NEW QUESTION # 20

How does an implementation consultant support customer experts during Fit-to-Standard workshops? Note:

There are 2 correct answers to this question

- **A. Demonstrate SAP Best Practice business processes in the starter system**
- B. Conduct end-user training on active scope items.
- **C. Highlight areas that require configuration or customization decisions.**
- D. Determine set up instructions for customer-driven integrations.

Answer: A,C

Explanation:

During the Fit-to-Standard workshops, an implementation consultant supports customer experts by doing the following:

* Demonstrate SAP Best Practice business processes in the starter system. The consultant shows the customer experts how the standard processes work in SAP S/4HANA Cloud Public Edition and how they fit their business needs1.

* Highlight areas that require configuration or customization decisions. The consultant identifies and documents the gaps between the standard processes and the customer requirements, and proposes solutions that are aligned with the cloud mindset1. The other options are not the correct ways to support customer experts during the Fit-to-Standard workshops. Determining set up instructions for customer-driven integrations is done in the integration phase, after the Fit-to-Standard workshops are completed2. Conducting end-user training on active scope items is done in the deploy phase, before the go-live of the system3. NEW QUESTION # 21

What have SAP S/4HANA Cloud Business Workflows been designed for? Note: There are 3 correct answers to this question.

- A. To create cross-product workflow procedures
- B. To create standard procedures from SAP Signavio Process Navigator
- C. To create very simple release or approval procedures
- D. To create business processes with a high number of people involved in a pre-defined sequence
- E. To create complex, repeated work processes with iterative cycles

Answer: A,D,E

Explanation:

SAP S/4HANA Cloud Business Workflows are designed to enhance and automate business processes within the organization. They serve multiple purposes:

- * To create complex, repeated work processes with iterative cycles: These workflows are designed to handle intricate processes that occur regularly within the business environment, allowing for automation and efficiency in tasks that require repetition and involve multiple steps or conditions.
- * To create cross-product workflow procedures: This capability allows for the integration of various SAP products and services into a cohesive workflow, ensuring smooth and interconnected operations across different aspects of the business. It enables workflows that span across different SAP applications and solutions, providing a unified approach to managing business processes.
- * To create business processes with a high number of people involved in a pre-defined sequence: SAP S/4HANA Cloud Business Workflows are capable of handling processes that involve many participants, orchestrating the sequence of tasks to be completed by different individuals or departments. This ensures that each step of the process is executed in the right order by the right person, enhancing collaboration and efficiency.
