SDS study materials like a mini boot camp, you'll be prepared for SDS test and guaranteed you to get the certificate you have been struggling to. The product here of DASCA Data Scientist test, is cheaper, better and higher quality; you can learn SDS skills and theory at your own pace; you will save more time and energy. No other SDS Study Materials or study dumps will bring you the knowledge and preparation that you will get from the SDS study materials available only from TrainingQuiz. Not only will you be able to pass any SDS test, but will gets higher score, if you choose our SDS study materials.

In order to gain more competitive advantage in the interview, more and more people have been eager to obtain the SDS certification. They believe that passing certification is a manifestation of their ability, and they have been convinced that obtaining a SDS certification can help them find a better job. Our SDS test guides have a higher standard of practice and are rich in content. If you are anxious about how to get SDS Certification, considering purchasing our SDS study tool is a wise choice and you will not feel regretted. Our learning materials will successfully promote your acquisition of certification. Our SDS qualification test closely follow changes in the exam outline and practice.

As one of the most professional dealer of SDS practice questions, we have connection with all academic institutions in this line with

proficient researchers of the knowledge related with the SDS exam materials to meet your tastes and needs, please feel free to choose. And we have three versions of SDS training guide: the PDF, Software and APP online for you. You can choose the one which you like best.

DASCA Senior Data Scientist Sample Questions (Q85-Q90):

NEW QUESTION # 85

The Big Data Vision Workshop process is ideal for organizations who:

- A. Have a desire to leverage the Big Data Vision Workshop to identify where and how to leverage data and analytics to power their business models
- **B. All of the above**
- C. Have a desire to leverage Big Data to transform their business but do not know where and how to start
- D. Both A and B
- E. Have a wealth of data that they do not know how to monetize

Answer: B

Explanation:

The Big Data Vision Workshop is an early-phase framework designed to help organizations shape their data- driven transformation journey. It is particularly beneficial when:

Option A: Organizations want to leverage big data but lack clarity on where to start.

Option B: Organizations already have large volumes of data but struggle to derive monetization strategies from it.

Option C: Organizations want to identify use cases where data and analytics can enhance or even redefine their business models.

Since all three statements apply, the correct answer is Option E (All of the above).

NEW QUESTION # 86

The spokes of the "Hub and Spoke" analytics architecture are the analytic use cases or applications that help the organization to optimize:

- A. Key business processes
- **B. All of the above**
- C. Deliver a more compelling customer experience
- D. Both A and B
- E. Uncover new monetization opportunities

Answer: B

Explanation:

In the Hub and Spoke analytics architecture:

The hub is the central data platform (data lake, warehouse, or unified data hub).

The spokes are the analytic use cases or applications that leverage this data to create business value.

These spokes typically help the organization:

Optimize key business processes (Option A).

Deliver improved customer experiences (Option B).

Uncover monetization opportunities (Option C).

Since all three are valid, the correct answer is Option E (All of the above).

NEW QUESTION # 87

Which of the following is NOT used to implement Agile?

- A. Extreme Programming (XP)
- B. Kanban
- C. Scrum
- **D. Six Sigma**

Answer: D

Explanation:

Agile is a project management and product development methodology that emphasizes flexibility, iterative development, collaboration, and adaptability. Common frameworks that implement Agile principles include:

Scrum (Option A): A widely used Agile framework where work is divided into time-boxed sprints, roles are clearly defined (Scrum Master, Product Owner, Development Team), and progress is tracked via tools like burn down charts.

Kanban (Option B): A visual Agile method that manages workflow using a pull-based system with Kanban boards to visualize tasks and control work in progress (WIP).

Extreme Programming (XP, Option D): Another Agile method that focuses on high-quality software through technical practices like continuous integration, test-driven development (TDD), and pair programming.

By contrast:

Six Sigma (Option C): Six Sigma is a process improvement methodology that emphasizes reducing defects and improving quality through statistical analysis. It is not considered an Agile implementation framework.

Thus, the correct answer is Six Sigma (C).

NEW QUESTION # 88

The aim of developing Scribe was to offer reliability with using:

- A. High disk space usage
- B. Extensive protocols
- C. Complex protocols
- **D. None of the above**

Answer: D

Explanation:

Scribe is a server developed by Facebook for aggregating log data streamed in real time from many servers.

Its primary aim was reliability and simplicity in collecting logs at scale.

Unlike other systems, Scribe was designed to avoid complex or extensive protocols and to ensure lightweight log transfer.

It also avoids unnecessary high disk usage, relying instead on efficient pipelines.

Thus, the correct answer is Option D (None of the above).

NEW QUESTION # 89

Which of the following is a DevOps Practice?

- A. Continuous delivery
- **B. All of the above**
- C. Continuous integration
- D. Continuous build

Answer: B

Explanation:

DevOps is a collaborative practice that integrates software development (Dev) and IT operations (Ops) to shorten development cycles and deliver applications reliably. Common DevOps practices include:

Continuous Build (Option A): Automating compilation and packaging of source code to ensure consistent builds.

Continuous Integration (Option B): Developers frequently merge code into a shared repository, which is automatically tested to catch integration issues early.

Continuous Delivery (Option C): Automating software release pipelines so applications can be deployed to production quickly and reliably.

Since all of these are essential DevOps practices, the correct answer is Option D (All of the above).
