

# LEED-Green-Associate考試備考經驗，LEED-Green-Associate熱門認證

P.S. Fast2test在Google Drive上分享了免費的、最新的LEED-Green-Associate考試題庫：<https://drive.google.com/open?id=1GiEqvVAeUblG49oWYQQL6nDza4djWrQ>

多年以來，Fast2test一直致力於為廣大參加IT認證考試的考生們提供最優秀並且最值得信賴的參考資料。關於IT認證考試的出題，Fast2test有著豐富的經驗。而且，Fast2test已經幫助過無數的考生，並得到了大家的信賴和表揚。所以，不要懷疑Fast2test的LEED-Green-Associate考古題的品質了。這絕對是一個可以保證你通過LEED-Green-Associate考試的資料。Fast2test向你保證考不過就全額退款。有了這個保證，你完全沒有必要再猶豫到底要不要買這個考古題了。错过了它將是你很大的損失。

## USGBC LEED-Green-Associate 考試大綱：

主題	簡介
主題 1	<ul style="list-style-type: none"><li>LEED Process: This section of the exam measures the skills of sustainability consultants and covers the foundational aspects of LEED, including organization fundamentals, the structure of LEED rating systems, and the LEED certification process. It emphasizes understanding the goals and objectives of each credit category and how they contribute to sustainable building practices.</li></ul>
主題 2	<ul style="list-style-type: none"><li>Materials and Resources: This section of the exam measures the skills of sustainable materials specialists and focuses on reuse, life-cycle impacts, waste management, and environmentally preferable purchasing practices. It highlights the importance of material selection in reducing environmental impacts.</li></ul>
主題 3	<ul style="list-style-type: none"><li>Sustainable Sites: This section of the exam measures the skills of landscape architects and focuses on on-site assessment and design strategies that reduce environmental impact. It includes topics like habitat conservation, rainwater management, and exterior lighting.</li></ul>
主題 4	<ul style="list-style-type: none"><li>Integrative Strategies: This section of the exam measures the skills of project managers and focuses on the integrative process in LEED projects. It includes understanding the roles of various team members and standards that support LEED, such as ASHRAE and ENERGY STAR guidelines. This section highlights the importance of collaboration and systems thinking in achieving sustainable design.</li></ul>
主題 5	<ul style="list-style-type: none"><li>Indoor Environmental Quality: This section of the exam measures the skills of indoor air quality specialists and covers strategies for improving indoor air quality, lighting, acoustics, and occupant comfort. It emphasizes the use of low-emitting materials and green cleaning practices.</li></ul>

## LEED-Green-Associate熱門認證 & 新版LEED-Green-Associate考古題

機會從來都是屬於那些有準備的人。但是，當屬於我們的機會到來的時候我們是否能成功地抓住它呢？正在準備USGBC的LEED-Green-Associate考試的你，是否抓住了Fast2test這個可以讓你成功的機會呢？Fast2test的LEED-Green-Associate資料是你順利通過考試的保障，有了它，你將節省大量的時間，高效率地準備考試。如果你用了Fast2test的資料，你可以很明顯地感覺到它的與眾不同和它的高品質。這絕對是你成功的一個捷徑。它可以讓你充分地準備LEED-Green-Associate考試。

### 最新的 USGBC LEED LEED-Green-Associate 免費考試真題 (Q291-Q296):

#### 問題 #291

The LEED credits given the greatest weights are credits that

- A. most directly address the most important environmental impacts and human benefits
- B. are included in the LEED for Buildings Operations and Maintenance: Existing Buildings rating system
- C. contribute to developmental density and Sustainable Sites
- D. are used in certifying a LEED Platinum Project

答案： A

#### 解題說明:

Explanation

LEED credits are weighted based on their potential environmental impacts and human benefits. Those that most directly address these areas are given greater weight in the scoring system. This approach is intended to prioritize actions that have the greatest positive impact on critical environmental issues such as climate change, water resources, biodiversity, air pollution, and human health. References: LEED Green Associate Candidate Handbook, U.S. Green Building Council resources

#### 問題 #292

As of 1996, the Montreal Protocol banned the production of what chemical compound known to have ozone-depleting potential?

- A. Hydrochlorofluorocarbons (HCFCs)
- B. Hydrofluorocarbons Phaseout Management Plan (HPMP)
- C. Chlorofluorocarbons (CFCs)
- D. Hydrofluorocarbons (HFCs)

答案： C

#### 解題說明:

As of 1996, the Montreal Protocol banned the production of chlorofluorocarbons (CFCs), a chemical compound known to have ozone-depleting potential. CFCs are synthetic substances that were widely used as refrigerants, propellants, solvents, and foam-blowing agents. CFCs have high ozone depletion potential (ODP), which means they can destroy the ozone layer that protects the Earth from harmful ultraviolet radiation. The Montreal Protocol is an international treaty that aims to protect the ozone layer by phasing out the production and consumption of ozone-depleting substances. The Montreal Protocol banned the production of CFCs in 1996 for developed countries and in 2010 for developing countries. References: LEED v4 Green Associate Candidate Handbook1, UNEP's Montreal Protocol

#### 問題 #293

Which impact categories have been identified as most important for a LEED project to accomplish?

- A. Increase return on investment, promote human scale development
- B. Increase return on investment, promote sustainable and regenerative material cycles
- C. Protect biodiversity and ecosystem services, improve business efficiency
- D. Reduce contribution to climate change, enhance human health and well-being

答案： D

### 問題 #294

Minimum acoustic performance is a prerequisite requirement that applies to

- A. LEED for Schools
- B. LEED for Healthcare
- C. LEED for Hospitality
- D. LEED for New Constructions and Major Renovations

答案： A

解題說明：

Minimum acoustic performance is a prerequisite requirement that applies to LEED for Schools projects. The prerequisite aims to provide classrooms that facilitate better teacher-to-student and student-to-student communication through effective acoustic design. The prerequisite requires projects to meet the sound transmission class (STC) ratings for walls, floors, ceilings, doors, and windows; the background noise levels from HVAC systems; and the reverberation time for core learning spaces. By meeting the minimum acoustic performance, projects can improve the indoor environmental quality, enhance the learning outcomes, and reduce the health and stress impacts of noise. Reference: LEED v4 Reference Guide for Building Design and Construction, p. 545 1; [Acoustical Society of America website]

### 問題 #295

What is the percentage rule when making a decision on the rating system that is most appropriate to use for a project?

- A. 60/40 rule
- B. 30/70 rule
- C. 40/60 rule
- D. 50/50 rule

答案： C

解題說明：

The percentage rule is a method to determine the most appropriate LEED rating system for a project when several rating systems may be applicable. To use this rule, first assign a rating system to each square foot or square meter of the building, and then choose the most appropriate rating system based on the resulting percentages. The entire gross floor area of a LEED project must be certified under a single rating system and is subject to all prerequisites and attempted credits in that rating system. The percentage rule states that if one rating system covers more than 60% of the gross floor area, that rating system should be used. If no rating system covers more than 60% of the gross floor area, but one covers more than 40%, then that rating system should be used. If no rating system covers more than 40% of the gross floor area, then the project team can choose any applicable rating system.

Therefore, the answer is B. 40/60 rule.
