AZ-500 Fragen Beantworten & AZ-500 Prüfungs-Guide

Wollen Sie den Plan machen, dass Sie Microsoft AZ-500 Zertifizierungsprüfung ablegen, um Ihre Fähigkeit zu entwickeln. Wenn Sie Microsoft AZ-500 Prüfung ablegen, ob Sie die geeigneten Lernhilfe finden? Und welche Unterlage sind wertvoll? Haben Sie Microsoft AZ-500 Dumps gewählt? Wenn ja, sorgen Sie sich bitte nicht um den Misserfolg.

Die Microsoft AZ-500-Zertifizierungsprüfung ist eine hervorragende Gelegenheit für Fachkräfte, die ihre Fähigkeiten und ihr Wissen in Azure Security-Lösungen validieren möchten. Die Zertifizierung verbessert nicht nur die beruflichen Aussichten einer Person, sondern hilft Organisationen auch, Fachkräfte zu identifizieren und einzustellen, die über das Know-how verfügen, um ihre Azure-Umgebungen zu sichern. Angesichts der wachsenden Nachfrage nach Cloud-Sicherheitsfachleuten ist die AZ-500-Zertifizierung eine wertvolle Investition für alle, die eine Karriere in diesem Bereich aufbauen möchten.

Microsoft Azure Security Technologies AZ-500 Prüfungsfragen mit Lösungen (Q187-Q192):

187. Frage

You have an Azure Storage account that contains a blob container named container1 and a client application named App1. You need to enable App1 access to container1 by using Microsoft Entra authentication. What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Antwort:

Begründung:

188. Frage

You have the Azure Information Protection conditions shown in the following table.

You need to identify how Azure Information Protection will label files.

What should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Antwort:

Begründung:

Topic 3, Fabrikam inc

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.

General Overview

Fabrikam, Inc. is a consulting company that has a main office in Montreal and branch offices in Seattle and New York. Fabrikam

has IT, human resources (HR), and finance departments.

Existing Environment

Network Environment

Fabrikam has a Microsoft 365 subscription and an Azure subscription named subscription1.

The network contains an on-premises Active Directory domain named Fabrikam.com. The domain contains two organizational units (OUs) named OU1 and OU2. Azure AD Connect cloud sync syncs only OU1.

The Azure resources hierarchy is shown in the following exhibit.

The Azure Active Directory (Azure AD) tenant contains the users shown in the following table.

Azure AD contains the resources shown in the following table.

Subscription1 Resources

Subscription1 contains the virtual networks shown in the following table.

Subscription1 contains the network security groups (NSGs) shown in the following table.

Subscription1 contains the virtual machines shown in the following table.

Subscription1 contains the Azure key vaults shown in the following table.

Subscription1 contains a storage account named storage1 in the West US Azure region.

Planned Changes and Requirements

Planned Changes

Fabrikam plans to implement the following changes:

* Create two application security groups as shown in the following table.

* Associate the network interface of VM1 to ASG1.

* Deploy SecPoll by using Azure Security Center.

* Deploy a third-party app named App1. A version of App1 exists for all available operating systems.

* Create a resource group named RG2.

* Sync OU2 to Azure AD.

* Add User1 to Group1.

Technical Requirements

Fabrikam identifies the following technical requirements:

* The finance department users must reauthenticate after three hours when they access SharePoint Online.

* Storage1 must be encrypted by using customer-managed keys and automatic key rotation.

* From Sentinel1, you must ensure that the following notebooks can be launched:

* Entity Explorer - Account

* Entity Explorer - Windows Host

* Guided Investigation Process Alerts

* VM1, VM2, and VM3 must be encrypted by using Azure Disk Encryption.

* Just in time (JIT) VM access for VM1, VM2, and VM3 must be enabled.

* App1 must use a secure connection string stored in KeyVault1.

* KeyVault1 traffic must NOT travel over the internet.

190. Frage

You have an Azure key vault.

You need to delegate administrative access to the key vault to meet the following requirements:

* Provide a user named User1 with the ability to set advanced access policies for the key vault.

* Provide a user named User2 with the ability to add and delete certificates in the key vault.

* Use the principle of least privilege.

What should you use to assign access to each user? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Antwort:

Begründung:

Explanation:

User1: RBAC

RBAC is used as the Key Vault access control mechanism for the management plane. It would allow a user with the proper identity to:

* set Key Vault access policies

* create, read, update, and delete key vaults

* set Key Vault tags

Note: Role-based access control (RBAC) is a system that provides fine-grained access management of Azure resources. Using RBAC, you can segregate duties within your team and grant only the amount of access to users that they need to perform their jobs.

User2: A key vault access policy

A key vault access policy is the access control mechanism to get access to the key vault data plane. Key Vault access policies grant permissions separately to keys, secrets, and certificates.

References:

<https://docs.microsoft.com/en-us/azure/key-vault/key-vault-secure-your-key-vault>

191. Frage

You are implementing conditional access policies.

You must evaluate the existing Azure Active Directory (Azure AD) risk events and risk levels to configure and implement the policies.

You need to identify the risk level of the following risk events:

Users with leaked credentials

Impossible travel to atypical locations

Sign-ins from IP addresses with suspicious activity

Which level should you identify for each risk event? To answer, drag the appropriate levels to the correct risk events. Each level may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Antwort:

Begründung:

Explanation:

Azure AD Identity protection can detect six types of suspicious sign-in activities:

Users with leaked credentials

Sign-ins from anonymous IP addresses

Impossible travel to atypical locations

Sign-ins from infected devices

Sign-ins from IP addresses with suspicious activity

Sign-ins from unfamiliar locations

These six types of events are categorized in to 3 levels of risks - High, Medium & Low:
