

FSCP Zertifizierungsfragen - FSCP Online Prüfungen

The FSCP Designation Application
FOR PERSONS WHO COMPLETED FSCP

Applicant: Information provided on this form must be verified by a real-time peer-level Association. Please allow 15 weeks for processing. Please type or print legibly. The name on the diploma will be printed as requested on this application. This application should be submitted only after successful completion of the F.A. Exams (2 ECE's each), the F.A. 200 Ethics and the F.P. 99 Course & Examination.

Last Name: _____ First Name: _____ Middle Initial: _____
Mailing Address: _____
Office Phone: _____ Office Fax: _____
CAREER ID #: _____ (Date of Birth (DDMMYY)) _____ E-mail Address: _____

Type legal name for engraving on diploma (First, Middle, Last) _____

IMPORTANT: CAREER ID card Application does not need to be paid in the year of completion in order to qualify for FSCP. Pending the following information:

A. I have successfully completed the following FA courses (2 ECE's EAC3) in the years indicated:

FA Course	Year
(FA 201) Techniques for Defining Personal Mission	_____
(FA 202) Techniques for Meeting Client Needs	_____
(FA 203) Fundamentals of Life Insurance Products	_____
(FA 204) Fundamentals of Retirement Planning	_____
(FA 205) Fundamentals of Financial Planning for Retirement	_____
(FA 206) Fundamentals of Financial Planning: The Process	_____
(FA 207) Fundamentals of Estate Planning	_____

B. I have completed and passed the examination for: ☐ F.A. 200 Ethics (or the Financial Services Professional).
Please provide the following information regarding your completion of the ethics course requirement:
If by internet, name of instructor: _____ Date: _____ Location: _____
If by self study, name of provider: _____ Date: _____ Location: _____

C. I have completed and passed the examination for: ☐ F.P. 99 FSCP Course & Exam.
Please provide the following information regarding your completion of the certification exam requirement:
Name of instructor: _____ Location of exam setting: _____
Date: _____

D. Please add my name to the FSCP Online Directory after my application has been approved. ☐ Yes ☐ No

E. Please contact me regarding Malpractice opportunities. ☐ Yes ☐ No

For the sake of my knowledge and belief, the candidate has on this application no more and never. In consideration of the award of the designation to me, I acknowledge and agree that the CAREER ID and the American College shall have the authority to establish and have the sole right to change the conditions under which the designation is to be awarded and shall, without regard to whether or not I am participating in the designation for the good reason of my right to be awarded the designation, shall have the sole right to establish the conditions for the award of the designation. I agree to the establishment of the designation for the good reason of my right to be awarded the designation. I agree to the establishment of the designation for the good reason of my right to be awarded the designation. I agree to the establishment of the designation for the good reason of my right to be awarded the designation.

BONUS!!! Laden Sie die vollständige Version der It-Prüfung FSCP Prüfungsfragen kostenlos herunter:
<https://drive.google.com/open?id=1qMZH5JgnqacqNsZnys76QUt2A8ubdFRs>

Die Forescout FSCP Prüfungsfragen von It-Prüfung sind in Übereinstimmung mit dem neuesten Lehrplan und der echten Forescout FSCP Zertifizierungsprüfung. Wir aktualisieren auch ständig unsere Schulungsunterlagen. Alle Produkte erhalten Sie mit einjährigen kostenlosen Updates. Sie können auch das Abozeit verlängern, so dass Sie mehr Zeit bekommen, um sich besser auf die Prüfung vorzubereiten. Wenn Sie zögern sind oder nicht dafür entscheiden können, ob Sie die Forescout FSCP Schulungsunterlagen von It-Prüfung kaufen oder nicht. Dann können Sie die Demo umsonst auf der It-Prüfung website herunterladen. Wenn es Ihnen passt, dann gehen Sie zum Kaufen ohne Bereuung.

Im It-Prüfung können Sie Dumps zur Forescout FSCP Zertifizierungsprüfung herunterladen, so dass Sie unsere Produkte ohne Risiko kaufen können. Das ist die Version der Übungen. Und Sie können die Qualität der Produkte und den Wert vorm Kauf sehen. Wir sind selbstsicher, dass Sie mit unseren Produkten zur Forescout FSCP Zertifizierungsprüfung zufrieden sein würden. Um Ihre Interessen zu schützen, versprechen wir Ihnen, dass wir Ihnen eine Rückerstattung geben für den Durchfall in der Prüfung würden. Unser Ziel liegt nicht nur darin, Ihnen zu helfen, die Forescout FSCP Prüfung zu bestehen, sondern auch ein reales IT-Expert zu werden. So können Sie mehr Vorteile im Beruf haben, eine entsprechende technische Position finden und ganz einfach ein hohes Gehalt unter den IT-Angestellten erhalten.

>> FSCP Zertifizierungsfragen <<

FSCP Online Prüfungen & FSCP Deutsch

Manchmal muss man mit große Menge von Prüfungsaufgaben üben, um eine wichtige Prüfung zu bestehen. Die Forescout FSCP von uns hat diese Forderung gut erfüllt. Und mit den fachlichen Erklärungen können Sie besser die Antworten verstehen. Die Demo der

Forescout FSCP von unterschiedlichen Versionen werden von uns gratis angeboten. Probieren Sie mal und wählen Sie die geeignete Version für Sie! Mit unserer gemeinsamen Arbeit werden Sie bestimmt die Forescout FSCP Prüfung erfolgreich bestehen!

Forescout Certified Professional Exam FSCP Prüfungsfragen mit Lösungen (Q31-Q36):

31. Frage

What should be done after the Managed Windows devices are sent to a policy to determine the Windows 10 patch delivery optimization setting?

- A. Non Windows 10 devices must be called out in sub-rules so that the relevant DWORD value may be changed
- B. Non Windows 10 devices must be called out in sub-rules since they will not have the relevant DWORD
- C. Manageable Windows devices are not required by this policy
- D. Push out the proper DWORD setting via GPO
- E. Write sub-rules to check for each of the DWORD values used in patch delivery optimization

Antwort: E

Begründung:

Comprehensive and Detailed Explanation From Exact Extract of Forescout Platform Administration and Deployment:

After managed Windows devices are sent to a policy to determine the Windows 10 patch delivery optimization setting, the best practice is to write sub-rules to check for each of the DWORD values used in patch delivery optimization.

Windows 10 Patch Delivery Optimization DWORD Values:

Windows 10 patch delivery optimization is configured through DWORD registry settings in the following registry path:

* Computer\HKEY_LOCAL_MACHINE\SOFTWARE\Policies\Microsoft\Windows\DeliveryOptimization The primary DWORD value is DODownloadMode, which supports the following values:

- * 0 = HTTP only, no peering
- * 1 = HTTP blended with peering behind the same NAT (default)
- * 2 = HTTP blended with peering across a private group
- * 3 = HTTP blended with Internet peering
- * 63 = HTTP only, no peering, no use of DO cloud service
- * 64 = Bypass mode (deprecated in Windows 11)

Why Sub-Rules Are Required:

When implementing a policy to manage Windows 10 patch delivery optimization settings, administrators must create sub-rules for each possible DWORD configuration value because:

- * Different Organizational Requirements - Different departments or network segments may require different delivery optimization modes (e.g., value 1 for some devices, value 0 for others)
- * Compliance Checking - Each sub-rule verifies whether a device has the correct DWORD value configured according to organizational policy
- * Enforcement Actions - Once each sub-rule identifies a specific DWORD value, appropriate remediation actions can be applied (e.g., GPO deployment, messaging, notifications)
- * Granular Control - Sub-rules allow for precise identification of devices with non-compliant delivery optimization settings

Implementation Workflow:

- * Device is scanned and identified as Windows 10 managed device
- * Policy queries the DODownloadMode DWORD registry value
- * Multiple sub-rules evaluate the current DWORD value:
- * Sub-rule for value "0" (HTTP only)
- * Sub-rule for value "1" (Peering behind NAT)
- * Sub-rule for value "2" (Peering across private group)
- * Sub-rule for value "3" (Internet peering)
- * Sub-rule for value "63" (No peering, no cloud)
- * Matching sub-rule triggers appropriate policy actions

Why Other Options Are Incorrect:

- * A. Push out the proper DWORD setting via GPO - This is what you do AFTER checking via sub-rules, not what you do after sending devices to the policy
- * B. Non Windows 10 devices must be called out in sub-rules since they will not have the relevant DWORD - While non-Windows 10 devices should be excluded, the answer doesn't address the core requirement of checking each DWORD value
- * C. Manageable Windows devices are not required by this policy - This is incorrect; managed Windows devices are the focus of this policy
- * D. Non Windows 10 devices must be called out in sub-rules so that the relevant DWORD value may be changed - This misses the point; you check the DWORD values first, not change them in sub-rules Referenced Documentation:

- * Microsoft Delivery Optimization Reference - Windows 10 Deployment
- * Forescout Administration Guide - Defining Policy Sub-Rules
- * How to use Group Policy to configure Windows Update Delivery Optimization

32. Frage

What should you do first when preparing for an upgrade to a new CounterACT version?

- A. Upgrading an appliance is done through Options/Modules.
- B. Upgrade the members first before upgrading the EM.
- C. Upgrade only the modules compatible with the version you are installing.
- **D. Consult the CounterACT Release Notes for the appropriate version**
- E. From the appliance CLI, ftool upgrade /tmp/counteract-v8.0.1.fsp

Antwort: D

Begründung:

Comprehensive and Detailed Explanation From Exact Extract of Forescout Platform Administration and Deployment:

According to the Forescout Upgrade Guides for multiple versions, the first thing you should do when preparing for an upgrade to a new CounterACT version is consult the CounterACT Release Notes for the appropriate version.

Release Notes as First Step:

According to the official documentation:

"Review the Forescout Release Notes for important information before performing any upgrade." The documentation emphasizes this as a critical first step before any other upgrade activities.

What Release Notes Contain:

According to the upgrade guidance:

The Release Notes provide essential information including:

- * Upgrade Paths - Which versions you can upgrade from and to
- * Pre-Upgrade Requirements - System requirements and prerequisites
- * End-of-Life Products - Products that must be uninstalled before upgrade
- * Non-Supported Products - Products not compatible with the new version
- * Module/Plugin Dependencies - Version compatibility requirements
- * Known Issues - Potential problems and workarounds
- * Upgrade Procedures - Step-by-step instructions
- * Rollback Information - How to revert if needed

Critical Pre-Upgrade Information:

According to the Release Notes guidance:

"The upgrade process does not continue when end-of-life products are detected." Release Notes list:

- * End-of-Life (EOL) Products - Must be uninstalled before upgrade
- * Non-Supported Products - Must be uninstalled before upgrade
- * Plugin Version Compatibility - Which plugin versions work with the new Forescout version Upgrade Order vs. Release Notes

Review:

According to the documentation:

While the order of upgrade (EM first, then Appliances) is important, consulting Release Notes comes FIRST because it determines what needs to be done before any upgrade attempts.

The Release Notes tell you:

- * Whether you can upgrade at all
- * What must be uninstalled
- * System requirements
- * Compatibility information

Only AFTER reviewing Release Notes do you proceed with the actual upgrade sequence.

Why Other Options Are Incorrect:

- * A. Upgrade the members first before upgrading the EM - This is the OPPOSITE of correct order; EM (Enterprise Manager) should be upgraded first
- * B. Upgrading an appliance is done through Options/Modules - This is not the upgrade path; upgrades are done through Tools > Options > CounterACT Devices
- * C. From the appliance CLI, ftool upgrade /tmp/counteract-v8.0.1.fsp - This is ONE possible upgrade method, but not the first step; downloading and reviewing Release Notes comes first
- * E. Upgrade only the modules compatible with the version you are installing - This is a consideration found IN the Release Notes, not the first step itself Correct Upgrade Sequence:

According to the comprehensive upgrade documentation:

text

1. FIRST: Review Release Notes (determine what's needed)
2. Second: Check system requirements
3. Third: Uninstall EOL/non-supported products
4. Fourth: Back up Enterprise Manager and Appliances
5. Fifth: Upgrade Enterprise Manager
6. Sixth: Upgrade Appliances

Referenced Documentation:

- * Before You Upgrade the Forescout Platform - v8.3
- * Before You Upgrade the Forescout Platform - v9.1.2
- * Forescout 8.1.3 Release Notes
- * Installation Guide v8.0 - Upgrade section

33. Frage

When using Remote Inspection for Windows, which of the following properties require fsprocsvc.exe interactive scripting?

- A. User Directory Common Name
- B. Windows Service Running
- C. Antivirus Running
- D. Update Microsoft Vulnerabilities
- E. Windows Expected Script Result

Antwort: E

Begründung:

Comprehensive and Detailed Explanation From Exact Extract of Forescout Platform Administration and Deployment:

The Windows Expected Script Result property is the correct answer. According to the official Forescout CounterACT Endpoint Module: HPS Inspection Engine Configuration Guide Version 10.8, the fsprocsvc.exe service is required to run interactive scripts for several CounterACT tasks during Remote Inspection operations on Windows endpoints.

The documentation explicitly lists the following Properties requiring the fsprocsvc service (with Remote Inspection, i.e., not via SecureConnector):

- * Windows Expected Script Result #
- * Device Interfaces
- * Number of IP Addresses
- * External Devices
- * Windows File MD5 Signature
- * Windows Is Behind NAT
- * Microsoft Vulnerabilities

About fsprocsvc.exe Service:

The fsprocsvc.exe service is a proprietary ForeScout service utility that is downloaded by the HPS Inspection Engine to endpoints. It is used to run interactive scripts for several CounterACT tasks. Key characteristics include:

- * Size on disk: Approximately 250KB
- * Memory acquired during runtime: 2 MB
- * Runs under: System context
- * Start type: Automatic
- * Inactivity timeout: After 2 hours of inactivity, the service stops automatically
- * Communication: Does not open any new network connection. Communication is carried out over Microsoft's SMB/RPC (445/TCP and 139/TCP) with domain credentials authentication Why Other Options Are Incorrect:
 - * A. User Directory Common Name - This property is derived from User Directory plugin queries and does not require fsprocsvc interactive scripting
 - * B. Update Microsoft Vulnerabilities - This is an action, not a property. While Microsoft Vulnerabilities property does require fsprocsvc, "Update" is not the property name listed
 - * D. Antivirus Running - This is a basic WMI-based property that does not require interactive scripting via fsprocsvc
 - * E. Windows Service Running - This is a basic property that can be determined through WMI queries without requiring fsprocsvc interactive scripting Interactive Scripts Requirement:

According to the HPS Inspection Engine Configuration Guide, WMI does not support interactive scripts on all Windows endpoints. When WMI is used for Remote Inspection, CounterACT uses the fsprocsvc service to run interactive scripts on endpoints that require them. The Windows Expected Script Result property specifically requires running a custom script on the endpoint, which necessitates the fsprocsvc service for proper execution.

Referenced Documentation:

* Forescout CounterACT Endpoint Module: HPS Inspection Engine Configuration Guide Version 10.8

* Section: "About fsprosv.exe" and "Properties requiring the service (With remote inspection, i.e. not via SecureConnector)"

34. Frage

Place the DNS Enforce control actions into the correct workflow order for endpoints which have a pending control action.

35. Frage

When troubleshooting a SecureConnector management issue for a Windows host, how would you determine if SecureConnector management packets are reaching CounterACT successfully?

- A. Use the tcpdump command and filter for tcp port 2200 traffic from the host IP address reaching the management port
- B. Use the tcpdump command and filter for tcp port 10003 traffic from the host IP address reaching the monitor port
- C. Use the tcpdump command and filter for tcp port 2200 traffic from the host IP address reaching the management port
- **D. Use the tcpdump command and filter for tcp port 10003 traffic from the host IP address reaching the management port**
- E. Use the tcpdump command and filter for tcp port 10005 traffic from the host IP address reaching the monitor port

Antwort: D

Begründung:

Comprehensive and Detailed Explanation From Exact Extract of Forescout Platform Administration and Deployment:

According to the Forescout Quick Installation Guide and official port configuration documentation, SecureConnector for Windows uses TCP port 10003, and the management packets should be captured from the host IP address reaching the management port (not the monitor port). Therefore, the correct command would use tcpdump filtering for tcp port 10003 traffic reaching the management port.

SecureConnector Port Assignments:

According to the official documentation:

SecureConnector Type

Port

Protocol

Function

Windows

10003/TCP

TLS (encrypted)

Allows SecureConnector to create a secure encrypted TLS connection to the Appliance from Windows machines OS X

10005/TCP

TLS (encrypted)

Allows SecureConnector to create a secure encrypted TLS connection to the Appliance from OS X machines Linux

10006/TCP

TLS 1.2 (encrypted)

Allows SecureConnector to create a secure connection over TLS 1.2 to the Appliance from Linux machines Port 2200 is for Legacy Linux SecureConnector (older versions using SSH encryption), not for Windows.

Forescout Appliance Interface Types:

* Management Port - Used for administrative access and SecureConnector connections

* Monitor Port - Used for monitoring and analyzing network traffic

* Response Port - Used for policy actions and responses

SecureConnector connections reach the management port, not the monitor port.

Troubleshooting SecureConnector Connectivity:

To verify that SecureConnector management packets from a Windows host are successfully reaching CounterACT, use the following tcpdump command:

bash

tcpdump -i [management_interface] -nn "tcp port 10003 and src [windows_host_ip]" This command:

* Monitors the management interface

* Filters for TCP port 10003 traffic

* Captures packets from the Windows host IP address reaching the management port

* Verifies bidirectional TLS communication

Why Other Options Are Incorrect:

* A. tcp port 10005 from host IP reaching monitor port - Port 10005 is for OS X, not Windows; should reach management port, not monitor port

* B. tcp port 2200 reaching management port - Port 2200 is for legacy Linux SecureConnector with SSH, not Windows

* C. tcp port 10003 reaching monitor port - Port 10003 is correct for Windows, but should reach management port, not monitor port

* D. tcp port 2200 reaching management port - Port 2200 is for legacy Linux SecureConnector, not Windows SecureConnector

Connection Process:

According to the documentation:

* SecureConnector on the Windows endpoint initiates a connection to port 10003

* Connection is established to the Appliance's management port

* When SecureConnector connects to an Appliance or Enterprise Manager, it is redirected to the Appliance to which its host is assigned

* Ensure port 10003 is open to all Appliances and Enterprise Manager for transparent mobility Referenced Documentation:

* Forescout Quick Installation Guide v8.2

* Forescout Quick Installation Guide v8.1

* Port configuration section: SecureConnector for Windows

36. Frage

.....

Ob Sie glauben oder nicht, bieten wir die autoritativen und wirkungsvollen Prüfungsunterlagen der Forescout FSCP. Wir sind sehr bereit, die beste Hilfe der Forescout FSCP Prüfungsvorbereitung Ihnen anzubieten. Vielleicht brauchen Sie nur die Zertifizierung der Forescout FSCP, um Ihren Wunsch des Aufstiegs zu erfüllen. Wir wissen, dass man leicht den Impulskauf bereuen, deshalb empfehlen wir Ihnen, zuerst zu probieren und dann zu kaufen. Die Demo der Prüfungsunterlagen der Forescout FSCP können Sie auf unserer Website einfach herunterladen. Probieren Sie mal!
