DCA Sample Questions Pdf & DCA Dump Collection

We offer you free update for 365 days for DCA study guide materials, so that you can have a better understanding of what you are

going to buy. And update version for DCA exam materials will be sent to your email automatically. In addition, DCA exam materials are compiled by experienced experts, and they are quite familiar with the exam center, therefore if you choose us, you can get the latest information for the exam. We also have online and offline chat service, if you have any questions about DCA Study Guide, you can contact with us online or by email, and we will give you reply as quickly as we can.

Docker Certified Associate (DCA) Exam Sample Questions (Q125-Q130):

NEW QUESTION # 125

Are these conditions sufficient for Kubernetes to dynamically provision a persistentVolume, assuming there are no limitations on the amount and type of available external storage?

Solution: A default provisioner is specified, and subsequently a persistentVolumeClaim is created.

- A. Yes
- B. No

Answer: B

Explanation:

Explanation

These conditions are not sufficient for Kubernetes to dynamically provision a persistentVolume, because a default provisioner is not enough to determine how to create a persistentVolume. According to the official documentation, you also need to specify a default storageClass or annotate your persistentVolumeClaim with a specific storageClass name.

References: <https://kubernetes.io/docs/concepts/storage/dynamic-provisioning/#defaulting-behavior>

NEW QUESTION # 126

You add a new user to the engineering organization in DTR.

Will this action grant them read/write access to the engineering/api repository?

Solution. Mirror the engineering/api repository to one of the user's own private repositories.

- A. Yes
- B. No

Answer: B

Explanation:

= Mirroring the engineering/api repository to one of the user's own private repositories will not grant them read/write access to the original repository. Mirroring is a feature that allows users to automatically sync images from one repository to another, either within the same DTR or across different DTRs. Mirroring does not affect the permissions or roles of the users or teams associated with the source or destination repositories. To grant a user read/write access to the engineering/api repository, the user needs to be added to a team that has the appropriate role for that repository, or the repository needs to be configured with the appropriate visibility and access settings. Reference:

Mirror repositories

Manage access to repositories

Manage teams

NEW QUESTION # 127

You created a new service named 'http*' and discover it is not registering as healthy. Will this command enable you to view the list of historical tasks for this service?

Solution. 'docker inspect http"

- A. Yes
- B. No

Answer: B

Explanation:

Explanation

Using docker inspect http does not enable you to view the list of historical tasks for this service. The docker inspect command shows low-level information about one or more objects, such as containers, images, networks, etc. It does not show information

about services or tasks. To view the list of historical tasks for this service, you need to use docker service ps http --no-trunc.

References:

<https://docs.docker.com/engine/reference/commandline/inspect/>,

https://docs.docker.com/engine/reference/commandline/service_ps/

NEW QUESTION # 128

Will this action upgrade Docker Engine CE to Docker Engine EE?

Solution: Manually download the 'docker-ee' package

- A. Yes
- B. No

Answer: B

Explanation:

= Manually downloading the 'docker-ee' package will not upgrade Docker Engine CE to Docker Engine EE.

Docker Engine CE and Docker Engine EE are two different products with different installation methods and features. Docker Engine CE is a free and open source containerization platform, while Docker Engine EE is a subscription-based enterprise-grade platform that offers additional features such as security scanning, certified plugins, and support¹². To upgrade from Docker Engine CE to Docker Engine EE, you need to uninstall Docker Engine CE and install Docker Engine EE following the official documentation³.

NEW QUESTION # 129

You are troubleshooting a Kubernetes deployment called api, and want to see the events table for this object.

Does this command display it?

Solution: kubectl logs deployment api

- A. Yes
- B. No

Answer: B

Explanation:

Explanation

Using kubectl logs deployment api does not display the events table for this object. The kubectl logs command shows the logs of a pod or a container in a pod, but it does not show the events related to the deployment object. To see the events table for this object, you need to use kubectl describe deployment api. References:

<https://kubernetes.io/docs/reference/generated/kubectl/kubectl-commands#logs>,

<https://kubernetes.io/docs/reference/generated/kubectl/kubectl-commands#describe>

NEW QUESTION # 130

.....

DCA test questions have so many advantages that basically meet all the requirements of the user. If you have good comments or suggestions during the trial period, you can also give us feedback in a timely manner. Our study materials will give you a benefit as Thanks, we do it all for the benefits of the user. DCA Study Materials look forward to your joining in.
