

Das neueste PSE-Strata-Pro-24, nützliche und praktische PSE-Strata-Pro-24 pass4sure Trainingsmaterial

Übrigens, Sie können die vollständige Version der ZertFragen PSE-Strata-Pro-24 Prüfungsfragen aus dem Cloud-Speicher herunterladen: <https://drive.google.com/open?id=1w8mLMfqdvBJEyWs1uZjCOcymOMKOFgK1>

Die Fragenpool zur Palo Alto Networks PSE-Strata-Pro-24 Zertifizierungsprüfung von ZertFragen werden nach dem gleichen Lernplan bearbeitet. Wir aktualisieren auch ständig unsere Fragenpool, die Prüfungsfragen und Antworten enthalten. Weil unsere Prüfungen den echten Prüfungen sehr ähnlich sind, ist unsere Erfolgsquote auch sehr hoch. Diese Tatsache ist nicht zu leugnen, Unsere Fragenpool zur Palo Alto Networks PSE-Strata-Pro-24 Zertifizierung können den Kandidaten sehr helfen. Und unser Preis ist ganz rational, was jedem IT-Kandidaten passt.

Palo Alto Networks PSE-Strata-Pro-24 Prüfungsplan:

Thema	Einzelheiten
Thema 1	Architecture and Planning: This section of the exam measures the skills of Network Architects and emphasizes understanding customer requirements and designing suitable deployment architectures. Candidates must explain Palo Alto Networks' platform networking capabilities in detail and evaluate their suitability for various environments. Handling aspects like system sizing and fine-tuning is also a critical skill assessed in this domain.
Thema 2	Network Security Strategy and Best Practices: This section of the exam measures the skills of Security Strategy Specialists and highlights the importance of the Palo Alto Networks five-step Zero Trust methodology. Candidates must understand how to approach and apply the Zero Trust model effectively while emphasizing best practices to ensure robust network security.
Thema 3	Deployment and Evaluation: This section of the exam measures the skills of Deployment Engineers and focuses on identifying the capabilities of Palo Alto Networks NGFWs. Candidates will evaluate features that protect against both known and unknown threats. They will also explain identity management from a deployment perspective and describe the proof of value (PoV) process, which includes assessing the effectiveness of NGFW solutions.
Thema 4	Business Value and Competitive Differentiators: This section of the exam measures the skills of Technical Business Value Analysts and focuses on identifying the value proposition of Palo Alto Networks Next-Generation Firewalls (NGFWs). Candidates will assess the technical business benefits of tools like Panorama and SCM. They will also recognize customer-relevant topics and align them with Palo Alto Networks' best solutions. Additionally, understanding Strata's unique differentiators is a key component of this domain.

PSE-Strata-Pro-24 Prüfung & PSE-Strata-Pro-24 Deutsch Prüfung

Ob Sie glauben oder nicht, bieten wir die autoritativen und wirkungsvollen Prüfungsunterlagen der Palo Alto Networks PSE-Strata-Pro-24. Wir sind sehr bereit, die beste Hilfe der Palo Alto Networks PSE-Strata-Pro-24 Prüfungsvorbereitung Ihnen anzubieten. Vielleicht brauchen Sie nur die Zertifizierung der Palo Alto Networks PSE-Strata-Pro-24, um Ihren Wunsch des Aufstiegs zu erfüllen. Wir wissen, dass man leicht den Impulskauf bereuen, deshalb empfehlen wir Ihnen, zuerst zu probieren und dann zu kaufen. Die Demo der Prüfungsunterlagen der Palo Alto Networks PSE-Strata-Pro-24 können Sie auf unserer Website einfach herunterladen. Probieren Sie mal!

Palo Alto Networks Systems Engineer Professional - Hardware Firewall PSE-Strata-Pro-24 Prüfungsfragen mit Lösungen (Q57-Q62):

57. Frage

According to a customer's CIO, who is upgrading PAN-OS versions, "Finding issues and then engaging with your support people requires expertise that our operations team can better utilize elsewhere on more valuable tasks for the business." The upgrade project was initiated in a rush because the company did not have the appropriate tools to indicate that their current NGFWs were reaching capacity.

Which two actions by the Palo Alto Networks team offer a long-term solution for the customer? (Choose two.)

- A. Propose AIOps Premium within Strata Cloud Manager (SCM) to address the company's issues from within the existing technology.
- B. Recommend that the operations team use the free machine learning-powered AIOps for NGFW tool.
- C. Inform the CIO that the new enhanced security features they will gain from the PAN-OS upgrades will fix any future problems with upgrading and capacity.
- D. Suggest the inclusion of training into the proposal so that the operations team is informed and confident in working on their firewalls.

Antwort: A,D

Begründung:

The customer's CIO highlights two key pain points: (1) the operations team lacks expertise to efficiently manage PAN-OS upgrades and support interactions, diverting focus from valuable tasks, and (2) the company lacked tools to monitor NGFW capacity, leading to a rushed upgrade. The goal is to recommend long-term solutions leveraging Palo Alto Networks' offerings for Strata Hardware Firewalls. Options B and D-training and AIOps Premium within Strata Cloud Manager (SCM)- address these issues by enhancing team capability and providing proactive management tools. Below is a detailed explanation, verified against official documentation.

Step 1: Analyzing the Customer's Challenges

* Expertise Gap: The CIO notes that identifying issues and engaging support requires expertise the operations team doesn't fully have or can't prioritize. Upgrading PAN-OS on Strata NGFWs involves tasks like version compatibility checks, pre-upgrade validation, and troubleshooting, which demand familiarity with PAN-OS tools and processes.

* Capacity Visibility: The rushed upgrade stemmed from not knowing the NGFWs were nearing capacity (e.g., CPU, memory, session limits), indicating a lack of monitoring or predictive analytics.

Long-term solutions must address both operational efficiency and proactive capacity management, aligning with Palo Alto Networks' ecosystem for Strata firewalls.

58. Frage

What would make a customer choose an on-premises solution over a cloud-based SASE solution for their network?

- A. High growth phase with existing and planned mergers, and with acquisitions being integrated.
- B. Hybrid work and cloud adoption at various locations that have different requirements per site.
- C. Most employees and applications in close physical proximity in a geographic region.
- D. The need to enable business to securely expand its geographical footprint.

Antwort: C

Begründung:

SASE (Secure Access Service Edge) is a cloud-based solution that combines networking and security capabilities to address modern enterprise needs. However, there are scenarios where an on-premises solution is more appropriate.

A: High growth phase with existing and planned mergers, and with acquisitions being integrated.

This scenario typically favors a SASE solution since it provides flexible, scalable, and centralized security that is ideal for integrating newly acquired businesses.

B: Most employees and applications in close physical proximity in a geographic region.

This scenario supports the choice of an on-premises solution. When employees and applications are concentrated in a single geographic region, traditional on-premises firewalls and centralized security appliances provide cost-effective and efficient protection without the need for distributed, cloud-based infrastructure.

C: Hybrid work and cloud adoption at various locations that have different requirements per site.

This scenario aligns with a SASE solution. Hybrid work and varying site requirements are better addressed by SASE's ability to provide consistent security policies regardless of location.

D: The need to enable business to securely expand its geographical footprint.

Expanding into new geographic areas benefits from the scalability and flexibility of a SASE solution, which can deliver consistent security globally without requiring physical appliances at each location.

Key Takeaways:

- * On-premises solutions are ideal for geographically concentrated networks with minimal cloud adoption.
- * SASE is better suited for hybrid work, cloud adoption, and distributed networks.

59. Frage

In which two locations can a Best Practice Assessment (BPA) report be generated for review by a customer?
(Choose two.)

- A. AIOps
- B. Strata Cloud Manager (SCM)
- C. Customer Support Portal
- D. PANW Partner Portal

Antwort: A,B

Begründung:

Step 1: Understand the Best Practice Assessment (BPA)

* Purpose: The BPA assesses NGFW (e.g., PA-Series) and Panorama configurations against best practices, including Center for Internet Security (CIS) Critical Security Controls, to enhance security and feature adoption.

* Process: Requires a Tech Support File (TSF) upload or telemetry data from onboarded devices to generate the report.

* Evolution: Historically available via the Customer Support Portal, the BPA has transitioned to newer platforms like AIOps and Strata Cloud Manager.

* References: "BPA measures security posture against best practices" (paloaltonetworks.com, Best Practice Assessment Overview).

Step 2: Evaluate Each Option

Option A: PANW Partner Portal

* Description: The Palo Alto Networks Partner Portal is a platform for partners (e.g., resellers, distributors) to access tools, resources, and customer-related services.

* BPA Capability:

* Historically, partners could generate BPAs on behalf of customers via the Customer Success Portal (accessible through Partner Portal integration), but this was not a direct customer-facing feature.

* As of July 17, 2023, the BPA generation capability in the Customer Support Portal and related partner tools was disabled, shifting focus to AIOps and Strata Cloud Manager.

* Partners can assist customers with BPA generation but cannot directly generate reports for customer review in the Partner Portal itself; customers must access reports via their own interfaces (e.g., AIOps).

* Verification:

* "BPA transitioned to AIOps; Customer Support Portal access disabled after July 17, 2023" (live.paloaltonetworks.com, BPA Transition Announcement, 07-10-2023).

* No current documentation supports direct BPA generation in the Partner Portal for customer review.

* Conclusion: Not a customer-accessible location for generating BPAs. Not Applicable.

Option B: Customer Support Portal

* Description: The Customer Support Portal (support.paloaltonetworks.com) provides customers with tools, case management, and

historically, BPA generation.

- * BPA Capability:

- * Prior to July 17, 2023, customers could upload a TSF under "Tools > Best Practice Assessment" to generate a BPA report (HTML, XLSX, PDF formats).

- * Post-July 17, 2023, this functionality was deprecated in favor of AIOps and Strata Cloud Manager. Historical BPA data was maintained until December 31, 2023, but new report generation ceased.

- * As of March 08, 2025, the Customer Support Portal no longer supports BPA generation, though it remains a support hub.

- * Verification:

- * "TSF uploads for BPA in Customer Support Portal disabled after July 17, 2023" (docs.

paloaltonetworks.com/panorama/10-2/panorama-admin/panorama-best-practices).

- * "Transition to AIOps for BPA generation" (live.paloaltonetworks.com, BPA Transition to AIOps, 07-10-2023).

- * Conclusion: No longer a valid location for BPA generation as of the current date. Not Applicable.

Option C: AIOps

- * Description: AIOps for NGFW is an AI-powered operations platform for managing Strata NGFWs and Panorama, offering real-time insights, telemetry-based monitoring, and BPA generation.

- * BPA Capability:

- * Supports two BPA generation methods:

- * On-Demand BPA: Customers upload a TSF (PAN-OS 9.1 or higher) via "Dashboards > On Demand BPA" to generate a report, even without telemetry or onboarding.

- * Continuous BPA: For onboarded devices with telemetry enabled (PAN-OS 10.0+), AIOps provides ongoing best practice assessments via the Best Practices dashboard.

- * Available in free and premium tiers; the free tier includes BPA generation.

- * Reports include detailed findings, remediation steps, and adoption summaries.

- * Use Case: Ideal for customers managing firewalls with or without full AIOps integration.

- * Verification:

- * "Generate on-demand BPA reports by uploading TSFs in AIOps" (docs.paloaltonetworks.com/aiops/aiops-for-ngfw/dashboards/on-demand-bpa).

- * "AIOps Best Practices dashboard assesses configurations continuously" (live.paloaltonetworks.com, AIOps On-Demand BPA, 10-25-2022).

- * Conclusion: A current, customer-accessible location for BPA generation. Applicable.

Option D: Strata Cloud Manager (SCM)

- * Description: Strata Cloud Manager is a unified, AI-powered management interface for NGFWs and SASE, integrating AIOps, digital experience management, and configuration tools.

- * BPA Capability:

- * Supports on-demand BPA generation by uploading a TSF under "Dashboards > On Demand BPA," similar to AIOps, for devices not sending telemetry or not fully onboarded.

- * For onboarded devices, provides real-time best practice checks via the "Best Practices" dashboard, analyzing policies against Palo Alto Networks and CIS standards.

- * Available in Essentials (free) and Pro (paid) tiers; BPA generation is included in both.

- * Use Case: Offers a modern, centralized platform for customers to manage and assess security posture.

- * Verification:

- * "Run BPA directly from Strata Cloud Manager with TSF upload" (docs.paloaltonetworks.com/strata-cloud-manager/dashboards/on-demand-bpa, 07-24-2024).

- * "Best Practices dashboard measures posture against guidance" (paloaltonetworks.com, Strata Cloud Manager Overview).

- * Conclusion: A current, customer-accessible location for BPA generation. Applicable.

Step 3: Select the Two Valid Locations

- * C (AIOps): Supports both on-demand (TSF upload) and continuous BPA generation, accessible to customers via the Palo Alto Networks hub.

- * D (Strata Cloud Manager): Provides identical on-demand BPA capabilities and real-time assessments, designed as a unified management interface.

- * Why Not A or B?

- * A (PANW Partner Portal): Partner-focused, not a direct customer tool for BPA generation.

- * B (Customer Support Portal): Deprecated for BPA generation post-July 17, 2023; no longer valid as of March 08, 2025.

Step 4: Verified References

- * AIOps BPA: "On-demand BPA in AIOps via TSF upload" (docs.paloaltonetworks.com/aiops/aiops-for-ngfw/dashboards/on-demand-bpa).

- * Strata Cloud Manager BPA: "Generate BPA reports in SCM" (docs.paloaltonetworks.com/strata-cloud-manager/dashboards/on-demand-bpa).

- * Customer Support Portal Transition: "BPA moved to AIOps/SCM; CSP access ended July 17, 2023" (live.paloaltonetworks.com, BPA Transition, 07-10-2023).

60. Frage

In addition to DNS Security, which three Cloud-Delivered Security Services (CDSS) subscriptions are minimum recommendations for all NGFWs that handle north-south traffic? (Choose three)

- A. Advanced URL Filtering
- B. Advanced WildFire
- C. Advanced Threat Prevention
- D. SaaS Security
- E. Enterprise DLP

Antwort: A,B,C

Begründung:

North-south traffic refers to the flow of data in and out of a network, typically between internal resources and the internet. To secure this type of traffic, Palo Alto Networks recommends specific CDSS subscriptions in addition to DNS Security:

A: SaaS Security

SaaS Security is designed for monitoring and securing SaaS application usage but is not essential for handling typical north-south traffic.

B: Advanced WildFire

Advanced WildFire provides cloud-based malware analysis and sandboxing to detect and block zero-day threats. It is a critical component for securing north-south traffic against advanced malware.

C: Enterprise DLP

Enterprise DLP focuses on data loss prevention, primarily for protecting sensitive data. While important, it is not a minimum recommendation for securing north-south traffic.

D: Advanced Threat Prevention

Advanced Threat Prevention (ATP) replaces traditional IPS and provides inline detection and prevention of evasive threats in north-south traffic. It is a crucial recommendation for protecting against sophisticated threats.

E: Advanced URL Filtering

Advanced URL Filtering prevents access to malicious or harmful URLs. It complements DNS Security to provide comprehensive web protection for north-south traffic.

Key Takeaways:

* Advanced WildFire, Advanced Threat Prevention, and Advanced URL Filtering are minimum recommendations for NGFWs handling north-south traffic, alongside DNS Security.

* SaaS Security and Enterprise DLP, while valuable, are not minimum requirements for this use case.

References:

* Palo Alto Networks NGFW Best Practices

* Cloud-Delivered Security Services

61. Frage

What is the minimum configuration to stop a Cobalt Strike Malleable C2 attack inline and in real time?

- A. Next-Generation CASB on PAN-OS 10.1
- B. Threat Prevention and Advanced WildFire with PAN-OS 10.0
- C. Advanced Threat Prevention and PAN-OS 10.2
- D. DNS Security, Threat Prevention, and Advanced WildFire with PAN-OS 9.x

Antwort: C

Begründung:

Cobalt Strike is a popular post-exploitation framework often used by attackers for Command and Control (C2) operations. Malleable C2 profiles allow attackers to modify the behavior of their C2 communication, making detection more difficult. Stopping these attacks in real time requires deep inline inspection and the ability to block zero-day and evasive threats.

* Why "Advanced Threat Prevention and PAN-OS 10.2" (Correct Answer B)? Advanced Threat Prevention (ATP) on PAN-OS 10.2 uses inline deep learning models to detect and block Cobalt Strike Malleable C2 attacks in real time. ATP is designed to prevent evasive techniques and zero-day threats, which is essential for blocking Malleable C2. PAN-OS 10.2 introduces enhanced capabilities for detecting malicious traffic patterns and inline analysis of encrypted traffic.

* ATP examines traffic behavior and signature-less threats, effectively stopping evasive C2 profiles.

* PAN-OS 10.2 includes real-time protections specifically for Malleable C2.

* Why not "Next-Generation CASB on PAN-OS 10.1" (Option A)? Next-Generation CASB (Cloud Access Security Broker) is

designed to secure SaaS applications and does not provide the inline C2 protection required to stop Malleable C2 attacks. CASB is not related to Command and Control detection.

* Why not "Threat Prevention and Advanced WildFire with PAN-OS 10.0" (Option C)? Threat Prevention and Advanced WildFire are effective for detecting and preventing malware and known threats. However, they rely heavily on signatures and sandboxing for analysis, which is not sufficient for stopping real-time evasive C2 traffic. PAN-OS 10.0 lacks the advanced inline capabilities provided by ATP in PAN-OS 10.2.

* Why not "DNS Security, Threat Prevention, and Advanced WildFire with PAN-OS 9.x" (Option D)? While DNS Security and Threat Prevention are valuable for blocking malicious domains and known threats, PAN-OS 9.x does not provide the inline deep learning capabilities needed for real-time detection and prevention of Malleable C2 attacks. The absence of advanced behavioral analysis in PAN-OS 9.x makes this combination ineffective against advanced C2 attacks.
