

2026 100% Free 300-710—Accurate 100% Free Answers Real Questions | 300-710 Reliable Test Braindumps

P.S. Free 2026 Cisco 300-710 dumps are available on Google Drive shared by Prep4pass: <https://drive.google.com/open?id=1yZKLMqKHZOQMT8MbQ-qpOgCHG18GfCmT>

Customers of Prep4pass will also receive updates for 1 year after purchase. A lot of students have prepared from the for the Securing Networks with Cisco Firepower (300-710) certification test and passed it in a single try. They have rated the Securing Networks with Cisco Firepower (300-710) as one of the best in the market to prepare for the 300-710 exam it in minimum time. Try a free demo now and start your journey towards your dream certification!

Cisco Firepower NGFW is a powerful and advanced security solution that provides comprehensive threat protection for network infrastructures. The Cisco 300-710 certification exam covers the latest Cisco Firepower NGFW features, including access control policies, network analysis policies, and intrusion policies. Candidates will also learn how to configure advanced security features, such as VPNs, SSL decryption, and advanced malware protection.

Cisco 300-710 exam is designed to test one's knowledge and skills in securing networks with Cisco Firepower. 300-710 exam is intended for network security engineers and administrators who are responsible for implementing and managing network security policies and procedures using Cisco Firepower Next-Generation Firewall (NGFW), Intrusion Prevention System (IPS), and Advanced Malware Protection (AMP) technologies.

Cisco 300-710 (Securing Networks with Cisco Firepower) Exam is a certification exam that is designed to test the knowledge and skills of the IT professionals who are responsible for securing the networks using the Cisco Firepower technologies. 300-710 exam is intended to validate the candidates' expertise in implementing and configuring Cisco Firepower technologies to provide advanced security services to the networks. 300-710 exam measures the candidates' ability to understand the Cisco Firepower technologies

and their capabilities, along with their ability to identify and mitigate security threats using these technologies.

Use Real Cisco 300-710 PDF Questions [2026] - 100% Guaranteed Success

There are three versions of our 300-710 study questions on our website: the PDF, Software and APP online. And our online test engine and the windows software of the 300-710 guide materials are designed more carefully. During our researching and developing, we always obey the principles of conciseness and exquisiteness. All pages of the 300-710 Exam simulation are simple and beautiful. As long as you click on them, you can find the information easily and fast.

Cisco Securing Networks with Cisco Firepower Sample Questions (Q180-Q185):

NEW QUESTION # 180

An engineer needs to configure remote storage on Cisco FMC. Configuration backups must be available from a secure location on the network for disaster recovery. Reports need to back up to a shared location that auditors can access with their Active Directory logins. Which strategy must the engineer use to meet these objectives?

- A. Use SMB for backups and NFS for reports.
- B. Use SSH for backups and NFS for reports.
- C. Use NFS for both backups and reports.
- D. Use SMB for both backups and reports.

Answer: D

Explanation:

https://www.cisco.com/c/en/us/td/docs/security/firepower/640/configuration/guide/fpmc-config-guide-v64/system_configuration.html#ID-2241-00000551

"You cannot send backups to one remote system and reports to another, but you can choose to send either to a remote system and store the other on the Firepower Management Center."

NEW QUESTION # 181

A security engineer manages a firewall console and an endpoint console and finds it challenging and time consuming to review events and modify blocking of specific files in both consoles. Which action must the engineer take to streamline this process?

- A. Within the Cisco Secure Endpoint console, copy the connector GUID and paste into the Cisco Secure Firewall Management Center (FMC) AMP tab.
- B. **Initiate the integration between FMC and Cisco Secure Endpoint from the Secure FMC using the AMP tab.**
- C. From the Cisco Secure Endpoint console, create and copy an API key and paste into the Cisco Secure AMP tab.
- D. From the Secure FMC, create a Cisco Secure Endpoint object and reference the object in the Cisco Secure Endpoint console.

Answer: B

Explanation:

To streamline the process of reviewing events and modifying blocking of specific files across both the firewall console and the endpoint console, the security engineer should initiate the integration between Secure FMC and Cisco Secure Endpoint (formerly AMP for Endpoints) from the Secure FMC using the AMP tab.

Steps:

In the FMC, navigate to Devices > Device Management.

Select the device and go to the AMP tab.

Initiate the integration by configuring the necessary API credentials and linking the FMC to the Cisco Secure Endpoint console. This integration allows the security engineer to view endpoint events and apply blocking actions directly from the FMC, consolidating the management tasks. This approach simplifies the workflow by providing a single interface to manage both network and endpoint security, reducing the time and effort required to maintain security across the organization.

NEW QUESTION # 182

Network traffic coming from an organization's CEO must never be denied. Which access control policy configuration option should be used if the deployment engineer is not permitted to create a rule to allow all traffic?

- A. Configure firewall bypass.
- B. Create a NAT policy just for the CEO.
- C. Change the intrusion policy from security to balance.
- D. **Configure a trust policy for the CEO.**

Answer: D

NEW QUESTION # 183

Which two conditions are necessary for high availability to function between two Cisco FTD devices? (Choose two.)

- A. The units must be different models if they are part of the same series.
- B. **The units must be the same model.**
- C. Both devices can be part of a different group that must be in the same domain when configured within the FMC.
- D. **The units must be the same version**
- E. The units must be configured only for firewall routed mode.

Answer: B,D

Explanation:

Reference:

<https://www.cisco.com/c/en/us/support/docs/security/firepower-management-center/212699- configure-ftd-high-availability-on-firep.html>

NEW QUESTION # 184

Which component is needed to perform rapid threat containment with Cisco FMC?

- A. DDI
- B. **ISE**
- C. RESTful API
- D. SIEM

Answer: B

Explanation:

To perform rapid threat containment with Cisco FMC, the necessary component is Cisco Identity Services Engine (ISE). ISE integrates with FMC to provide dynamic network access control and enforcement, allowing for quick isolation of compromised endpoints based on security events detected by FMC.

Steps:

Integrate FMC with ISE by configuring the necessary settings in both platforms.

Define security policies in FMC that trigger rapid threat containment actions via ISE.

When a threat is detected, FMC can instruct ISE to isolate the affected endpoint, limiting its access to the network.

This integration enables automated and efficient threat containment, reducing the response time and mitigating the impact of security incidents.

NEW QUESTION # 185

.....

Are you still worried about low wages? Are you still anxious to get a good job? Are you still anxious about how to get a 300-710 certificate? If yes, our 300-710 study materials will be the good choice for you. If you have our 300-710 study materials, I believe you difficulties will be solved, and you will have a better life. And 300-710 real test has a high quality as well as a high pass rate of 99% to 100%. What is more, 300-710 test prep provides free trial downloading before your purchasing.
