

New IAPP CIPT Braindumps - CIPT Valid Exam Answers

Abstract - ✓✓Limit the amount of detail in which personal information is processed.

Access Control Entry - ✓✓An element in an access control list (ACL). Each ACE controls, monitors, or records access to an object by a specified user.

Access Control List - ✓✓A list of access control entries (ACE) that apply to an object. Each ACE controls or monitors access to an object by a specified user. In a discretionary access control list (DACL), the ACL controls access; in a system access control list (SACL) the ACL monitors access in a security event log which can comprise part of an audit trail.

Accountability - ✓✓The implementation of appropriate technical and organisational measures to ensure and be able to demonstrate that the handling of personal data is performed in accordance with relevant law, an idea codified in the EU General Data Protection Regulation and other frameworks, including APEC's Cross Border Privacy Rules. Traditionally, accountability has been a fair information practices principle, that due diligence and reasonable steps will be undertaken to ensure that personal information will be protected and handled consistently with relevant law and other fair use principles.

IAPP Certified Information Privacy Technologist (CIPT) Sample Questions (Q223-Q228):

NEW QUESTION # 223

Which is likely to reduce the types of access controls needed within an organization?

- A. Regular data inventories.
- B. Increased number of remote employees.
- C. Standardization of technology.
- D. Decentralization of data.

Answer: B

Explanation:

Step by Step Comprehensive Detailed Explanation with References:

* Option A: Risk transfer involves shifting the risk to another party, such as through insurance. Simply informing customers does not transfer the risk.

* Option B: Risk mitigation involves taking steps to reduce the severity or likelihood of the risk.

Informing and obtaining consent does not mitigate the risk but acknowledges it.

* Option C: Risk avoidance involves changing plans to entirely avoid the risk. Informing customers of the risk is not avoiding it but rather acknowledging it.

* Option D: Risk acceptance involves recognizing the risk and deciding to proceed with it. By informing customers and obtaining their consent, the organization acknowledges the risk and accepts it as part of their operations.

NEW QUESTION # 224

SCENARIO - Please use the following to answer the next question:

Clean-Q is a company that offers house-hold and office cleaning services. The company receives requests from consumers via their website and telephor, to book cleaning services. Based on the type and size of service, Clean-Q then contracts individuals that are registered on its resource database - currently managed in-house by Clean-Q IT Support. Because of Clean-Q's business model, resources are contracted as needed instead of permanently employed.

The table below indicates some of the personal information Clean-Q requires as part of its business operations:

Clean-Q has an internal employee base of about 30 people. A recent privacy compliance exercise has been conducted to align employee data management and human resource functions with applicable data protection regulation.

Therefore, the Clean-Q permanent employee base is not included as part of this scenario.

With an increase in construction work and housing developments, Clean-Q has had an influx of requests for cleaning services. The demand has overwhelmed Clean-Q's traditional supply and demand system that has caused some overlapping bookings.

In a business strategy session held by senior management recently, Cleaning invited vendors to present potential solutions to their current operational issues. These vendors includes included Application development and Cloud solution providers, presenting their proposed solution and platforms.

The Managing Director opted to initiate the process to integrate Clean-Q's operations with a cloud solution (LeadOps) that will provide the following solution one single online platform. A web interface that Clean-Q accesses for the purposes of resource and customer management. This would entail uploading resource and customer information.

A customer facing web interface that enables customers to register, manage and submit cleaning service requests online.

A resource facing web interface that enables resources to apply and manage their assigned jobs.

An online payment facility for customer to pay for services.

Considering that LeadOps will host/process personal information on behalf of Clean-Q remotely, what is an appropriate next step for Clean-Q senior management to assess LeadOps' appropriateness?

- A. Determine if any Clean-Q competitors currently use LeadOps as a solution.
- B. Nothing at this stage as the Managing Director has made a decision.
- C. Involve the Information Security team to understand in more detail the types of services and solutions LeadOps is proposing.

- D. Obtain a legal opinion from an external law firm on contracts management.

Answer: D

NEW QUESTION # 225

Which of the following became a foundation for privacy principles and practices of countries and organizations across the globe?

- A. The EU Data Protection Directive.
- B. The Code of Fair Information Practices.
- C. The Organization for Economic Co-operation and Development (OECD) Privacy Principles.
- D. The Personal Data Ordinance.

Answer: C

Explanation:

Reference:

The Organization for Economic Co-operation and Development (OECD) Privacy Principles became a foundation for privacy principles and practices of countries and organizations across the globe⁴. The OECD Privacy Principles were adopted by OECD member countries in 1980 as a set of eight basic principles for ensuring adequate protection of personal data across national borders⁴. The OECD Privacy Principles have been widely recognized as an international standard for data protection and have influenced many regional and national laws and frameworks⁴.

NEW QUESTION # 226

Which of these is considered an ethical dark pattern on privacy?

- A. Rewarding users for providing more personal information
- B. Giving users more privacy options in relation to their personal information
- C. Providing clear and simple privacy notices to users
- D. Using attractive designs to influence an individual.

Answer: A

Explanation:

rewarding users for providing more personal information is considered an unethical dark pattern on privacy. Dark patterns are user interface design choices that are intended to manipulate users into taking actions they might not otherwise take.

NEW QUESTION # 227

Granting data subjects the right to have data corrected, amended, or deleted describes?

- A. Individual participation
- B. A security safeguard
- C. Use limitation.
- D. Accountability.

Answer: A

Explanation:

Reference:

Granting data subjects the right to have data corrected, amended, or deleted describes individual participation¹. As explained above, the individual participation principle gives individuals certain rights over their personal data held by a data controller¹. One of these rights is to challenge data relating to them and, if the challenge is successful, to have the data erased, rectified, completed or amended¹. The other options are not principles that describe granting data subjects this right.

NEW QUESTION # 228

.....

They work together and put all their efforts to ensure the top standard of IAPP CIPT exam practice test questions. The CIPT exam

practice test questions are being offered in three different formats. These IAPP CIPT Exam Questions formats are PDF dumps files, desktop practice test software, and web-based practice test software.
