

# Braindump NetSec-Pro Pdf, Latest NetSec-Pro Test Report

What's more, part of that TestkingPDF NetSec-Pro dumps now are free: [https://drive.google.com/open?id=1QnXla1\\_CLwPJZYOE4uYhKr7YPu0YZNoE](https://drive.google.com/open?id=1QnXla1_CLwPJZYOE4uYhKr7YPu0YZNoE)

To make your success a certainty, TestkingPDF offers free updates on our Palo Alto Networks NetSec-Pro real dumps for up to three months. It means all users get the latest and updated Palo Alto Networks NetSec-Pro practice material to clear the Palo Alto Networks Network Security Professional NetSec-Pro certification test on the first try. We are a genuine brand working to smoothen up your NetSec-Pro exam preparation. TestkingPDF allows all visitors to try a free demo of NetSec-Pro pdf questions and practice tests to assess the quality of our NetSec-Pro Study Material. Your money is 100% secure as we will ensure that you crack the Palo Alto Networks NetSec-Pro test on the first attempt. You will also enjoy 24/7 efficient support from our customer support team before and after the purchase of Palo Alto Networks NetSec-Pro exam dumps. If you face any issues while using our NetSec-Pro PDF dumps or NetSec-Pro practice exam software (desktop and web-based), contact TestkingPDF customer service for guidance.

## Palo Alto Networks NetSec-Pro Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Infrastructure Management and CDSS: This section tests the abilities of security operations specialists and infrastructure managers in maintaining and configuring Cloud-Delivered Security Services (CDSS) including security policies, profiles, and updates. It includes managing IoT security with device IDs and monitoring, as well as Enterprise Data Loss Prevention and SaaS Security focusing on data encryption, access control, and logging. It also covers maintenance and configuration of Strata Cloud Manager and Panorama for network security environments including supported products, device addition, reporting, and configuration management.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>NGFW and SASE Solution Functionality: This part assesses the knowledge of firewall administrators and network architects on the functions of various Palo Alto Networks firewalls including Cloud NGFWs, PA-Series, CN-Series, and VM-Series. It covers perimeter and core security, zone security and segmentation, high availability, security and NAT policy implementation, as well as monitoring and logging. Additionally, it includes the functionality of Prisma SD-WAN with WAN optimization, path and NAT policies, zone-based firewall, and monitoring, plus Prisma Access features such as remote user and network configuration, application access, policy enforcement, and logging. It also evaluates options for managing Strata and SASE solutions through Panorama and Strata Cloud Manager.</li></ul>

Topic 3	<ul style="list-style-type: none"> <li>• GFW and SASE Solution Maintenance and Configuration: This domain evaluates the skills of network security administrators in maintaining and configuring Palo Alto Networks hardware firewalls, VM-Series, CN-Series, and Cloud NGFWs. It includes managing security policies, profiles, updates, and upgrades. It also covers adding, configuring, and maintaining Prisma SD-WAN including initial setup, pathing, monitoring, and logging. Maintaining and configuring Prisma Access with security policies, profiles, updates, upgrades, and monitoring is also assessed.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• Connectivity and Security: This part measures the skills of network engineers and security analysts in maintaining and configuring network security across on-premises, cloud, and hybrid environments. It covers network segmentation, security and network policies, monitoring, logging, and certificate management. It also includes maintaining connectivity and security for remote users through remote access solutions, network segmentation, security policy tuning, monitoring, logging, and certificate usage to ensure secure and reliable remote connections.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• Platform Solutions, Services, and Tools: This section measures the expertise of security engineers and platform administrators in Palo Alto Networks NGFW and Prisma SASE products. It involves creating security and NAT policies, configuring Cloud-Delivered Security Services (CDSS) such as security profiles, User-ID and App-ID, decryption, and monitoring. It also covers the application of CDSS for IoT security, Enterprise Data Loss Prevention, SaaS Security, SD-WAN, GlobalProtect, Advanced WildFire, Threat Prevention, URL Filtering, and DNS security. Furthermore, it includes aligning AIOps with best practices through administration, dashboards, and Best Practice Assessments.</li> </ul>

## Easily Accessible Palo Alto Networks NetSec-Pro PDF

Knowledge makes prominent contributions to human civilization and progress. In the 21st century, the rate of unemployment is increasing greatly. Many jobs are replaced by intelligent machines. You must learn practical knowledge such as our NetSec-Pro actual test guide, which cannot be substituted by artificial intelligence. In addition, you do not need to purchase other reference books. Our NetSec-Pro Exam Questions are able to solve all your problems of preparing the exam. Of course, our study materials are able to shorten your learning time. You will have more spare time to do other things. And we can ensure you to pass the NetSec-Pro exam.

## Palo Alto Networks Network Security Professional Sample Questions (Q52-Q57):

### NEW QUESTION # 52

Which two features can a network administrator use to troubleshoot the issue of a Prisma Access mobile user who is unable to access SaaS applications? (Choose two.)

- A. Capacity Analyzer
- B. Autonomous Digital Experience Manager (ADEM) console
- C. SaaS Application Risk Portal
- D. GlobalProtect logs

**Answer: B,D**

Explanation:

GlobalProtect logs

These logs provide detailed insights into the user's connectivity, tunnel status, and authentication events.

"GlobalProtect logs include detailed information about connection establishment, tunnel negotiation, and any errors that can prevent mobile users from accessing applications." (Source: GlobalProtect Troubleshooting) Autonomous Digital Experience Management (ADEM) ADEM helps visualize end-to-end performance and identifies network issues affecting SaaS app access for mobile users. "ADEM provides real-time and historical visibility into user experience, enabling quick identification and resolution of connectivity or performance issues for SaaS applications." (Source: ADEM for Prisma Access)

### NEW QUESTION # 53

A network engineer pushes specific Panorama reports of new AI URL category types to branch NGFWs. Which two report types achieve this goal? (Choose two.)

- A. Custom
- B. PDF summary
- C. SNMP
- D. CSV export

**Answer: A,B**

Explanation:

Panorama allows engineers to create custom reports and generate PDF summary formats for consistent reporting across NGFWs. Custom Reports

"Custom Reports provide tailored reporting based on URL categories, application usage, and threat visibility.

They are generated within Panorama and can include data on newly categorized AI URL types." (Source: Panorama Reports) PDF Summaries

"You can generate PDF summary reports to distribute these insights across branch firewalls, providing an easy-to-read format for compliance and operational review." (Source: Export Reports as PDF) Together, these options provide a consistent, standardized method to push insights about AI-based URL categories to branch devices.

### NEW QUESTION # 54

A network security engineer needs to implement segmentation but is under strict compliance requirements to place security enforcement as close as possible to the private applications hosted in Azure. Which deployment style is valid and meets the requirements in this scenario?

- A. On a PA-Series NGFW, configure several Layer 2 zones with Layer 2 interfaces assigned to logically segment the network.
- B. On a VM-Series NGFW, configure several Layer 2 zones with Layer 2 interfaces assigned to logically segment the network.
- C. On a PA-Series NGFW, configure several Layer 3 zones with Layer 3 interfaces assigned to logically segment the network.
- D. On a VM-Series NGFW, configure several Layer 3 zones with Layer 3 interfaces assigned to logically segment the network.

**Answer: D**

Explanation:

In cloud environments like Azure, the VM-Series NGFW is deployed to create Layer 3 segmentation zones closest to the application workloads.

"In Azure, deploy VM-Series firewalls in Layer 3 mode to enforce security policies closest to private applications, meeting strict compliance and segmentation requirements." (Source: VM-Series in Public Clouds) Layer 3 segmentation ensures security policies are enforced at the right boundary to isolate traffic within Azure's virtual networks.

### NEW QUESTION # 55

Which action is only taken during slow path in the NGFW policy?

- A. Layer 2-Layer 4 firewall processing
- B. SSL/TLS decryption
- C. Session lookup
- D. Security policy lookup

**Answer: B**

Explanation:

In Palo Alto Networks' Single-Pass Parallel Processing (SP3) architecture, SSL/TLS decryption occurs only during the slow path when the firewall first encounters a new session.

"SSL/TLS decryption, which requires CPU-intensive cryptographic operations, is performed during the slow path when establishing new sessions. Once decrypted, traffic is processed in the fast path for subsequent packets." (Source: Packet Flow and SP3

Architecture) After the initial decryption in the slow path, decrypted traffic is handled by fast path for efficiency.

### NEW QUESTION # 56

What are two recommendations to ensure secure and efficient connectivity across multiple locations in a distributed enterprise network? (Choose two.)

- A. Create broad VPN policies for contractors working at branch locations.
- B. Use Prisma Access to provide secure remote access for branch users.
- C. Implement a flat network design for simplified network management and reduced overhead.
- D. Employ centralized management and consistent policy enforcement across all locations.

**Answer: B,D**

Explanation:

Prisma Access for secure remote access

"Prisma Access extends consistent security and optimized connectivity to branch locations, enabling secure access for mobile and branch users." (Source: Prisma Access Overview) Centralized management for consistent policy enforcement

"Centralized management using Strata Cloud Manager or Panorama ensures security policies and updates are uniformly applied across distributed locations, preventing policy drift and security gaps." (Source: Strata Cloud Manager Best Practices) These two practices are foundational for modern, distributed enterprise networks to maintain security posture and performance.

### NEW QUESTION # 57

.....

In order to help customers solve problems, our company always insist on putting them first and providing valued service. We deeply believe that our NetSec-Pro question torrent will help you pass the exam and get your certification successfully in a short time.

Maybe you cannot wait to understand our NetSec-Pro Guide questions; we can promise that our products have a higher quality when compared with other study materials. At the moment you can free download the demo of our NetSec-Pro guide torrents, and I can make a bet that you will be fond of our NetSec-Pro exam questions if you understand it.
