In order to protect the vital interests of each IT certification exams candidate, Exam4Free provides high-quality Juniper JN0-460 Exam Training materials. This exam material is specially developed according to the needs of the candidates. It is researched by the IT experts of Exam4Free. Their struggle is not just to help you pass the exam, but also in order to let you have a better tomorrow.

We learned that a majority of the candidates for the exam are office workers or students who are occupied with a lot of things, and do not have plenty of time to prepare for the JN0-460 exam. Taking this into consideration, we have tried to improve the quality of our JN0-460 training materials for all our worth. Now, I am proud to tell you that our JN0-460 Exam Questions are definitely the best choice for those who have been yearning for success but without enough time to put into it. Just buy them and you will pass the exam by your first attempt!

## 2026 Reliable JN0-460 Exam Bootcamp | Latest Real JN0-460 Exams: Mist AI Wired, Specialist (JNCIS-MistAI-Wired) 100% Pass

There is no exaggeration that you can be confident about your coming exam just after studying with our JN0-460 preparation materials for 20 to 30 hours. Tens of thousands of our customers have benefited from our exam materials and passed their JN0-460 exams with ease. The data showed that our high pass rate is unbelievably 98% to 100%. Without doubt, your success is 100%

guaranteed with our JN0-460 training guide. You will be quite surprised by the convenience to have an overview just by clicking into the link, and you can experience all kinds of JN0-460 versions.

## Juniper JN0-460 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Wired Assurance Provisioning or Deployment: This section of the exam measures the skills of Network Deployment Specialists and focuses on the provisioning and deployment processes of Wired Assurance. It includes the essential steps and options involved in setting up networks, from configuration templates to deployment methodologies. Candidates learn about provisioning procedures, supported architectures, and the use of site variables to streamline automation and consistency across wired infrastructures.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Wired Assurance Management or Operations: This section of the exam measures the skills of Network Operations Engineers and focuses on the management and operational aspects of Wired Assurance. It covers switch management, port profiles, and dynamic port configuration to ensure optimal network performance. The section also explores service-level expectations, client insights, and the use of APIs for improved monitoring and automation. Candidates gain an understanding of how MistAI enables proactive management and predictive troubleshooting to maintain service quality.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Campus Fabric Architecture: This section of the exam measures the skills of Network Design Engineers and focuses on understanding and deploying Campus Fabric Architectures. It introduces essential design concepts such as EVPN multihoming, IP Clos architecture, and micro-segmentation. The section also compares CRB and ERB models, explains scaling requirements, and highlights how the Campus Fabric Core-Distribution design supports high-performance, scalable, and secure enterprise networks.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Campus EVPN-VXLAN: This section of the exam measures the skills of Data Center Network Engineers and explores the key principles of VXLAN and EVPN technologies. Candidates learn about Layer 2 tunneling, data and control plane operations, and the functions of VTEPs and VXLAN gateways. Additionally, it covers advanced EVPN concepts such as multipath routing, route types, and identifiers. The section concludes with a focus on MAC learning and policy applications to ensure efficient, scalable, and resilient network fabrics.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>Wired Assurance Fundamentals: This section of the exam measures the skills of Network Support Engineers and covers the foundational elements of Wired Assurance within the MistAI ecosystem. It introduces candidates to key concepts such as supported devices, solution architecture, and the main features and components that define Wired Assurance functionality. Additionally, it highlights how MistAI accounts, analytics, and subscriptions integrate to deliver intelligent insights for network performance and operations.</li> </ul>

## Juniper Mist AI Wired, Specialist (JNCIS-MistAI-Wired) Sample Questions (Q20-Q25):

### NEW QUESTION # 20

Which of the following are true regarding the data and control plane operations in EVPN-VXLAN?  
(Select two)

- A. VXLAN relies solely on OSPF for data plane learning
- B. EVPN provides a control plane for VXLAN to learn MAC addresses
- C. EVPN allows for the separation of underlay and overlay networks
- D. VXLAN uses BGP to encapsulate data packets

**Answer: B,C**

### NEW QUESTION # 21

Which list of SLEs are provided in the Mist Wired Assurance subscription?

- A. Tunnel Health, Throughput, Peering Statistics
- B. Transferred Bytes and Received Bytes
- C. Throughput, Jitter, Loss, and Latency
- D. Throughput, Switch Health, and Successful Connects

**Answer: D**

#### NEW QUESTION # 22

Under which hierarchy level would you create a new site configuration?

- A. clients
- B. access points
- C. organization
- D. location

**Answer: D**

Explanation:

In Mist, sites represent the physical or logical grouping of devices within an organization.

You create and manage a site configuration under the Location hierarchy in the Mist UI.

Each site inherits organization-level settings but can override or customize specific configurations such as VLANs, templates, or switch settings.

#### NEW QUESTION # 23

What is the purpose of Ethernet Segment Identifiers (ESI) in EVPN?

- A. To identify unique Layer 2 segments across the EVPN-VXLAN network
- B. To serve as the primary routing protocol
- C. To encrypt data traffic across the network
- D. To decrease the network's operational complexity

**Answer: A**

#### NEW QUESTION # 24

Which API is used within the Juniper Mist solution?

- A. RPC
- B. REST
- C. JSON
- D. SOAP

**Answer: B**

Explanation:

Juniper Mist Cloud uses an open RESTful API framework for integration, automation, and programmability across all Mist services, including Wired Assurance, Marvis, and AI-driven automation.

"All Mist Cloud services are built on a 100% open REST API framework, allowing customers to automate configuration, monitoring, and troubleshooting through standard REST calls." The REST API exchanges data in JSON format, but the API type itself is REST, not JSON.

Option A (REST): Correct - Mist services expose 100% REST-based APIs.

Option B (SOAP): Incorrect - SOAP is an older XML-based protocol not used in Mist.

Option C (JSON): Incorrect - JSON is the data format, not the API type.

Option D (RPC): Incorrect - not used in the Mist Cloud architecture.
