NEW QUESTION # 49

Universal Containers (UC) delivers training in 500 different regions. The UC operations users team manages course setup, scheduling, and trainer setup. The team members work at a regional level and report to an operations manager. The operations manager requested access to edit ALL scheduled courses owned by the operation users team.
How should this be achieved?

- A. The operations manager will get access to the scheduled courses by creating an ownership-based sharing rule and share the scheduled courses with the operations manager.
- B. The operations manager will get access to the scheduled courses owned by the operations users team defined in the Role Hierarchy.
- C. The operations manager will get access to the scheduled courses by creating a public group, and add the operations manager and the operations users team to the public group.

Answer: A

NEW QUESTION # 50
Universal Containers (UC) is a fast-growing company that sells containers globally. It has thousands of dealerships throughout the world where local dealers service containers. UC implemented a new Partner Community for its dealers. Each dealership has a dealer manager who manages the service agents. The community sharing model is private.
What is the optimal option to give dealer managers visibility to customer cases only raised by their service agents?

- A. Create a sharing group to share cases created by service agents with their dealer manager.
- B. Use the Role Hierarchy so that the cases raised by service agents will be visible to their relevant dealer managers.
- C. Create a sharing rule to share cases created by service agents with their dealer manager.

Answer: A

NEW QUESTION # 51
Universal Containers uses the standard Case object to track various support requests sent to servicing agents. Currently, the Case object has more than 400 fields. Eight different types of case processes have been established, each with a unique combination of statuses. The Director of Customer Service wants to ensure that servicing agents see only the required information specific to the case type they are addressing.
Which option is recommended to implement this requirement?

- A. Use different Page Layouts per case type, each representing the relevant fields per case type.
- B. Use a custom LWC to override the View action of the Case object, and a Custom Metadata Type to define the relevant fields per case type.
- C. Use Dynamic Forms with different field sections representing the relevant fields per case type, and control visibility of sections by Case Record Type value.

Answer: C

NEW QUESTION # 52
Universal Containers (UC) has a custom Apex class that enforces a business process and updates opportunities. UC has noticed that fields with Field-Level Security permission of Read-Only on certain users' profiles are being updated by this class.
How should the architect fix this problem?

- A. Use the IsUpdateable() Apex method to test each field prior to allowing update.
- B. Put the code in an inner class that uses the With Sharing keyword.
- C. Add the With Sharing keyword to the class.
