

Pass Guaranteed IBM - C1000-173 - IBM Cloud Pak for Data v4.7 Architect High Hit-Rate Test Voucher

P.S. Free 2026 IBM C1000-173 dumps are available on Google Drive shared by PDFVCE: https://drive.google.com/open?id=16mwr_F756wTR_Eacy57jRMMPTDJ82XDL

C1000-173 valid study test give you an in-depth understanding of the contents and help you to make out a detail study plan for C1000-173 preparation. All the questions are edited according to the analysis of data and summarized from the previous test, which can ensure the high hit rate. You just need take the spare time to study C1000-173 Training Material, the effects are obvious. You will get a high score with the help of IBM C1000-173 study pdf.

Taking the IBM Cloud Pak for Data v4.7 Architect C1000-173 test and beginning IBM Cloud Pak for Data v4.7 Architect C1000-173 exam preparation with the suggested C1000-173 exam preparation materials is the best and quickest course of action. You can rely on IBM C1000-173 Exam Questio IBM Cloud Pak for Data v4.7 Architect C1000-173 for thorough C1000-173 exam preparation.

New IBM C1000-173 Test Pdf - C1000-173 Valid Exam Format

The pass rate is 98.65%, and we pass guarantee and money back guarantee if you fail to pass the exam by using C1000-173 learning materials of us. We have a broad market in the world with the high quality of C1000-173 exam dumps, and if you choose us we will help you pass the exam just one time. In addition C1000-173 Training Materials of us also have free update for one year after purchasing. We also have the professional service stuff to answer all questions of you. If you have a try, you will never regret.

IBM Cloud Pak for Data v4.7 Architect Sample Questions (Q71-Q76):

NEW QUESTION # 71

What steps are required for setting up IBM Data Replication for Cloud Pak for Data?

- A. Define source, define target, define replication
- B. Define server, define data management rules, define security rules

- C. Define users, define source, define target
- D. Define server, define target, define security rules

Answer: A

Explanation:

To set up IBM Data Replication in Cloud Pak for Data, administrators must follow a sequence that begins with defining the source (such as a transactional database), then defining the target system (such as a data lake or warehouse), and finally configuring the replication process. This setup allows for near real-time data synchronization. User definitions, server setup, and data management rules are involved elsewhere in the platform but are not the essential steps for replication configuration.

NEW QUESTION # 72

How does watsonx.data provide data sharing between Db2 Warehouse, Netezza, and any other data management solution?

- A. watsonx.data proprietary fast loader
- B. Secure File Transfer Protocol (SFTP)
- C. Iceberg tables
- D. JSON file format

Answer: C

Explanation:

watsonx.data uses Apache Iceberg tables as the open table format for data sharing across platforms like Db2 Warehouse, Netezza, and other compatible data management solutions. Iceberg provides a transactional and schema-evolution-friendly table layer, allowing multiple engines to read and write data concurrently. This approach avoids proprietary loaders or simple file transfers and ensures efficient interoperability between different systems.

NEW QUESTION # 73

How does integrating Security Information and Event Management (SIEM) with other security systems benefit an organization?

- A. It enhances real-time analysis and correlation of security alerts.
- B. It simplifies user password management.
- C. It reduces the need for data encryption.
- D. It decreases the importance of access control.

Answer: A

NEW QUESTION # 74

How do Massively Parallel Processing (MPP) and Symmetric Multiprocessing (SMP) differ in a Db2 environment?

- A. MPP is less suited for complex analytical tasks compared to SMP
- B. MPP requires a shared memory architecture, whereas SMP does not
- C. MPP divides tasks among multiple processors, while SMP uses a single processor
- D. SMP is more scalable than MPP

Answer: C

NEW QUESTION # 75

In the context of Match 360, what is a significant factor for achieving a unified customer view?

- A. Integrating disparate data sources effectively
- B. Disregarding data source reliability
- C. Focusing on a single data format
- D. Avoiding real-time data synchronization

Answer: A
