the target audience
- C. Target messages accordingly to the change in the behavior pattern of the target audience.
- D. Creating customized and flexible alerts

Answer: A

Explanation:

In-App Messaging

Engage active app users with contextual messages.

Firebase In-App Messaging helps you engage users who are actively using your app by sending them targeted and contextual messages that nudge them to complete key in-app actions - like beating a game level, buying an item, or subscribing to content.

NEW QUESTION # 69

A retail store has discovered a cost-effective solution for creating self-service kiosks. They can use existing check-out hardware and purchase a virtual customer service application. Why do they also need an API?

- A. To update the check-out hardware remotely.
- B. To connect the check-out hardware to the public cloud.
- C. To connect the new application with the legacy system.
- D. To migrate all customer data for disaster recovery.

Answer: C

Explanation:

APIs can create new business value by connecting legacy systems (the checkout hardware) with new software (the virtual customer service application).

NEW QUESTION # 70

You are working in a company that provides different services to its customer. Now it also wants to offer some paid API services to its B2B customers for e.g. google provides google maps API, cloud vision API, and language translation API. You need to figure out the best solution for the service.

- A. Java Programming Spring Boot Framework for to solve the problem of APIs management.
- B. Cloud Functions with Firestore and payment gateways integration development.
- C. Frontend & Backend Development with NodeJs and angular etc.
- D. Apigee API Management

Answer: D

Explanation:

A top-level idea about Apigee API Management and its offered features can help you solve all questions related to Apigee in Cloud Digital Leader Practice Exam.

Apigee is a platform for developing and managing APIs. By fronting services with a proxy layer, Apigee provides an abstraction or facade for your backend service APIs and provides security, rate limiting, quotas, analytics, and more.

Apigee services: The APIs that you use to create, manage, and deploy your API proxies.

Apigee runtime: A set of containerized runtime services in a Kubernetes cluster that Google maintains. All API traffic passes through and is processed by these services.

NEW QUESTION # 71

An organization wants to upskill their IT staff.

How can they do this in a transformational way?

- A. Prioritize giving privileged access to third-party partners and contractors to fill IT knowledge gaps.
- B. Create a culture of self-motivated, isolated learning with official training materials.
- C. Prioritize training current employees instead of hiring new recruits with cloud experience.
- **D. Create a culture of continuous peer-to-peer learning with official training materials.**

Answer: D

NEW QUESTION # 72

An organization is evaluating its defenses against cyber security threats and is concerned about the risks of social engineering by cyber criminals. How might these attacks happen?

- **A. Phishing emails**
- B. Physical damage to hardware
- C. Distributed denial-of-service attacks
- D. SQL injection attacks

Answer: A
