It can not only save your time and money, but also help you clear GIAC practice exam with high rate.

GIAC Response and Industrial Defense (GRID) Sample Questions (Q14-Q19):

NEW QUESTION # 14

Which of the following is a recommended practice for maintaining visibility in an ICS environment?

- A. Using unmonitored third-party software
- **B. Continuously monitoring network traffic to detect new or unauthorized devices**
- C. Disconnecting devices from the network
- D. Removing network access for all users

Answer: B

NEW QUESTION # 15

Your ICS network is being targeted by a sophisticated attacker who is attempting to disrupt operations by exploiting a known vulnerability in one of your devices.

What steps should you take using active defense principles to mitigate the attack and secure your environment?

- A. Continue normal operations without making any changes
- B. Shut down the entire ICS network
- C. Replace all hardware in the ICS network
- D. Review the intrusion detection system (IDS) logs, block traffic from the attacker's IP address, apply the necessary patches to fix the vulnerability, and increase monitoring on the affected device

Answer: D

NEW QUESTION # 16

An ICS environment has experienced a ransomware attack affecting several critical systems.

What should be the first step in the incident response process?

- A. Increase system processing speed
- B. Isolate the affected systems from the network to prevent further spread, and begin forensic analysis to identify the extent of the attack
- C. Reboot the entire network
- D. Restart all affected systems

Answer: B

NEW QUESTION # 17

How can active defense strategies in ICS environments help mitigate insider threats?

- A. By automating all processes in the ICS environment
- B. By monitoring user behavior, detecting abnormal actions, and responding in real-time to suspicious activities
- C. By reducing the number of employees in the ICS environment
- D. By increasing the processing power of ICS systems

Answer: B

NEW QUESTION # 18

Why is it critical to develop a baseline of normal behavior before conducting threat hunting in an ICS environment?

- A. To identify deviations from normal behavior that could indicate potential threats
- B. To disable unnecessary systems
- C. To eliminate the need for monitoring
- D. To reduce energy consumption

Answer: A

NEW QUESTION # 19

.....

On the pages of our GRID study tool, you can see the version of the product, the updated time, the quantity of the questions and answers, the characteristics and merits of the product, the price of our product, the discounts to the client, the details and the guarantee of our GRID study torrent, the methods to contact us, the evaluations of the client on our product, the related exams and other information about our GIAC Response and Industrial Defense (GRID) test torrent.
