We will provide you with excellent after-sales service with the utmost patience and attitude. And we will give you detailed solutions to any problems that arise during the course of using

Salesforce Certified Experience Cloud Consultant Sample Questions (Q93-Q98):

NEW QUESTION # 93

The UniversalContainers Experience Cloud admin needs to move a site from one production org to another production org that it is not directly connected to.

What is the recommended choice for moving the site from one org to the other?

- A. Deployment via Change Set
- B. Publication via Experience Builder
- C. Deployment via Metadata API
- D. Lightning Bolt Export and Installation

Answer: D

Explanation:

To move a site from one production org to another production org that is not directly connected, UC should use Lightning BoltExport and Installation. Lightning Bolt is a feature that allows UC to export a site as a package that contains the site template, theme, pages, components, and content. UC can then install the package in another org using the AppExchange or a URL link.

NEW QUESTION # 94

Universal Containers (UC) has a customer portal so that customers can manage their shipping. UC has several sharing rules in place and leverages theExternal Account Hierarchy to assist with data access. One of UC's large customers, Cloud Kicks, has recently acquired Northern Trail Outfitters. Sales wants to merge these two accounts, but they are getting an error.

What could be the cause of the error?

- A. Accounts with active Experience Cloud users cannot be merged with another account.
- B. The user trying to merge the accounts does not have the Merge Portal Roles permission.
- C. The user trying to merge the accounts does not have the System Administratorprofile.
- D. Accounts used in an External Account Hierarchy cannot be merged with another account.

Answer: D

Explanation:

The cause of the error is that accounts used in an External Account Hierarchy cannot be merged with another account. An External Account Hierarchyis a feature that allows you to create a hierarchy of partner accounts and contacts that mirrors the structure of your partner's organization. This helps you manage data access and visibility for your partners. However, accounts that are part of an ExternalAccount Hierarchy cannot be merged with other accounts, because this would disrupt the hierarchy and the sharing settings.

NEW QUESTION # 95

AW Computing is using the Build Your Own (LWR) template to create a site for its customers. The site will showcase blog posts written by AW Computing thought leaders.

Which component should the site creator use to dynamically populate the site with blog posts as new ones are added?

- A. CMS - Single
- B. Grid component with list.views
- C. Grid component with CMS Collections
- D. CMS Connect (JSON)

Answer: C

Explanation:

To dynamically populate the site with blog posts as new ones are added, CK should use a Grid component with CMS Collections. A Grid component is a componentthat displays content in a grid layout with rows and columns. A CMS Collection is a collection of content items that are created and managed in Salesforce CMS.

CK can use a Grid component and select a CMS Collection as the content source. This will allow CK to showcase blog posts

written by AW Computing thought leaders on its site and automatically update them as new ones are added.

NEW QUESTION # 96

Universal Containers (UC) is implementing a community for its retailers.
How can UC give retail store managers access to the records owned by their peers and subordinates?

- A. Set OWD to public, and manage access via Apex Sharing.
- B. Put retail managers in a manager role.
- C. Give retail managers Super User access.
- D. Email retail managers best practices on how to manually share data.

Answer: C

Explanation:
This option allows UC to give retail store managers access to the records owned by their peers and subordinates. Super User access is a feature that grants community users access to records that are owned by users who have the same role or a role below them in the role hierarchy. Super User access can be enabled for partner users or customer users with Customer Community Plus or Partner Community licenses2

NEW QUESTION # 97

What is required when creating portal users through Just-Time (JIT) provisioning?

- A. User.Role
- B. FederationIdentifier
- C. FirstName
- D. Organization_id

Answer: B

Explanation:
The requirement when creating portal users through Just-In-Time (JIT) provisioning is A. JIT provisioning is a feature that allows you to create portal users on demand when they log in using an external identity provider, such as Facebook or Google. To use JIT provisioning, you need to have a FederationIdentifier field on the user object, which is a unique identifier that links the portal user with the external identity provider.
The FederationIdentifier field must match the value of the NameID element in the SAML assertion sent by the identity provider.

NEW QUESTION # 98
