#### **NEW QUESTION # 177**

You have an Azure AD tenant that contains a user named User1

User1 needs to manage license assignments and reset user passwords.

Which role should you assign to User1?

- A. Billing administrator
- B. License administrator
- C. Helpdesk administrator
- D. User administrator

**Answer: D**

Explanation:

According to Microsoft's Azure Active Directory roles and permissions reference, the User Administrator role has the following capabilities:

- \* Reset passwords for most non-admin users and certain administrative roles.
- \* Manage user and group properties, including license assignments.

While the License Administrator can manage product licenses, they cannot reset user passwords. Conversely, the Helpdesk Administrator can reset passwords but not manage licenses. Therefore, the only role that satisfies both requirements (reset passwords and manage licenses) is User Administrator.

Microsoft documentation confirms:
