What is Microsoft PL-900?

Microsoft doesn't usually reveal the details of its certification exams and the PL-900 test is not an exception. The exam is available in multiple languages, including English, French, German, Spanish, Simplified Chinese, Korean, and Japanese. You can take the test either through Certiport or PearsonVUE. The exam costs \$99. This is the pricing applicable to the United States. If you are located in another country, you should check the actual costs on the website of the Microsoft testing partner.

The Microsoft PL-900 exam covers a wide range of knowledge areas. All the skills measured in the certification test can be united into six domains. Let's have a closer look at these topics.

Microsoft PL-900 Exam consists of 40-60 multiple-choice questions, and candidates have 60 minutes to complete it. PL-900 exam

covers topics such as understanding the business value of Power Platform, understanding the core components and architecture of Power Platform, and creating a basic Power Apps canvas app. PL-900 exam can be taken in-person at a testing center or online through a remote proctoring service.

Microsoft Power Platform Fundamentals Sample Questions (Q226-Q231):

NEW QUESTION # 226

A manufacturing company is evaluating AI Builder.

You need to select AI Builder models to address specified requirements.

Which model types should you use? To answer, drag the appropriate model types to the correct requirements. Each model type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Model types

- prediction
- form processing
- object detection

Requirement

- Identify products without labels or serial numbers.
- Identify customers who might not pay their invoices on time.

Model type

- model type
- model type

Requirement

- Identify products without labels or serial numbers.
- Identify customers who might not pay their invoices on time.

Model type

- object detection
- prediction

Answer:

Explanation:

Model types

- prediction
- form processing
- object detection

Requirement

- Identify products without labels or serial numbers.
- Identify customers who might not pay their invoices on time.

Model type

- prediction
- form processing

NEW QUESTION # 227

A medical office has a model-driven app that uses Common Data Service.

You plan to create a screen that allows users to capture information about doctors. The screen must provide users the ability to enter or select the following information;

- * a place to enter doctor- profile data that is not part of the account table or the contact table.
- * a place to enter the doctor's specialty in the profile form.
- * a column for insurance with the ability to pick one of 10 different insurance companies.

You need to store the captured data in Common Data Service.

What should you use to store the data? To answer, drag the appropriate components to the correct requirements. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Options

- Entity
- Field
- Option set
- Record

Requirement

- Store additional doctor profile data.
- Store information about the doctor's specialty.
- Select an insurance company.

Option

- Option
- Option
- Option

Answer:

Explanation:

The screenshot shows the 'Implementation Mechanisms' section on the left with four options: Actions, Triggers, Conditions, and Business process flows. The 'Answer Area' on the right contains two text boxes: 'Action' with the text 'Automatically send a text message based on the report submission.' and 'Implementation Mechanism' with the text 'Automatically send a reminder at 8 PM based on a missing status report.' The Microsoft logo is visible at the bottom right.

Explanation

Graphical user interface, text, application Description automatically generated

The screenshot shows a matching exercise. On the left, under 'Requirement', are three items: 'Store additional doctor profile data.', 'Store information about the doctor's specialty.', and 'Select an insurance company'. On the right, under 'Option', are three buttons: 'Field', 'Record', and 'Option set'. The Microsoft logo is visible at the bottom right.
