One of the great advantages of buying our product is that can help you master the core knowledge in the shortest time. At the same time, our Experience-Cloud-Consultant learning materials discard the most traditional rote memorization methods and impart the key points of the qualifying exam in a way that best suits the user's learning interests, this is the highest level of experience that our most authoritative think tank brings to our Experience-Cloud-Consultant Learning Materials users. Believe that there is such a powerful expert help, our users will be able to successfully pass the qualification test to obtain the qualification certificate.

Salesforce Certified Experience Cloud Consultant Sample Questions (Q76-Q81):

NEW QUESTION # 76
Ursa Major Solar (UMS) wants to differentiate between the leads created by partners and the leads created by its own Sales team.
All lead records are shared with partners: however, some of the information captured by the Sales team on the lead record should not be shared with partners.
Which two steps should UMS take at a minimum in order to meet the requirement?
Choose 2 answers

- A. Enable "Lead Sharing" in Digital Experience settings.
- B. Create Page Layouts for Lead Distribution.
- C. Create Lead Record Types for Lead Distribution.
- D. Create a separate channel for partners in PRM Workspaces.

Answer: B,C

Explanation:
To differentiate between the leads created by partners and the leads created by its own Sales team, UMS should create lead record types and page layouts for lead distribution. A record type is a way to offer different business processes, picklist values, and page layouts to different users based on their profiles. A page layout is a way to control the layout and organization of detail and edit pages in Salesforce. By creating lead record types and page layouts, UMS can customize the fields and values that are displayed to partners and Sales team members.

NEW QUESTION # 77
Ursa Major Solar (UMS) has seen exponential growth in recent years. The Incoming call volume to the support center has gone up exponentially as well, and is now reaching unmanageable levels.
What should UMS consider to help the situation?

- A. Create a smart queue router using Service Cloud template.
- B. Create a peer-to-peer forum using Self Service template.
- C. Create virtual support agents using Chat Bot template.
- D. Create a self service community using Customer Service template.

Answer: D

NEW QUESTION # 78
The Salesforce Administrator at Ursa Major Solar is trying to create a partner user for their Partner Community that was built using Salesforce Experience Builder. However, the admin is not able to create it from the contact record.
What could be two reason causing this issue?
Choose 2 answers

- A. The account record associated with the contact record is not enabled as a partner.
- B. The Salesforce Administrator is not assigned a role in Salesforce.
- C. The Salesforce Administrator is not a member of the Partner Community
- D. The Salesforce administrator is not marked as a delegated administrator on the partner account.

Answer: A,D

Explanation:
Two reasons causing this issue are C and D. To create a partner user for their Partner Community, the Salesforce administrator needs to have two requirements met: The account record associated with the contact record must be enabled as a partner, which means that it has the Is Partner checkbox checked. This indicates that the account is part of your partner network and can access your Partner Community site. The Salesforce administrator must be marked as a delegated administrator on the partner account, which means that they have limited administrative privileges to perform certain user management tasks on behalf of an administrator. This allows them to create partner users from contact records without having full system administrator access.

NEW QUESTION # 79

Cloud Kicks (CK) wants potential customers to use self-registration to sign up and gain access to its new site. CK uses Person Accounts for its customers.

How should the CK system administrator configure self-registration?

- A. Leave the Account field blank.
- B. Create a flow to convert the Contact to a Person Account.
- C. Create a trigger on User to convert the Contact to a Person Account.
- D. Set the profile to the standard Person Account profile.

Answer: A

Explanation:

To configure self-registration for customers who use Person Accounts, CK should leave the Account field blank. This will allow CK to create individual customers without associating them with an account. CK can use the standard self-registration configuration under Experience Workspace and select a profile or permission set that supports Person Accounts. CK can also customize the self-registration page and Apex handler to create Person Accounts for customers based on their information.

NEW QUESTION # 80

Ursa Major Solar (UMS) would like to render a header and footer from an external content management system into its customer portal.

Which feature should UMS use to accomplish this?

- A. Developer Console
- B. Compact Header Properties
- C. CMS Connect
- D. Rich Content Editor

Answer: C

Explanation:

CMS Connect allows you to display content from an external content management system (CMS) in your Experience Cloud site. You can use CMS Connect to render a header and footer from your CMS in your site, as well as other content types such as articles, banners, or images.
