Reliable 1Z0-1061-24 Test Question & 1Z0-1061-24 New APP Simulations

Our 1Z0-1061-24 practice materials are prepared for the diligent people craving for success. Almost all people pursuit a promising career, the reality is not everyone acts quickly and persistently. That is the reason why success belongs to few people. Once you try our 1Z0-1061-24 exam test, you will be motivated greatly and begin to make changes. Our study questions always update frequently to guarantee that you can get enough test banks and follow the trend in the theory and the practice. That is to say, our product boosts many advantages and to gain a better understanding of our 1Z0-1061-24 question torrent.

Oracle CX Sales 2024 Implementation Professional Sample Questions (Q89-Q94):

NEW QUESTION # 89

Which feature allows you to load data into Oracle Profitability and Cost Management Cloud Service?

- A. Data Transfer
- **B. Data Integration**
- C. Data Transfer
- D. Data Import

Answer: B

Explanation:

Option 1: Correct. Data Integration is the feature in Oracle Profitability and Cost Management Cloud Service that allows you to load data from various sources. Option 2: Incorrect. Data Transfer is not a feature in Oracle Profitability and Cost Management Cloud Service that allows you to load data. Option 3: Incorrect. Data Loading is not a feature in Oracle Profitability and Cost Management Cloud Service that allows you to load data. Option 4: Incorrect. Data Import is not a feature in Oracle Profitability and Cost Management Cloud Service that allows you to load data.

NEW QUESTION # 90

When setting up models and rules in Oracle Profitability and Cost Management Cloud Service 2023, what is the recommended approach for defining allocation rules?

- A. Using the simplified user interface to create allocation rules and assign them directly to the model
- B. Writing custom scripts in SQL to define allocation rules and deploying them to the model
- C. Utilizing the smart allocation feature to automatically generate allocation rules based on predefined parameters
- **D. Using pre-built templates provided by Oracle to define allocation rules**

Answer: D

Explanation:

Option 1: Incorrect. Using the simplified user interface may not provide the flexibility and customization needed to define complex allocation rules. Option 2: Incorrect. While writing custom scripts in SQL can be powerful and flexible, it may require specialized skills and additional maintenance. Option 3: Correct. Using pre-built templates provided by Oracle can streamline the allocation rule definition process and ensure adherence to best practices. Option 4: Incorrect. The smart allocation feature does not exist in Oracle Profitability and Cost Management Cloud Service 202.

NEW QUESTION # 91

Which of the following statements best describes how to configure security in Oracle Profitability and Cost Management Cloud Service 2023?

- A. Define users and roles in the Domain Security Console, grant the required permissions to roles and apply them to users via Public Saved Connections.
- **B. Define users and roles in the Embedded LDAP directory, grant the required permissions to roles and apply them to users via User Preferences.**
- C. Define users and roles in the Microsoft Active Directory, grant the required permissions to roles and apply them to users via Shared Services.
- D. Define users and roles in the Oracle Identity Manager, grant the required permissions to roles

Answer: B

Explanation:

Option 1: This option is the correct answer as this is the recommended and most common approach to configuring security in Oracle Profitability and Cost Management Cloud Service. Users and roles are defined in the Embedded LDAP directory, permissions are granted to roles and subsequently, roles are applied to users via User Preferences. Option 2: This option is incorrect as it refers to Microsoft Active Directory, which is not supported by Oracle Profitability and Cost Management Cloud Service. Option 3: This option is incorrect as the Domain Security Console is not used to configure security in Oracle Profitability and Cost Management Cloud Service. Option 4: This option is incorrect as Oracle Identity Manager is not used to configure security in Oracle Profitability

and Cost Management Cloud Service.

NEW QUESTION # 92

What is the purpose of the Sandbox environment in Oracle Profitability and Cost Management Cloud Service?

- A. It is a development environment for building and testing applications that are then deployed to the production environment.
- B. It is a secondary environment that is used for backup and disaster recovery purposes.
- C. It is a pre-production environment where new features are tested before being deployed to the production environment.
- D. It is a production environment that is used for testing and development purposes.

Answer: C

Explanation:

Option 1: This option is incorrect because a production environment is never used for testing and development purposes. Option 2: This option is correct because the Sandbox environment is used to test new features before they are deployed to the production environment. Option 3: This option is incorrect because a separate development environment, such as Oracle Cloud Infrastructure - Classic, would be used for building and testing applications. Option 4: This option is incorrect because the purpose of the Sandbox environment is not for backup and disaster recovery purposes. It is primarily used for testing new features.

NEW QUESTION # 93

Which Oracle Profitability and Cost Management Cloud Service feature allows users to allocate expenses according to different dimensions, such as products, channels, and customers?

- A. Allocation
- B. Plan and Forecast
- C. Cost Calculations
- D. Profitability Analysis

Answer: A

Explanation:

Option 1: Correct: The Allocation feature in Oracle Profitability and Cost Management Cloud Service allows users to distribute or assign expenses to different dimensions, such as products, channels, and customers. Option 2: Incorrect: Cost Calculations in Oracle Profitability and Cost Management Cloud Service is responsible for calculating costs but not allocating expenses to different dimensions. Option 3: Incorrect: Profitability Analysis in Oracle Profitability and Cost Management Cloud Service focuses on analyzing the profitability of different dimensions but does not perform expense allocation. Option 4: Incorrect: Plan and Forecast in Oracle Profitability and Cost Management Cloud Service is used for financial planning and forecasting, but it does not handle expense allocation.

NEW QUESTION # 94

.....
