

How Cisco 300-740 PDF Dumps is essential on your 300-740 Exam Questions Certain Success

Cisco 300-740 Practice Questions

Designing and Implementing Secure Cloud Access for Users and Endpoints

Order our 300-740 Practice Questions Today and Get Ready to Pass with Flying Colors!

300-740 Practice Exam Features | QuestionsTube

- Latest & Updated Exam Questions
- Subscribe to FREE Updates
- Both PDF & Exam Engine
- Download Directly Without Waiting

<https://www.questiontube.com/exam/300-740/>

At QuestionsTube, you can read 300-740 free demo questions in pdf file, so you can check the questions and answers before deciding to download the Cisco 300-740 practice questions. These free demo questions are parts of the 300-740 exam questions. Download and read them carefully, you will find that the 300-740 test questions of QuestionsTube will be your great learning materials online. Share some 300-740 exam online questions below.

P.S. Free & New 300-740 dumps are available on Google Drive shared by DumpsReview: https://drive.google.com/open?id=1vST_8IFshACwXeaTPaT43VxJRUXKqgeh

Purchasing a product may be a cautious thing for all of us, because we not only need to consider the performance of the product but also need to think about the things after purchasing. Our product will provide free demo for trying, and after you have bought the product of the 300-740 exam, we will send you the product by email in ten minutes after we have received the payment. After you bought the practice materials for the 300-740 Exam, if you have any question in the process of using, you can ask the service staff for help by email. Free update for having bought product is also available.

Cisco 300-740 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• SAFE Key Structure: This section of the exam measures skills of Network Security Designers and focuses on the SAFE framework's key structural elements. It includes understanding 'Places in the Network'—the different network zones—and defining 'Secure Domains' to organize security policy implementation effectively.

Topic 2	<ul style="list-style-type: none"> • Industry Security Frameworks: This section of the exam measures the skills of Cybersecurity Governance Professionals and introduces major industry frameworks such as NIST, CISA, and DISA. These frameworks guide best practices and compliance in designing secure systems and managing cloud environments responsibly.
Topic 3	<ul style="list-style-type: none"> • Cloud Security Architecture: This section of the exam measures the skills of Cloud Security Architects and covers the fundamental components of the Cisco Security Reference Architecture. It introduces the role of threat intelligence in identifying and mitigating risks, the use of security operations tools for monitoring and response, and the mechanisms of user and device protection. It also includes strategies for securing cloud and on-premise networks, as well as safeguarding applications, workloads, and data across environments.
Topic 4	<ul style="list-style-type: none"> • Visibility and Assurance: This section of the exam measures skills of Security Operations Center (SOC) Analysts and focuses on monitoring, diagnostics, and compliance. It explains the Cisco XDR solution, discusses visibility automation, and describes tools for traffic analysis and log management. The section also involves diagnosing application access issues, validating telemetry for behavior analysis, and verifying user access with tools like firewall logs, Duo, and Cisco Secure Workload.
Topic 5	<ul style="list-style-type: none"> • Network and Cloud Security: This section of the exam measures skills of Network Security Engineers and covers policy design for secure access to cloud and SaaS applications. It outlines techniques like URL filtering, app control, blocking specific protocols, and using firewalls and reverse proxies. The section also addresses security controls for remote users, including VPN-based and application-based access methods, as well as policy enforcement at the network edge.
Topic 6	<ul style="list-style-type: none"> • User and Device Security: This section of the exam measures skills of Identity and Access Management Engineers and deals with authentication and access control for users and devices. It covers how to use identity certificates, enforce multifactor authentication, define endpoint posture policies, and configure single sign-on (SSO) and OIDC protocols. The section also includes the use of SAML to establish trust between devices and applications.

300-740 Exam Practice Test Pdf– Fantastic Test 300-740 Assessment Pass Success

Some people are worrying about that they cannot operate the windows software and the online test engine of the 300-740 training engine smoothly. We ensure that you totally have no troubles in learning our 300-740 study materials. All small buttons are designed to be easy to understand. Also, the layout is beautiful and simple. Complex designs do not exist in our 300-740 Exam Guide. You can find that our content is easy to follow and practice.

Cisco Designing and Implementing Secure Cloud Access for Users and Endpoints Sample Questions (Q112-Q117):

NEW QUESTION # 112

Endpoint posture policies are used to assess:

- A. The speed of the network connection
- B. The user's personal preferences for software
- C. The user's physical location
- D. The security readiness of a device before granting network access

Answer: D

NEW QUESTION # 113

SAML/SSO is used for:

- A. Decreasing website traffic
- **B. Simplifying user access across multiple applications**
- C. Complicating the login process
- D. Reducing security measures

Answer: B

NEW QUESTION # 114

A common identity across systems is essential for:

- **A. Simplifying user access and security management**
- B. Isolating network segments
- C. Increasing operational costs
- D. Reducing network speed

Answer: A

NEW QUESTION # 115

What does the Cisco Telemetry Broker provide for telemetry data?

- **A. Data filtering**
- B. Data mining
- C. Data brokering
- D. Data analytics

Answer: A

Explanation:

Cisco Telemetry Broker (CTB) is designed to act as an intermediary that filters, enriches, and routes telemetry data-such as NetFlow, Syslog, and SNMP-across various tools. It optimizes resource usage by preventing overload and ensures only relevant telemetry is forwarded to appropriate analytics platforms.

The SCAZT guide (Section 5: Visibility and Assurance, Pages 93-95) describes CTB's role in applying filters and transformations to raw telemetry data to enhance visibility and reduce noise.

NEW QUESTION # 116

Refer to the exhibit. An engineer must provide HTTPS access from the Google Cloud Platform virtual machine to the on-premises mail server. All other connections from the virtual machine to the mail server must be blocked. The indicated rules were applied to the firewall; however, the virtual machine cannot access the mail server. Which two actions should be performed on the firewall to meet the requirement? (Choose two.)

- **A. Configure a NAT rule.**
- B. Move up rule 2.
- C. Configure a security group.
- D. Set IP address 20.1.1.1 as the source in rule 1.
- **E. Set IP address 192.168.200.10 as the destination in rule 1.**

Answer: A,E

Explanation:

From the firewall access rules provided, Rule 1 allows traffic from 20.1.1.10 (GCP VM) to 20.1.1.1 using HTTPS. However, this destination is not the actual mail server-the mail server resides at 192.168.200.10 (inside network). Therefore:

A: Rule 1 must be updated to reflect the correct destination: 192.168.200.10. Without this change, traffic is not permitted to the mail server.

D: NAT (Network Address Translation) is needed to translate the external address (e.g., 20.1.1.10) to access internal addresses (like 192.168.200.10). As per SCAZT and Cisco firewall policies, NAT enables proper packet delivery from public to private zones.

Rule 2, which denies all other traffic, is correctly placed after the specific allow rule. Therefore, moving it (Option B) would not help, and Options C and E are unrelated to resolving the immediate firewall access and routing issue.
