Quiz 2026 Oracle High Hit-Rate 1z0-1080-25: Dumps Oracle Planning 2025 Implementation Professional Collection

The 1z0-1080-25 exam simulator plays a vital role in increasing your knowledge for exam. The VCETorrent' Oracle Testing Engine provides an expert help and it is an exclusive offer for those who spend most of their time in searching relevant content in the books. It offers demos free of cost in the form of the Free 1z0-1080-25 Dumps. The Oracle 1z0-1080-25 exam questions aid its customers with updated and comprehensive information in an innovative style.

Oracle Planning 2025 Implementation Professional Sample Questions (Q38-Q43):

NEW QUESTION # 38

You need to schedule a weekly data import job. Which two statements are true about scheduling jobs?

- A. You can check the execution status of a job only if it completed.
- **B. You can set to receive notifications when the job has completed.**
- **C. You can schedule an Import Data job to run later at intervals.**
- D. You can delete that are currently processing.
- E. You can set the daily maintenance time when scheduling cloning environment jobs.

Answer: B,C

Explanation:

In Oracle Planning 2024, scheduling jobs such as a weekly data import is managed through the Jobs interface, which provides options for automation, monitoring, and notifications. Let's evaluate the provided statements to identify the two that are true:

* A. You can check the execution status of a job only if it completed: This is false. The Jobs console in Oracle EPM allows users to check the status of a job (e.g., Running, Completed, Failed) at any time, not just after completion. Real-time monitoring is a key feature.

* B. You can set the daily maintenance time when scheduling cloning environment jobs: This is false.

Daily maintenance time is a system-wide setting controlled by administrators via Application Settings, not something adjustable when scheduling specific jobs like cloning or data imports.

* C. You can set to receive notifications when the job has completed: This is true. When scheduling a job (e.g., Import Data), users can enable email notifications to be alerted upon job completion, success, or failure, enhancing job management.

* D. You can schedule an Import Data job to run later at intervals: This is true. The scheduling feature supports recurring jobs, such as weekly data imports, allowing users to define the start time and frequency (e.g., daily, weekly) for tasks like importing data from external sources.

* E. You can delete that are currently processing: This is false. Jobs that are currently processing (i.e., in a "Running" state) cannot be deleted until they complete or fail, as per Oracle's job management rules.

Thus, the two true statements are C and D, reflecting the flexibility of scheduling recurring Import Data jobs and receiving completion notifications, both of which are explicitly supported in Oracle Planning 2024.

NEW QUESTION # 39

You want to work with Forms 2.0 to develop your forecast. Which two statements describe Forms 2.0?

- A. You can use the Forms 2.0 features in forms specifically designed for Forms 2.0.
- **B. You can build logic into how a cell value is calculated by adding line-item detail.**
- **C. You can use a tree-based member selector to select members from the POV.**
- D. You can switch between two views for the form if the form designer set up the form with multiple views.

Answer: B,C

NEW QUESTION # 40

Which two are primary use cases for an ASO reporting cube?

- A. You want to report on new Planning data originating from any source, such as a data warehouse.
- **B. You want to save data for upper-level members.**
- C. You want to create and execute complex Calculation Manager business rules.
- **D. You want to report on Smart Lists.**

Answer: B,D

NEW QUESTION # 41

Which two operations can be performed on the Default navigation flow?

- A. Delete
- B. Rename

- C. Copy
- D. Deactivate

Answer: C,D

NEW QUESTION # 42

Which module should you enable first to track the utilization of employees in Projects?

- A. Workforce module before Projects module
- B. Projects module before Workforce module
- C. Financials module before Projects module
- D. Projects module before Financials module

Answer: A

Explanation:

To track the utilization of employees in the Projects module of Oracle Planning 2024, the Workforce module must be enabled first. Employee utilization in Projects refers to tracking how employees' time and costs (e.g., hours worked, labor expenses) are allocated to specific projects. The Workforce module provides the foundational data-such as employee details, roles, salaries, and hours-required to calculate utilization metrics. Once Workforce is enabled and configured with employee data, the Projects module can leverage this data via integration to track utilization against project tasks and budgets.

* A. Projects module before Financials module: Incorrect. Enabling Projects before Financials does not address employee utilization tracking, as Financials focuses on revenue and expense planning, not employee-specific data.

* B. Financials module before Projects module: Incorrect. Financials provides financial planning capabilities but does not manage employee data or utilization, which is a Workforce function.

* C. Workforce module before Projects module: Correct. Workforce must be enabled first to define employee data, which Projects then uses to track utilization through integration (e.g., via data maps or direct links).

* D. Projects module before Workforce module: Incorrect. Enabling Projects first without Workforce would limit utilization tracking, as Projects relies on Workforce for employee-related data.

The Oracle documentation specifies that Workforce is a prerequisite for detailed employee utilization tracking in Projects, making C the correct sequence.
