You will be provided with an examination environment and you will be presented with actual exam Salesforce Mule-Dev-201 Exam Questions. This sort of preparation method enhances your knowledge which is crucial to excelling in the actual certification exam.

### Salesforce Certified MuleSoft Developer Sample Questions (Q117-Q122):

#### NEW QUESTION # 117

Refer to the exhibits.

☐ The Set Variable transformer is set with value #[ [ first "Max" last"Mule"} ].

What is a valid DataWeave expression to set as the message attribute of the Logger to access the value "Max" from the Mule event?

- A. vars "customer first"
- B. customer first
- C. "customer first"
- D. vars "customer" "first"

**Answer: D**

#### NEW QUESTION # 118

Refer to the exhibits.

☐

The main flow contains a Flow Reference to the child flow.

A web client sends a GET request to the main flow's HTTP Listener that includes a make query parameter.

What values are accessible in the child flow?

- A. payload  
make query param
- B. payload  
make query param model var
- C. payload  
model var
- D. payload

**Answer: B**

#### NEW QUESTION # 119

Which one of them is NOT a flow in Mule?

- A. sync flow
- B. subflow
- C. async flow
- D. async sub flow

**Answer: D**

Explanation:

Correct answer is async sub flow. Rest are valid flows in Mule.

Sub flow is always synchronous.

#### NEW QUESTION # 120

Refer to the exhibits.

Larger image

Larger image

Larger image

The Mule application configures and uses two HTTP Listener global configuration elements.

Mule application is run in Anypoint Studio.

If the mule application starts correctly, what URI and port numbers can receive web client requests? If the mule applications fails to start , what is the reason for the failure?

- A. The mule application fails to start because of the port binding conflict as HTTP request also use same port i.e. 3333
- B. The mule application start successfully Web client requests can only be received at URI on port 2222 but not on port 3333
- C. The mule application fails to start There is URL path conflict because both HTTP Listeners are configured with same path
- D. The mule application start successfully Web client requests can be received at URI on port 2222 and on port 3333.

**Answer: D**

Explanation:

In this case both the flows can start without any error and requests can be received on both ports. Flow names

httpListener1 can call other flow using HTTP request without any issues.

Hence correct answer is

The mule application start successfully

Web client requests can be received at URI on port 2222 and on port 3333.

Lets check why other options are incorrect

1) The mule application fails to start. There is URL path conflict because both HTTP Listeners are configured with same path ----

This is incorrect as port value is different in both listeners

2) The mule application start successfully. Web client requests can only be received at URI on port 2222 but not on port 3333 ---

This is incorrect as there is no reason for not receiving requests on port 3333

3) The mule application fails to start because of the port binding conflict as HTTP request also use same port i.

e. 3333 --- Port binding conflict will nothappen in this case. It would have if both listener configurations would have been on same port . But that is not the case here.

### NEW QUESTION # 121

Refer to the exhibits.

What payload and quantity are logged at the end of the main flow?

- A. [[1,2,3,4], 10]
- B. [[1,2,3,4], 14]
- C. [[order1, order2, order3, order4], 14]
- D. [order1order2order3order4,14]

**Answer: B**

### NEW QUESTION # 122

.....

For your information, the passing rate of our Mule-Dev-201 study questions is over 98% up to now. Up to now our Mule-Dev-201 practice materials consist of three versions, all those three basic types are favorites for supporters according to their preference and inclinations. On your way moving towards success, our Mule-Dev-201 Preparation materials will always serves great support. And you can contact us at any time since we are serving online 24/7.
