Reliable EMC D-PDM-DY-23 Exam Testking & Certification D-PDM-DY-23 Dumps

People need to increase their level by getting the EMC D-PDM-DY-23 certification. If you take an example of the present scenario in this competitive world, you will find people struggling to meet their ends just because they are surviving on low-scale salaries. Even if they are thinking about changing their jobs, people who are ready with a better skill set or have prepared themselves with EMC D-PDM-DY-23 Certification grab the chance. This leaves them in the same place where they were.

EMC Dell PowerProtect Data Manager Deploy 2023 Exam Sample Questions (Q73-Q78):

NEW QUESTION # 73

Which three values must be specified in the IPv4 Networking Properties section of the network configuration during the initial deployment of PowerProtect Data Manager?

- A. Network IP Address
- B. DNS
- C. FQDN
- D. Default Gateway
- E. Network Netmask

Answer: A,D,E

NEW QUESTION # 74

What is required in the customized template page during the initial deployment of the OVA in a PowerProtect Data Manager appliance deployment?

Response:

- A. IP, Netmask, Gateway, DNS, and FQDN
- B. FQDN, SRS, IP, Gateway, and Netmask
- C. SMTP, IP, Netmask, Gateway, and DNS
- D. Gateway, IP, FQDN, Netmask, and FTP

Answer: A

NEW QUESTION # 75

What are the primary steps involved in the initial setup of PowerProtect Data Manager?

(Choose two)

Response:

- A. Activating the automated protection engine
- B. Enabling extended reporting features

- C. Setting up initial protection policies
- D. Configuring the system administrator account

Answer: C,D

NEW QUESTION # 76

Which advanced feature should be considered when integrating PowerProtect Data Manager with Kubernetes for stateful applications?

Response:

- A. Pod auto-scaling
- B. Network policy enforcement
- C. Persistent Volume Claims (PVCs)
- D. Container runtime selection

Answer: C

NEW QUESTION # 77

Which two options are available on the Welcome page when accessing the PowerProtect Data Manager UI for the first time?

- A. Authentication
- B. System Settings
- C. New Install
- D. Restore Backup
- E. Software License

Answer: C,D

Explanation:

When a Dell PowerProtect Data Manager appliance is deployed for the first time, it starts in an unconfigured state. Upon navigating to the UI via a web browser, the administrator is presented with a simplified "Welcome" portal. This portal is designed to provide two distinct paths for getting the management plane operational:

* New Install (E): This option (often labeled as Configure in the UI) initiates the setup wizard. This process allows the administrator to define the system's hostname, network settings (IP, DNS, Gateway), time synchronization (NTP), and the initial administrative passwords.

* Restore Backup (A): Formally known as Restore from Disaster Recovery Backup, this option is utilized in a recovery scenario. If the previous PPDM instance was lost, the administrator can deploy a fresh OVA and use this option to point to existing metadata stored on a PowerProtect DD. This restores all protection policies, asset information, and historical data.

Options like Software License, Authentication, and System Settings are secondary configuration steps that occur after the initial "New Install" or "Restore" process has been completed.

NEW QUESTION # 78

.....

When we started offering EMC D-PDM-DY-23 exam questions and answers and exam simulator, we did not think that we will get such a big reputation. What we are doing now is incredible form of a guarantee. Exam4PDF guarantee passing rate of 100%, you use your EMC D-PDM-DY-23 Exam to try our EMC D-PDM-DY-23 training products, this is correct, we can guarantee your success.
