### SAP Certified Associate - SAP S/4HANA Cloud Private Edition - Transportation Management Sample Questions (Q27-Q32):

#### NEW QUESTION # 27

Logistics service providers (LSPs or 3PLs) can also receive transportation requirements. For transportation service providers (TSP) and logistics service providers (LSP), forwarding orders are created in one of two ways - manually, using the SAP TM UI, or through integration with an external system via electronic data interchange (EDI).

The following are transportation management triggers:

There are 4 correct answers to this question.

Response:

- A. Purchase orders
- B. Sales orders
- C. Sales order returns
- D. Purchase order returns
- E. locations are stored on root level.

Answer: A,B,C,D

#### NEW QUESTION # 28

Master data can only be created directly in SAP TM. determine whether this statement is true or false.

- A. true
- B. false

Answer: B

#### NEW QUESTION # 29

Which of the following are functions of a consignment order? Note: There are 2 correct answers to this question.

- A. Load planning
- B. Charge calculation
- C. Tendering

- **D. Subcontracting**

**Answer: B,D**

Explanation:

In SAP S/4HANA Transportation Management, a consignment order is a logical grouping document used primarily in logistics service provider (LSP) scenarios to manage communication between shippers and consignees. According to the SAP documentation, its functions include:

- \* Subcontracting (B): Consignment orders can trigger subcontracting processes by assigning transportation tasks to carriers, often through freight orders or bookings.
- \* Charge calculation (D): Consignment orders support charge calculation for customer-facing services, determining the costs to be charged to the consignee or ordering party.

The other options are incorrect:

- \* Tendering (A) is performed at the freight order or freight booking level, not directly by consignment orders.
- \* Load planning (C) is managed in freight orders or the transportation cockpit, not consignment orders.
