Huawei - Updated Latest H11-861_V4.0 Braindumps Files

As you all know that the HCIP-Collaboration V4.0 (H11-861_V4.0) exam is the most challenging exam, since it's difficult to find preparation material for passing the Huawei H11-861_V4.0 exam. Pass4suresVCE provides you with the most complete and comprehensive preparation material for the Huawei H11-861_V4.0 Exam that will thoroughly prepare you to attempt the H11-861_V4.0 exam and pass it with 100% success guaranteed.

Huawei HCIP-Collaboration V4.0 Sample Questions (Q31-Q36):

NEW QUESTION # 31

When Dual-screen mode is set to Manual for the Box 310/610, which of the following options can be selected for Output port policy? (Choose all that apply.)

- A. Extended mode 2
- B. Extended mode 3
- C. Single-screen
- D. Extended mode 1

Answer: A,C,D

Explanation:

In Manual dual-screen mode on the Box 310/610, you may select Single-screen or one of the two Extended modes (Extended mode 1 or Extended mode 2); Extended mode 3 is not supported.

NEW QUESTION # 32

Which of the following operations needs to be performed when you log in to the SC as the admin user using the CLI for the first time?

- A. Configure a default route for SC.
- B. Change the default password.
- C. Configure the SC IP address.
- D. Delete user configuration.

Answer: B

Explanation:

On first CLI login, you must change the default admin password to secure the SC; other network settings can be configured as needed afterward.

NEW QUESTION # 33

The virtual conference ID range of the SMC video conferencing system is set to 9100000 to 9299999. Which of the following may be the ID of a new common conference (that is not bound to a VMR)? (Choose all that apply.)

- A. 0
- B. 1

- C. 2
- D. 3

Answer: A,D

Explanation:

Only IDs within the configured range 9100000-9299999 are valid for new common conferences; 9288889 and 9100009 fall in this range, whereas 9688889 and 9300001 do not.

NEW QUESTION # 34

In a Huawei video conference, which of the following may cause echoes or even high-pitched noises when the local participant speaks? (Choose all that apply.)

- A. The microphone is too close to the speaker.
- B. An audio loop exists. The external audio device feeds back the sound from the endpoint output port to the endpoint input port.
- C. The endpoint's input volume is lower than the minimum energy threshold required for echo cancellation.
- D. Another participant whose speaker is turned off is at the local site.

Answer: A,B,C

Explanation:

If the input volume falls below the echo canceller's detection threshold, the device can't identify and suppress return audio, leading to echoes or squealing.

An audio loop, where output is fed back into the input, directly causes echo and feedback noise.

Placing the microphone too close to the speaker allows direct pickup of its output, resulting in echo and potential high-pitched feedback.

NEW QUESTION # 35

The main functions of H.245 include capability negotiation, video encoding, and master-slave determination.

- A. TRUE
- B. FALSE

Answer: B

NEW QUESTION # 36
