What are some characteristics of public cloud? Note: There are 2 correct answers to this question.

- A. Multi-tenant server
- B. Perpetual license
- C. Lower total cost of ownership
- D. Software installation on customer site

Answer: A,C

Explanation:
Public cloud solutions have distinct characteristics that differentiate them from on-premise or private cloud deployments. Below is an explanation of the correct answers:

* By defining a workflow using flexible workflows (B):While flexible workflows can be configured for notifications, they require more setup and are less suited for real-time monitoring compared to the Situation Handling Framework.
* By developing an application using APIs to send notifications (C):Developing a custom application is time-consuming and unnecessary when standard tools like the Situation Handling Framework are available.
