

Valid Valid FCSS_ADA_AR-6.7 Test Pass4sure - How to Download for Fortinet FCSS_ADA_AR-6.7 Premium Exam

FCSS_ADA_AR-6.7 Exam Details	
Vendor	Fortinet
Exam Code	FCSS_ADA_AR-6.7
Full Exam Name	Fortinet FCSS - Advanced Analytics 6.7 Architect
Number of Questions	35
Sample Questions	Fortinet FCSS_ADA_AR-6.7 Sample Questions
Practice Exams	Fortinet Certified Solution Specialist - Security Operations Practice Test
Passing Score	Pass / Fail
Time Limit	60 minutes
Languages	English

We offer you free update for one year after you purchase FCSS_ADA_AR-6.7 study guide from us, namely, in the following year, you can get the update version for free. And our system will automatically send the latest version to your email address. Moreover, FCSS_ADA_AR-6.7 exam dumps of us are compiled by experienced experts of the field, and they are quite familiar with dynamics of the exam center, therefore the quality and accuracy of the FCSS_ADA_AR-6.7 Study Guide can be guaranteed. You just need to choose us, and we will help you pass the exam successfully.

Fortinet FCSS_ADA_AR-6.7 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">FortiSIEM Rules and Analytics: This section evaluates the expertise of Security Analysts and Automation Engineers in configuring FortiSIEM rules and analytics. It includes constructing security rules based on event patterns, leveraging MITRE ATT&CK® frameworks, and configuring advanced nested queries and lookup tables for complex threat detection and correlation.
Topic 2	<ul style="list-style-type: none">Conditions and Remediation: This section measures the skills of Incident Responders and SOAR Specialists in remediating security incidents. It includes configuring manual and automated remediation workflows, integrating FortiSOAR with FortiSIEM for streamlined incident resolution, and deploying scripts to address threats while maintaining compliance
Topic 3	<ul style="list-style-type: none">FortiSIEM Baseline and UEBA: This section tests the knowledge of Compliance Officers and Threat Analysts in implementing baseline profiles and User and Entity Behavior Analytics (UEBA). It covers creating baseline reports, configuring UEBA agents, and analyzing log-based behavioral patterns to detect anomalies and insider threats.
Topic 4	<ul style="list-style-type: none">Multi-Tenancy SOC Solution for MSSP: This section of the exam measures the skills of MSSP Architects and SOC Engineers in designing and deploying multi-tenant Security Operations Center (SOC) environments using FortiSIEM. It covers defining collectors and agents, deploying FortiSIEM in hybrid setups, managing resource allocation, and installingmanaging Windows and Linux agents for scalable event monitoring in multi-tenant architectures.

FCSS_ADA_AR-6.7 Premium Exam, Reliable FCSS_ADA_AR-6.7 Dumps Book

More qualified certification for our future employment has the effect to be reckoned with, only to have enough qualification FCSS_ADA_AR-6.7 certifications to prove their ability, can we get over rivals in the social competition. Many candidates be defeated by the difficulty of the FCSS_ADA_AR-6.7 exam, but if you can know about our FCSS_ADA_AR-6.7 Exam Materials, you will overcome the difficulty easily. If you want to buy our FCSS_ADA_AR-6.7 exam questions please look at the features and the functions of our product on the web or try the free demo of our FCSS_ADA_AR-6.7 exam questions.

Fortinet FCSS—Advanced Analytics 6.7 Architect Sample Questions (Q21-Q26):

NEW QUESTION # 21

Refer to the exhibit.

If the Z-score for this rule is greater than or equal to three, what does this mean?

- A. The rate of firewall connection is below historical average value.
- B. The rate of firewall connection is above the current average value.
- C. The rate of firewall connection is optimum.
- D. The rate firewall connection is above the historical average value.

Answer: D

Explanation:

The Z-score formula in the expression builder calculates how many standard deviations the current value is from the historical average. The formula used is:

$$Z = \frac{\text{AVG(Firewall Session)} - \text{STAT_AVG(AVG(Firewall Session);112)}}{\text{STAT_STDDEV(AVG(Firewall Session);112)}}$$

AVG(Firewall Session) represents the current firewall session rate.

STAT_AVG(AVG(Firewall Session);112) represents the historical average over a 112-time unit window.

STAT_STDDEV(AVG(Firewall Session);112) represents the historical standard deviation over the same period.

A Z-score # 3 indicates that the current firewall session rate is significantly higher than the historical average (3 standard deviations above the mean), signaling anomaly.

NEW QUESTION # 22

What are the modes of Data Ingestion on FortiSOAR? (Choose three.)

- A. Schedule based
- B. Rule based
- C. Policy based
- D. Notification based
- E. App Push

Answer: A,B,E

Explanation:

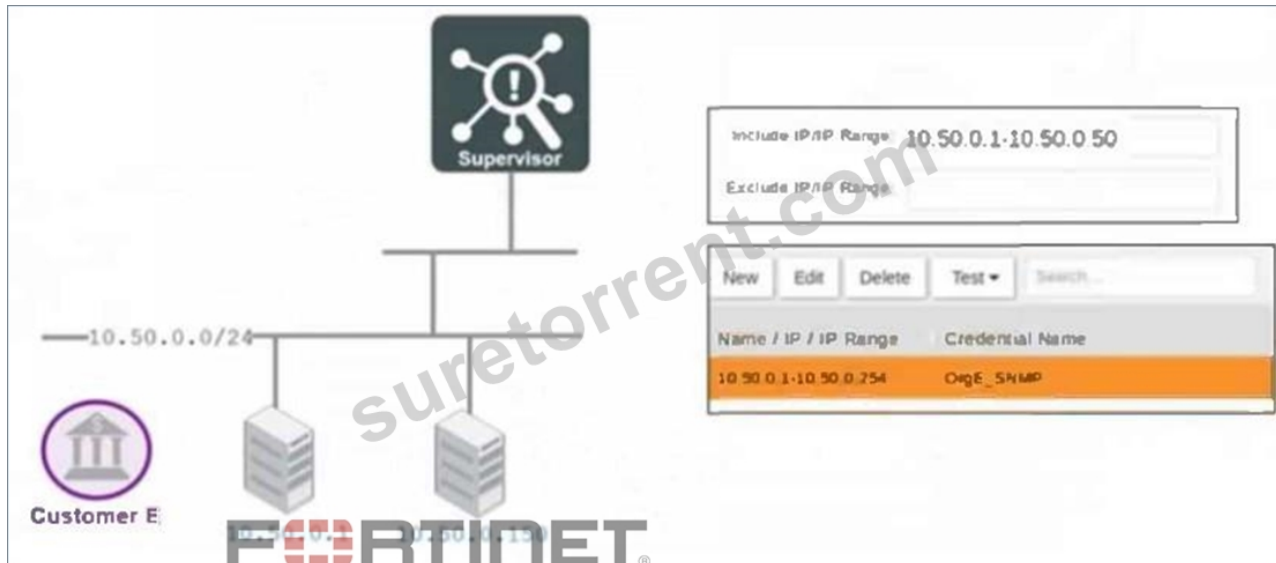

FortiSOAR supports multiple data ingestion modes to allow efficient data collection and automation. The three primary modes are:

1. Rule-Based
2. App Push

3. Schedule-Based

NEW QUESTION # 23

Refer to the exhibit.

Which devices will be added to the CMDB and mapped to Customer E?

- A. 10.60.0.1
- B. 10.50.0.1
- C. 10.50.0.149
- D. 10.50.0.150

Answer: B,C

Explanation:

From the exhibit, we can determine the IP range that will be added to the CMDB and mapped to Customer E.

*The included IP range is 10.50.0.1 - 10.50.0.50.

*This means any device within this range (10.50.0.1 to 10.50.0.50) will be added to the CMDB.

10.50.0.1 → Falls within the included range (10.50.0.1 - 10.50.0.50) → Added to CMDB.

10.50.0.149 → Falls within the 10.50.0.1 - 10.50.0.50 range → Added to CMDB.

NEW QUESTION # 24

When constructing FortiSIEM baseline rules, what would be an effective approach?

- A. Designing rules based on observed and expected network behaviors?
- B. Relying solely on machine learning without human input?
- C. Including as many rules as possible for diversity?
- D. Copying rules from other organizations for best practices?

Answer: A

NEW QUESTION # 25

In the context of a multi-tenancy SOC solution, what role do collectors play?

- A. Gather logs and data from multiple sources.
- B. Act as a firewall to prevent unauthorized access.
- C. Store backup data for recovery.
- D. Update the software on client machines.

Answer: A
