The Open Group OGEA-103最新考題 & 最新OGEA-103題庫資源

KaoGuTi應一些考友的需要，在第一時間內及時更新了OGEA-103這門題目，更新之後的OGEA-103擬真試題覆蓋率100%。考生可在反復練習這份真題的基礎上，多思考，多總結，通過OGEA-103考試就沒有問題了。建議的是，一定要瞭解這門考試的最新動態資訊，這樣才能在考試中做到隨機應變。而我們就是一個可以滿足很多參加The Open Group OGEA-103認證考試的IT人士的需求的網站。

最新的 Enterprise Architecture OGEA-103 免費考試真題 (Q44-Q49):

問題 #44

Consider the following statements:

1. Each contracted party is required to act responsibly to the organization and its stakeholders.
2. All decisions taken, processes used, and their implementation will not be allowed to create unfair advantage to any one particular party.
3. Digital Transformation and operations will be more effective and efficient.
4. Strategic decision-making by C-Level executives and business leaders will be more effective.

Which statements highlight the value and necessity for Architecture Governance to be adopted within organizations?

- A. 1 & 2
- B. 1 & 4
- C. 2 & 3

- D. 3 & 4

答案： A

解題說明：

Architecture governance is the practice of ensuring compliance with the enterprise architecture and its principles, standards, and goals. Architecture governance provides the means to establish, monitor, and control the architecture development and implementation processes, and to resolve any issues or conflicts that may arise. Architecture governance also ensures that all stakeholders are represented and involved in the decision-making process, and that their interests and concerns are balanced and aligned. Statements 1 and 2 highlight the value and necessity for architecture governance to be adopted within organizations, as they emphasize the importance of responsibility, accountability, fairness, and transparency in the architectural activities. Statements 3 and 4 are more related to the benefits and outcomes of having a good enterprise architecture, rather than the governance aspect. Reference: : The TOGAF Standard, Version 9.2, Part VI: Architecture Capability Framework, Chapter 50: Architecture Governance : The TOGAF Standard, Version 9.2, Part III: ADM Guidelines and Techniques, Chapter 29: Architecture Governance

問題 #45

Which of the following best describes the purpose of the Architecture Roadmap?

- A. It provides for effective communication of the end architecture project to the stakeholders
- B. It is sent from the sponsor and triggers the start of an architecture development cycle
- C. It forms the basis of a contractual agreement between the sponsor and the architecture organization
- D. It lists work packages on a timeline showing progress towards the Target Architecture

答案： D

解題說明：

The purpose of the Architecture Roadmap is to provide a high-level view of how the Baseline Architecture will transition to the Target Architecture over time. It lists work packages on a timeline showing progress towards the Target Architecture, as well as dependencies, risks, and benefits. The Architecture Roadmap forms part of the Implementation and Migration Plan and guides the execution of the architecture projects. 問題 #46

What is used to structure architectural information in an orderly way so that it can be processed to meet stakeholder needs?

- A. An Architecture Framework
- B. A Stakeholder Map
- C. An EA Library
- D. Content Metamodel

答案： A

解題說明：

Explanation

An Architecture Framework is used to structure architectural information in an orderly way so that it can be processed to meet stakeholder needs. An Architecture Framework provides a common language and taxonomy for describing architectures; a set of tools and techniques for creating architectures; a method for defining views and viewpoints for different stakeholders; a metamodel for representing architecture artifacts; a repository for storing and managing architecture artifacts; and a governance framework for controlling architecture development and evolution. 問題 #47

Which of the following is a responsibility of an Architecture Board?

- A. Allocating resources for architecture projects
- B. Conducting assessments of the maturity level of architecture discipline within the organization
- C. Establishing targets for re-use of components
- D. Creating the Statement of Architecture Work

答案： B

解題說明：

Explanation

The Architecture Board is a governance body that oversees and supports the implementation of architectures within an organization. One of its responsibilities is to conduct assessments of the maturity level of architecture discipline within the organization using frameworks such as CMMI or ACMM. This helps to identify areas for improvement and monitor progress towards achieving higher levels of maturity. References:

問題 #48

You are working as an Enterprise Architect within an Enterprise Architecture (EA) team at a large government agency with multiple divisions. The agency has a well-established EA practice and follows the TOGAF standard as its method for architecture development. The government has mandated that the agency prepare for an "AI-first" world.

The agency wants to determine the impact and role of AI in its future services. The CIO has approved a Request for Architecture Work to explore the use of AI in services. Some leaders are concerned about reliance on AI, security, and employees' need to acquire new skills.

The EA team leader seeks suggestions on managing the risks associated with a new architecture for the AI- first project. Based on the TOGAF standard, which of the following is the best answer?

- A. Conduct an analysis of stakeholders, documenting their concerns and recording them in the Architecture Vision document. Risks should be recorded in the Architecture Requirements Specification and reviewed regularly.
- B. Create an organization map to show the links between different agency parts. Hold a meeting to teach stakeholders to interpret the models. Manage risks as part of Security Architecture development.
- C. Identify key stakeholders and develop a Communication Plan that addresses their needs. Ensure the architecture addresses risk management and summarizes features of the architecture.
- D. Separate stakeholders into groups and categorize them. Develop models for each group and verify that their concerns are addressed in Phase G, Implementation Governance.

答案： A

解題說明：

In the context of the TOGAF standard, stakeholder management and addressing stakeholder concerns are critical components, especially for high-impact initiatives like adopting an AI-first approach. Here's why the selected answer aligns best with TOGAF principles and the scenario:

* Stakeholder Analysis and Engagement: Conducting a stakeholder analysis is essential as it helps identify and document the concerns, issues, and cultural factors influencing each stakeholder group.

This aligns with TOGAF's emphasis on understanding and managing stakeholder concerns, particularly in the Preliminary and Architecture Vision phases of the ADM (Architecture Development Method).

Since the scenario highlights diverse concerns about AI, understanding each group's unique perspective will help the EA team tailor the architecture to address these effectively.

* Architecture Vision Document: By documenting these concerns in the Architecture Vision document, the EA team can provide a clear, high-level representation of how AI will be adopted, its benefits, and how it addresses specific stakeholder concerns. This is critical for communicating the intent and value of the AI-first approach in a way that aligns with the agency's strategic goals, including addressing apprehensions about job security, skill development, and cyber resilience.

* Risk Management and Architecture Requirements Specification: TOGAF highlights the importance of identifying and managing risks early in the process. By documenting the requirements related to risk in the Architecture Requirements Specification, the EA team ensures that these concerns are formally integrated into the architecture and addressed throughout the ADM phases. Regular assessments and feedback loops will provide a mechanism for continual risk monitoring and adjustment as the AI-first initiative progresses.

* Alignment with TOGAF's ADM Phases: The approach specified aligns with TOGAF's guidance on managing risk and stakeholder concerns during the early ADM phases, specifically Architecture Vision and Requirements Management. In these phases, the framework emphasizes identifying and addressing risks associated with stakeholders' concerns to build a resilient and widely accepted architecture.

* Reference to TOGAF Stakeholder Management Techniques: TOGAF's stakeholder management techniques underscore the importance of understanding and addressing stakeholder needs as a foundational step. This involves assessing the influence and interest of various stakeholders and integrating their views into architectural development, ensuring that the architecture aligns with both business goals and operational realities.

In conclusion, by conducting a thorough stakeholder analysis and documenting concerns in both the Architecture Vision and Architecture Requirements Specification, the EA team can ensure that stakeholder concerns are addressed, that the architecture

supports AI adoption effectively, and that potential risks are managed proactively. This approach will foster acceptance among stakeholders and ensure that the architecture aligns with the agency's strategic goals and risk management requirements as recommended by TOGAF.
