Qlik Sense System Administrator Certification Exam - February 2021 Release Sample Questions (Q147-Q152):

NEW QUESTION # 147
A company recently experienced a merger and needs to integrate new users into the Qlik Sense environment. A system administrator must make sure that the system sizing and the tokens match the requirements for all employees in the future.
The system administrator learns the following information:
- 450 active Qlik Sense users before the merger
- 300 new Qlik Sense users
- 500 current token licenses
- Reloads must have the same performance as before the merger
- The number of apps will approximately double
Management requests an estimate from the system administrator about server resources and additional licenses.
Which set of tools should the system administrator use to meet these requirements?

- A. Performance Monitor, Reloads Monitor, Operations Monitor, and Scalability Tools

NEW QUESTION # 148

A system administrator installs Qlik Sense Enterprise and is testing the product with a small team of 10 users.

The users report that the page is NOT trusted on their machines and they receive a certificate warning message. When the system administrator tries to validate this feedback on the server, the administrator does NOT see the same issue.

The system administrator completes the following steps in the proxy configuration:

- Opens all necessary ports
- Checks in MMC that there is a personal certificate on the server
- Creates a DNS entry for an easier URL
- Tries to connect with various Internet browsers on different machines including mobile devices
- Adds the page to trusted sites in the Internet configurations
- Installs OpenSSL in the environment

Which steps should the system administrator take to resolve this issue?

- A. 1. Acquire a third-party certificate from a trusted root certificate authority (CA) including private key
- B. 1. Acquire a third-party certificate from a trusted root certificate authority (CA)
- C. 1. Generate a valid certificate for organizational needs using OpenSSL
