

Data-Architect Valid Test Pass4sure Imparts You the Best Knowledge of Data-Architect Exam

BONUS!!! Download part of TestInsides Data-Architect dumps for free: <https://drive.google.com/open?id=1D3ftL5OGRlt6Z1fXGfNzbDpX-Gx1uOSs>

As we all know that the higher position always ask for the more capable man. So your strength and efficiency will really bring you more job opportunities. You must complete your goals in the shortest possible time. How to make it? Our Data-Architect exam materials can give you a lot of help. Our Data-Architect Study Guide is famous for its high-effective and high-efficiency advantages. If you study with our Data-Architect practice engine, you can get the latest and specialized information in the subject and you will be rewarded with the certification.

No matter you are a fresh man or experienced IT talents, here, you may hear that Data-Architect certifications are designed to take advantage of specific skills and enhance your expertise. While, if you want to be outstanding in the crowd, it is better to get the Data-Architect certification. While, where to find the latest Data-Architect Study Material for preparation is another question. Salesforce Data-Architect exam training will guide you and help you to get the Data-Architect certification. Hurry up, download Data-Architect test practice torrent for free, and start your study at once.

New Data-Architect Test Pass4sure, Data-Architect Braindumps Downloads

If you want our Data-Architect study materials to download and print, the PDF version is perfect for you since it has the function of being printable. And the PDF version of our Data-Architect exam questions can be noted when you want to memory something as well as to indicate the keypoints. Also, our Data-Architect Preparation exam is unlimited in number of devices, making it easy for you to learn anytime, anywhere.

Salesforce Data-Architect certification is a highly sought-after certification that validates a professional's expertise in designing, building, and managing complex data architectures in Salesforce. Salesforce Certified Data Architect certification is designed to ensure that professionals have a deep understanding of the Salesforce platform's data model, data integration, and data management capabilities. The Salesforce Data-Architect Certification is intended for professionals who work with large-scale data architectures and want to showcase their expertise in designing and managing them.

Salesforce Certified Data Architect Sample Questions (Q156-Q161):

NEW QUESTION # 156

Universal Containers has 30 million case records. The Case object has 80 fields. Agents are reporting reports in the Salesforce org. Which solution should a data architect recommend to improve reporting performance?

- A. Contact Salesforce support to enable skinny table for cases.
- B. Build reports using custom Lightning components.
- C. Create a custom object to store aggregate data and run reports.
- **D. Move data off of the platform and run reporting outside Salesforce, and give access to reports.**

Answer: D

Explanation:

According to the Salesforce documentation¹, reporting performance can be affected by various factors, such as the volume and complexity of data, the design and configuration of reports and dashboards, the number and type of users accessing the reports, etc. To improve reporting performance, some of the recommended solutions are:

Move data off of the platform and run reporting outside Salesforce, and give access to reports (option C). This means using an external service or tool that can extract, transform, and load (ETL) data from Salesforce to another system or database, such as a data warehouse or a business intelligence platform. This can improve reporting performance by reducing the load and latency on Salesforce, and enabling faster and more flexible reporting and analysis on the external system. Users can access the reports from the external system using a link or an embedded component in Salesforce.

Contact Salesforce support to enable skinny table for cases (option B). This means requesting Salesforce to create a custom table that contains a subset of fields from the Case object that are frequently used or queried. A skinny table can improve reporting performance by avoiding joins between standard and custom fields, omitting soft-deleted records, and leveraging indexes on the fields².

Create a custom object to store aggregate data and run reports (option A). This means creating a custom object that contains summary or calculated data from the Case object, such as counts, sums, averages, etc. A custom object can improve reporting performance by reducing the number of records and fields that need to be queried and displayed.

Build reports using custom Lightning components (option D). This means creating custom components that use Lightning Web Components or Aura Components frameworks to display report data in Salesforce. A custom component can improve reporting performance by using client-side caching, pagination, lazy loading, or other techniques to optimize data rendering and interaction.

NEW QUESTION # 157

Universal Container (US) is replacing a home-grown CRM solution with Salesforce, UC has decided to migrate operational (Open and active) records to Salesforce, while keeping historical records in legacy system, UC would like historical records to be available in Salesforce on an as needed basis.

Which solution should a data architect recommend to meet business requirement?

- A. Leverage real-time integration to pull records into Salesforce.
- B. Bring all data Salesforce, and delete it after a year.
- C. Build a chair solution to go the legacy system and display records.
- **D. Leverage mashup to display historical records in Salesforce.**

Answer: D

Explanation:

According to the Using Mashups article on Salesforce Developers, one of the techniques for deploying large data volumes is to use mashups to display historical records in Salesforce. The article states that "Mashups are a way to display data from an external

system within a Salesforce page without copying or synchronizing the data. Mashups use a combination of Visualforce, Apex callouts, and JavaScript code that runs in the browser.

Mashups are useful when you want to display large amounts of read-only data that is stored outside of Salesforce." Therefore, a data architect should recommend this solution to meet the business requirement of UC.

NEW QUESTION # 158

Universal Containers (UC) has a complex system landscape and is implementing a data governance program for the first time. Which two first steps would be appropriate for UC to initiate an assessment of data architecture? Choose 2 answers.

- A. Engage with executive sponsorship to assess enterprise data strategy and goals.
- B. Engage with business units and IT to assess current operational systems and data models.
- C. Engage with IT program managers to assess current velocity of projects in the pipeline.
- D. Engage with database administrators to assess current database performance metrics.

Answer: A,B

NEW QUESTION # 159

Universal Containers (UC) is going through major reorganization of their sales team. This would require changes to a large number of group members and sharing rules. UC's administrator is concerned about long processing time and failure during the process. What should a Data architect implement to make changes efficiently?

- A. Delete old sharing rules and build new sharing rules.
- B. Log a case with Salesforce to make sharing rule changes.
- C. Log out all users and make changes to sharing rules.
- D. Enable **Defer Sharing Calculation** prior to making sharing rule changes.

Answer: D

NEW QUESTION # 160

UC is trying to switch from legacy CRM to Salesforce and wants to keep legacy CRM and Salesforce in place till all the functionality is deployed in Salesforce. They want to keep data in synch b/w Salesforce, legacy CRM and SAP. What is the recommendation.

- A. Integrate legacy CRM to Salesforce and keep data in synch till new functionality is in place.
- B. Do not integrate legacy CRM to Salesforce, but integrate Salesforce to SAP.
- C. **Integrate SAP with Salesforce, SAP to legacy CRM but not legacy CRM to Salesforce.**
- D. **Suggest MDM solution and link MDM to Salesforce and SAP.**

Answer: C,D

NEW QUESTION # 161

.....

We have first-rate information protection system, if you purchase Data-Architect exam materials from us, we can ensure you that the safety of your email box. We respect your privacy and will never send junk email to you. Data-Architect exam dumps of us are also high-quality, and will help you pass the exam and get the certificate successfully. What's more, we have professional online chat service stuff, if you have any questions about the Data-Architect Exam Materials, just have a conversation with them. We will give you reply as quickly as possible.
