We know the certificate of C-BCFIN-2502 exam guide is useful and your prospective employer wants to see that you can do the job with strong prove, so our C-BCFIN-2502 study materials could be your opportunity. Our C-BCFIN-2502 practice dumps are sensational from the time they are published for the importance of C-BCFIN-2502 Exam as well as the efficiency of our C-BCFIN-2502 training engine. And we can help you get success and satisfy your eager for the certificate.

SAP Certified Associate - Positioning SAP Business Suite via SAP Financial Management Solutions Sample Questions (Q23-Q28):

NEW QUESTION # 23

Which SAP product provides integrated predictive planning?

- A. SAP Datasphere
- B. SAP Business Technology Platform
- C. SAP Analytics Cloud
- D. SAP S/4HANA Cloud

Answer: C

Explanation:

Comprehensive and Detailed 150 to 250 words of Explanation From Positioning SAP Business Suite via SAP Financial Management Solutions documents:

SAP Analytics Cloud (SAC) is the strategic platform for all planning, forecasting, and analytical needs within the SAP ecosystem. It is specifically designed to provide integrated predictive planning, which allows finance teams to move beyond traditional manual

budgeting. By using built-in machine learning algorithms, SAC can analyze historical data trends to automatically generate baseline forecasts, identify hidden drivers of performance, and suggest future outcomes with a high degree of statistical confidence. The "integrated" aspect of SAC is key; it connects directly to SAP S/4HANA, allowing for "Extended Planning and Analysis" (xP&A). This means that financial plans are not created in isolation but are linked to operational plans in sales, HR, and supply chain. When a change occurs in the ERP (such as a new sales order), the impact can be reflected in the financial forecast immediately. This synergy allows CFOs to perform real-time "what-if" simulations, helping them to navigate uncertainty and make data-driven decisions.

While SAP Datasphere provides the data fabric and BTP is the underlying platform, SAC is the specific application where the predictive intelligence and planning workflows reside.

NEW QUESTION # 24

Which of the following SAP solutions are designed to support Implementation of Business Controls and monitoring Compliance?

Note: There are 3 correct answers to this question.

- A. SAP Business Integrity Screening
- B. SAP S/4HANA Finance for Group Reporting
- C. SAP Global Trade Management
- D. SAP Process Control
- E. SAP Entitlement Management

Answer: A,C,D

Explanation:

Comprehensive and Detailed 150 to 250 words of Explanation From Positioning SAP Business Suite via SAP Financial Management Solutions documents:

SAP's Governance, Risk, and Compliance (GRC) portfolio provides a comprehensive suite of tools designed to safeguard the organization through automated controls. SAP Process Control is central to this effort, offering a framework for implementing and continuously monitoring internal business controls. It moves organizations away from manual, sample-based audits toward automated, continuous monitoring of processes, ensuring that compliance is maintained in real-time.

SAP Business Integrity Screening complements this by scanning large volumes of transactional data to detect anomalies that might indicate fraud or errors. By identifying these "red flags" early, CFOs can prevent financial loss and protect the organization's reputation. Furthermore, SAP Global Trade Management (within the context of SAP GTS) ensures that all international trade activities comply with complex global regulations, managing everything from sanctioned party screening to license management. Together, these three solutions provide the transparency and oversight necessary for modern risk management. While SAP S/4HANA Finance for Group Reporting is essential for consolidation, it is a closing tool rather than a monitoring control solution. SAP Entitlement Management focuses on rights management, which is distinct from the core financial business controls described here.

NEW QUESTION # 25

Which of the following is a key feature of SAP HR Analytics?

- A. Real-time insights into workforce data
- B. No support for financial reporting
- C. Limited data visualization
- D. Manual data integration

Answer: A

NEW QUESTION # 26

The head of which finance function is most committed to streamlining operations through automation?

- A. Audit, Compliance, and Tax
- B. Accounting and Controlling
- C. Sales / Revenue
- D. Treasury and Shared Service Operations

Answer: D

Explanation:

Comprehensive and Detailed 150 to 250 words of Explanation From Positioning SAP Business Suite via SAP Financial Management Solutions documents:

While all finance functions benefit from efficiency, the head of Treasury and Shared Service Operations is typically the most committed to streamlining operations through automation. Shared Service Centers (SSCs) are designed specifically to centralize and process high volumes of transactional data-such as accounts payable, accounts receivable, and travel expenses-across the entire enterprise. For these leaders, "efficiency is the product." Automation in Treasury and Shared Services is critical because manual processing in these areas leads to high operational costs, human error, and liquidity risks. By implementing solutions like SAP Cash Application (for automated payment matching) and SAP Multi-Bank Connectivity (for automated bank communications), these leaders can significantly reduce the cost per transaction and shorten processing times.

In the Treasury function, automation ensures that cash visibility is instantaneous, allowing for more effective liquidity management and risk mitigation. While Accounting and Controlling (Option B) also seek automation, their focus is often more on data integrity and closing speed, whereas Shared Services and Treasury are fundamentally driven by the operational "throughput" and cost-efficiency that only high-level automation can provide.

NEW QUESTION # 27

Which financial process solution area is responsible for managing interfacing with banking institutions?

- A. Invoice to Pay
- **B. Treasury Management**
- C. Invoice to Cash
- D. Financial Planning & Analysis

Answer: B

Explanation:

Comprehensive and Detailed 150 to 250 words of Explanation From Positioning SAP Business Suite via SAP Financial Management Solutions documents:

Within the SAP Financial Management ecosystem, the Treasury Management solution area is primarily responsible for the relationship and technical interfacing with banking institutions. While "Invoice to Cash" and "Invoice to Pay" involve transactions that eventually hit a bank account, it is the Treasury function that governs the overall cash liquidity, bank account management, and communication protocols.

SAP Treasury Management, supported by tools like SAP Multi-Bank Connectivity (MBC), provides a secure, automated link between the corporate ERP and the global banking network. This allows for the automated transmission of payment files and the retrieval of electronic bank statements. Beyond simple connectivity, Treasury Management enables the CFO to see a global view of cash positions in real-time, manage financial risks (such as currency or interest rate exposure), and optimize the company's funding strategy. By centralizing the bank interface within Treasury Management, organizations can ensure high security through encryption and digital signatures, reduce bank fees through consolidation, and gain the visibility needed to ensure the business always has the necessary liquidity to operate and grow.

NEW QUESTION # 28

.....

We here guarantee that we will never sell the personal information of our candidates. There is no need for you to worry about the individual privacy under our rigorous privacy C-BCFIN-2502 protection system.
