

Free Download 1Z0-1195-25 Exam Assessment & The Best Helper to help you pass 1Z0-1195-25: Oracle Data Platform 2025 Foundations Associate

BONUS!!! Download part of SureTorrent 1Z0-1195-25 dumps for free: <https://drive.google.com/open?id=1l62y2KRFK1-oloRFo7OZR5sn26moX0fo>

We have a lot of regular customers for a long-term cooperation now since they have understood how useful and effective our 1Z0-1195-25 actual exam is. In order to let you have a general idea about the shining points of our 1Z0-1195-25 training materials, i would like to introduce the free demos of our 1Z0-1195-25 study engine for you. There are the real and sample questions in the free demos to show you that how valid and latest our 1Z0-1195-25 learning dumps are. So just try now!

Oracle 1Z0-1195-25 Exam Syllabus Topics:

Topic	Details
Topic 1	Exadata and DBCS: This section tests the knowledge of Exadata Specialists and Database Administrators in understanding Exadata deployment options, lifecycle management tasks such as patching and backup, and the features of Oracle Base Database Service (DOracle NoSQL Database ServiceBCS).

Topic 2	Autonomous Database and Tools: This section evaluates the expertise of Database Administrators and Cloud Engineers in working with Oracle Autonomous Database (ADB). It includes provisioning ADB instances, scaling CPU and storage, starting and stopping databases, and using tools to load data into ADB effectively.
Topic 3	Data Management Introduction: This section of the exam measures the skills of Data Architects and Cloud Database Specialists in understanding Oracle's data management strategy. It covers Oracle's database offerings, deployment options, and multi-cloud and hybrid cloud solutions for managing data using Oracle Cloud Infrastructure.
Topic 4	Resiliency: This section tests the knowledge of Database Security Engineers and Disaster Recovery Specialists in implementing Oracle's Maximum Security Architecture and Maximum Availability Architecture to ensure database resiliency and high availability.
Topic 5	Converged Database: This section evaluates the expertise of Multi-Model Database Specialists and Application Developers in using Oracle's converged database for multi-model use cases. It covers JSON, graph, and spatial data capabilities within the Oracle Database.

New 1Z0-1195-25 Test Braindumps - 1Z0-1195-25 Exam Discount

Our Oracle 1Z0-1195-25 practice test software is the most distinguished source for the Oracle 1Z0-1195-25 exam all over the world because it facilitates your practice in the practical form of the Oracle Data Platform 2025 Foundations Associate certification exam. Moreover, you do not need an active internet connection to utilize Oracle 1Z0-1195-25 Practice Exam software. It works without the internet after software installation on Windows computers.

Oracle Data Platform 2025 Foundations Associate Sample Questions (Q41-Q46):

NEW QUESTION # 41

What is the FINAL release supporting the non-CDB architecture?

- A. Oracle Database 19c
- B. Oracle Database 21c
- C. Oracle Database 18c
- D. Oracle Database 23c

Answer: A

Explanation:

The final release supporting the "non-CDB (non-Container Database)" architecture is "Oracle Database 19c" (B). Oracle deprecated the non-CDB architecture starting with 20c (never fully released) and mandated the multitenant architecture (CDB with PDBs) from 21c onward. 19c, as a long-term support release, was the last to support non-CDB databases, with Oracle recommending migration to multitenant in subsequent versions like 23c. Oracle's documentation confirms 19c as the end of non-CDB support.

NEW QUESTION # 42

What set of NoSQL-style APIs can be used in Autonomous JSON Database?

- A. DOSA (Document Open Solution Access)
- B. OSDA (Oracle Simple Document Access)
- C. OASD (Oracle Application Storage Definition)
- D. SODA (Simple Oracle Document Access)

Answer: D

Explanation:

The "Autonomous JSON Database" supports NoSQL-style document access through "SODA" (Simple Oracle Document Access) APIs (B). SODA provides a simple, intuitive interface for developers to interact with JSON documents stored in the database using operations like insert, query, and update, without requiring SQL knowledge. Options A ("OASD"), C ("DOSAS"), and D ("OSDA") are not recognized API sets in Oracle's documentation. SODA is explicitly documented as the standard NoSQL API for Autonomous JSON Database, aligning with Oracle's converged database strategy to support multiple data models.

NEW QUESTION # 43

Which Oracle Cloud Infrastructure (OCI) Identity and Access Management (IAM) capability helps you to organize multiple users into teams?

- **A. Groups**
- B. Roles
- C. Policies
- D. Users

Answer: A

Explanation:

In OCI Identity and Access Management (IAM), "Groups" (A) is the capability that helps organize multiple users into teams. Groups allow administrators to assign permissions collectively to a set of users, simplifying access management. "Policies" (B) define permissions but don't organize users, "Users" (C) are individual accounts, and "Roles" (D) are not a distinct IAM construct in OCI (unlike other clouds). Oracle's IAM documentation identifies Groups as the mechanism for team-based organization.

NEW QUESTION # 44

Which statements are included in default configuration for automatic database backups?

- A. Backups are executed on primary site
- **B. Backups occur weekly**
- C. Archive redo log files are backed up every 30 minutes
- D. Retention period is set at 14 days

Answer: B

Explanation:

The default configuration for automatic database backups in OCI (e.g., Autonomous Database) includes "Backups occur weekly" (A), with daily incremental and weekly full backups. "Archive redo log files are backed up every 30 minutes" (B) is not default (it's real-time logging), "Retention period is set at 14 days" (C) is incorrect (default is 60 days), and "Backups are executed on primary site" (D) is vague but not a standard config statement. Oracle's backup documentation specifies weekly full backups as default.

NEW QUESTION # 45

Which ADB tool can you use to discover anomalies, outliers, and hidden patterns in your data?

- **A. Data Insights**
- B. Catalog
- C. Data Transforms
- D. Data Load

Answer: A

Explanation:

In the Autonomous Database (ADB), "Data Insights" (B) is the tool to discover anomalies, outliers, and hidden patterns, leveraging built-in AI and ML capabilities to analyze data. "Data Load" (A) is for importing data, "Data Transforms" (C) is for data preparation, and "Catalog" (D) is for metadata (OCI Data Catalog). Oracle's documentation identifies Data Insights for pattern detection.

NEW QUESTION # 46

Due to the shortage of useful practice materials or being scanty for them, many candidates may choose the bad quality exam materials, but more and more candidates can choose our 1Z0-1195-25 study materials. Actually, some practice materials are shooting the breeze about their effectiveness, but our 1Z0-1195-25 training quiz are real high quality practice materials with passing rate up to 98 to 100 percent. And you will be amazed to find that our 1Z0-1195-25 exam questions are exactly the same ones in the real exam.
