

AD0-E725考試重點 - AD0-E725測試引擎

P.S. NewDumps在Google Drive上分享了免費的、最新的AD0-E725考試題庫：<https://drive.google.com/open?id=1rgQyTxOYVdX4aF-qIwDcPaib0ZqHV7v>

NewDumps有專業的IT人員針對 Adobe AD0-E725 認證考試的考試練習題和答案做研究，他們能為你考試提供很有效的培訓工具和線上服務。如果你想購買NewDumps的產品，NewDumps會為你提供最新最好品質的，很詳細的培訓材料以及很準確的考試練習題和答案來為你參加Adobe AD0-E725認證考試做好充分的準備。放心用我們NewDumps產品提供的試題，選擇了NewDumps考試是可以100%能通過的。

Adobe AD0-E725 考試大綱：

主題	簡介

主題 1	<ul style="list-style-type: none"> External Integrations: This section of the exam measures the skills of Integration Specialists and focuses on connecting Adobe Commerce with external SaaS services. It encompasses the skills needed to customize data flows, utilize Adobe App Builder for extensibility, and implement Adobe I O events and webhooks to create automated and connected business processes.
主題 2	<ul style="list-style-type: none"> Section 1: Architecture: This section of the exam measures the skills of Backend Developers and covers the core structural concepts of Adobe Commerce. It involves demonstrating effective cache implementation, understanding key code components like plugins and observers, and managing multi-site configurations on a single instance. The domain also includes explaining the use of Git patches, critical security features, the CRON scheduling system, and how indexing functions within the platform.
主題 3	<ul style="list-style-type: none"> Customizations: This section of the exam measures the skills of Solutions Engineers and involves modifying and extending platform functionality. This includes customizing core areas like the product catalog, checkout process, and admin panel, as well as manipulating data entities, customizing APIs, working with message queues, and writing integration tests to ensure code quality and functionality.
主題 4	<ul style="list-style-type: none"> Cloud: This section of the exam measures the skills of Cloud Architects and covers the deployment and management of Adobe Commerce on cloud infrastructure. It requires explaining the fundamental cloud architecture, performing setup and configuration tasks, and utilizing the Adobe Commerce Cloud CLI tool to manage the environment effectively.

NewDumps是一個專門提供IT認證考試資料的網站，它的考試資料通過率達到100%，這也是大多數考生願意相信NewDumps網站的原因之一，NewDumps網站一直很關注廣大考生的需求，以最大的能力在滿足考生們的需要，NewDumps Adobe的AD0-E725考試培訓資料是一個空前絕後的IT認證培訓資料，有了它，你將來的職業生涯將風雨無阻。

最新的 Adobe Commerce AD0-E725 免費考試真題 (Q16-Q21):

問題 #16

A client with a multisite Adobe Commerce installation needs to manage different prices for the same product across various storefronts due to factors like regional pricing strategies and distribution costs. The lowest level of the hierarchy is used to manage localization, including product content.

How should the catalog price scope be configured to address the client's requirements?

- A. Catalog price scope should be set to Global.
- B. Catalog price scope should be set to Store View.
- C. Catalog price scope should be set to Website.

答案：C

解題說明：

In Adobe Commerce, product prices can be scoped at the Website level. This allows different websites (regional stores) to have independent pricing for the same products.

A (Global): Same price across all websites/stores # does not meet requirements.

C (Store View): Prices cannot be set at the store view level # only attributes like descriptions or translations can be localized.

B is correct: Website scope supports regional pricing strategies while sharing catalog data.

Adobe Commerce Admin Guide - Catalog price scope

問題 #17

A client expresses disappointment with the underreported engagement and revenue metrics reported by Product Recommendations.

Which limitation or consideration of this service should be communicated to the client?

- **A. Ad blockers and privacy settings can prevent Product Recommendations from capturing shopper behavior.**
- B. Product Recommendations does not support insightful engagement and revenue metrics; an additional service contract is required for this feature.
- C. Product Recommendations requires the purchase of an additional license to enable real-time reporting.

答案: A

問題 #18

An Adobe Commerce Developer is tasked with adding additional data to an order entity in REST API. Remembering upgradability, which solution should the developer implement?

- A. Use interceptor plugins.
- **B. Use extension attributes.**
- C. Use API events.

答案: B

問題 #19

A customer asks for a new functionality which will allow them to see the total lifetime sales statistic of a product. This new data is to be made available for the API and traditional product exports. The technical architect of the company servicing the client decides that for this to be achieved, the first step is for an Extension Attribute to be created.

What are the next two steps that need to be taken? (Choose two.)

- A. Implement an around plugin on the Product Repository.
- B. Declare the extension attribute in `etc/webapi_rest/extension_attributes.xml`.
- **C. Implement an after plugin on the Product Repository.**
- **D. Declare the extension attribute in `etc/extension_attributes.xml`.**

答案: C,D

解題說明:

To expose a new field via an Extension Attribute:

C # Declare the extension attribute in `etc/extension_attributes.xml`.

D # Implement an after plugin on the Product Repository to populate the new attribute with custom logic (in this case, lifetime sales).

A is incorrect: `etc/webapi_rest/extension_attributes.xml` does not exist (only `extension_attributes.xml` is valid).

B is incorrect: around plugins are discouraged here and unnecessarily complicate service contract extensions.

Adobe Commerce DevDocs - Extension attributes

問題 #20

A recent client-reported bug is fixed by the Adobe Commerce community. The Adobe engineering team has not yet released the patch or committed the bug fix to GitHub. A Developer acquires the custom patch and releases it to their Adobe Commerce environments.

What are the recommended steps the Developer should follow to implement the custom patch for the bug fix?

- **A. Install the `cweagans/composer-patches` module and edit the `composer.json` file to apply the custom patch.**
- B. Update the `quality-patches` module and list the required patch in the `magento-ce-patch.yaml` file.
- C. Install only official patches supplied by them to maintain upgradability.

答案: A

解題說明:

If a bug fix patch has not yet been officially released by Adobe (via Quality Patches Tool (QPT)), developers can apply custom patches using the `cweagans/composer-patches` package.

Option A is best practice in general, but in urgent scenarios, custom patches are allowed.

Option B applies only for official Adobe patches distributed via QPT, not for community-supplied or custom fixes.
