For v6 Exam B

RHCE Test Configuration Instructions

You will be working with two systems for this exam. One system is the physical system at which you are seated. The other system is a virtual system which is hosted on your physical system and has been pre-installed with Red Hat Enterprise Linux. The default firewall configuration has been enabled. Unless otherwise specified, all exam items are to be performed on the virtual system only. You do not have root access to the physical host system but you may use it as necessary to test services that you may be required to configure on your virtual system.

Be aware that you are not permitted to communicate with other examinees during this exam. You are also prohibited from connecting to the systems of other examinees.

The testing system and the network will be monitored, and misuse of either will result in a grade of zero on the exam.

Your virtual system should have the following network configuration:

- * Hostname: host.domain11.example.com
- * IP address: 192.168.0.100+X
- * Netmask: 255.255.255.0
- * Gateway: 192.168.0.254
- * Name server: 192.168.0.254
