Axis ANVE Latest Exam Forum - ANVE New Exam Camp

In order to let you have a deep understanding of our ANVE learning guide, our company designed the trial version for our customers. We will provide you with the trial version of our study materials before you buy our products. If you want to know our ANVE training materials, you can download the trial version from the web page of our company. If you use the trial version of our ANVE Study Materials, you will find that our products are very useful for you to pass your exam and get the certification. If you buy our ANVE exam questions, we can promise that you will enjoy a discount.

Axis ANVE Certification Exam is not easy to pass, however. It requires extensive knowledge, skills, and experience in the field of network video surveillance. Individuals who successfully pass this certification exam will be recognized as experts in network video technology and can leverage this certification to advance their career in the industry. Axis Network Video Exam certification is also an indication to potential employers that an individual has the skills and expertise to design and maintain complex video surveillance systems, adding value to their organization.

Axis Network Video Exam Sample Questions (Q24-Q29):

NEW QUESTION # 24

What product is best suited for video broadcast?

- A. AXIS V5938
- B. AXIS Q1700-LE
- C. AXISQ6135-LE
- D. AXISQ1798-LE

Answer: A

Explanation:

The AXIS V5938 is a professional video broadcasting camera designed specifically for high-quality video streaming and broadcasting applications. It offers features such as 4K Ultra HD resolution, powerful zoom capabilities, and advanced image processing, making it ideal for live broadcasts, webcasting, and other professional video applications. Axis documentation highlights the V5938 as a top choice for video broadcast due to its superior image quality and streaming capabilities.

NEW QUESTION # 25

A camera can deliver up to two full resolution 30 fps H.264 streams. The customer wants to have four H.264 streams from the same camera. What will be the resulting impact?

- A. The camera will lower the resolution
- B. The camera will lower the Group of Video (GOV) length
- C. The camera will lower the compression
- D. The camera will lower the frame rate

Answer: D

NEW QUESTION # 26

Which of these surfaces has the lowest reflectance?

- A. Grass
- B. Concrete
- C. Sand
- D. Snow

Answer: B

Explanation:

Concrete has the lowest reflectance among the listed surfaces. Reflectance refers to the ability of a surface to reflect light, and concrete typically reflects less light compared to sand, grass, or snow. This characteristic is important for surveillance in terms of minimizing glare and ensuring better image quality. Axis Communications' documentation on environmental considerations supports this information.

NEW QUESTION # 27

Which statements on Group of video (GOV) length are true? (Choose two)

- A. The GOV length can be adjusted in both Motion JPEG and H.264
- B. The GOV length setting has an impact on bandwidth
- C. A long GOV length increases the storage time on SD card
- D. The GOV length setting only has an impact on MPEG-4
- E. The GOV length setting is only used for recording

Answer: B,C

Explanation:

The Group of Video (GOV) length setting affects both the bandwidth and storage requirements of video streams. A longer GOV length, which specifies the interval between keyframes in a video stream, reduces the frequency of keyframes, thus lowering the bandwidth consumption. However, it can also increase the storage time on an SD card because fewer keyframes are stored over a given period, making the video stream more compression-efficient.

NEW QUESTION # 28

A Day & Night camera automatically removes the IR-cut filter for low light operations. In that mode, the camera becomes sensitive to IR light. Which wavelength is the camera most sensitive to?

- A. 950 nm
- B. 1350 nm

- C. 1140 nm
- D. 850 nm

Answer: D

NEW QUESTION # 29
