# Accurate GH-900 - GitHub Foundations VCE Exam Simulator

You may be complaining that your work abilities can't be recognized or you have not been promoted for a long time. But if you try to pass the GH-900 exam you will have a high possibility to find a good job with a high income. That is why I suggest that you should purchase our GH-900 questions torrent. Once you purchase and learn our GH-900 Exam Materials, you will find it is just a piece of cake to pass the exam and get a better job. You can read the introduction of our GH-900 exam questions carefully before your purchase. We provide the best service to you and hope you will be satisfied.

## Microsoft GH-900 Exam Syllabus Topics:

| Topic | Details |
|---|---|
| Topic 1 | • Project Management: This section is designed for Project Coordinators and Product Managers and focuses on using GitHub Projects for project management. Candidates learn to create and manage GitHub Projects, utilize project boards for organizing tasks, and integrate project workflows with issues and pull requests to maintain project visibility and progress. |
| Topic 2 | • Working with GitHub Repositories: This domain targets Repository Administrators and Content Managers, focusing on managing repository settings and permissions. Candidates learn to configure repositories, use templates, and effectively manage files by adding, editing, and deleting. The domain also addresses versioning of files and the use of GitHub Desktop for streamlined file management tasks within repositories. |
| Topic 3 | • Privacy, Security, and Administration: This domain measures skills of Security Administrators and Organization Managers in securing and administering GitHub environments. It covers ensuring repository security through branch protection rules, using security tools like Dependabot, managing access and permissions at repository and organization levels, creating and managing organizations, setting up organization-level security, and overseeing teams and members. |
| Topic 4 | • Introduction to Git and GitHub: This section of the exam measures skills of Junior Developers and Platform Support Specialists and covers the basic understanding of Git and GitHub. It explains what Git is and why it is used, the fundamental Git workflow, and concepts related to repositories including their local and remote distinctions. Candidates learn essential Git commands such as initializing and cloning repositories, adding and committing changes, pushing and pulling updates, and branching and merging. It also covers navigating GitHub by creating accounts, managing repositories, understanding its interface, and working with issues and pull requests. |
| Topic 5 | • Benefits of the GitHub Community: This section targets Community Managers and Open Source Contributors, focusing on engaging with the GitHub community. Candidates learn to participate in open source projects, utilize GitHub Discussions for collaboration and support, and contribute meaningfully to community-driven projects. |

# 100% Pass 2026 Microsoft GH-900: GitHub Foundations First-grade VCE Exam Simulator

Our ITCertMagic can help you realize your dream to pass GH-900 certification exam by providing GH-900 test training materials. Because it concludes all training materials you need to Pass GH-900 Exam. Choosing our ITCertMagic can absolutely help you pass GH-900 test easily, and make you become a member of elite in IT. What are you waiting for? Hurry up!

## Microsoft GitHub Foundations Sample Questions (Q38-Q43):

**NEW QUESTION # 38**
When using Organizations, GitHub Teams is better than GitHub Free because it offers:

- A. Advanced tools and insights in private repositories.
- B. Increased GitHub Actions minutes and additional GitHub Packages storage.
- C. Expanded storage and priority support.
- D. Authentication with SAML single sign-on and increased GitHub Actions minutes.

**Answer: D**

Explanation:
GitHub Teams, as part of GitHub's paid plans, offers additional features and capabilities compared to GitHub Free, particularly for organizations.
GitHub Teams Benefits:
Option B is correct because GitHub Teams provides advanced security features like SAML single sign-on for secure authentication, as well as increased minutes for running GitHub Actions, which are essential for continuous integration and deployment workflows.
Incorrect Options:
Option A is incorrect because private repositories and advanced tools are features available, but the key differentiator in this context is the SAML SSO and additional GitHub Actions minutes.
Option C is incorrect because while expanded storage and priority support are valuable, SAML SSO and increased GitHub Actions minutes are more central to the differences between GitHub Free and GitHub Teams.
Option D is partially correct, but since the question asks for the best reason, Option B provides the most critical features that differentiate GitHub Teams from GitHub Free.

GitHub Docs: About GitHub Teams

**NEW QUESTION # 39**
Which of the following best describes GitHub Copilot?

- A. An AI pair programmer that offers autocomplete-style suggestions
- B. An advanced search tool to intelligently reuse existing code in your projects
- C. A Visual Studio Code extension for developing AI solutions
- D. An AI tool designed to replace software developers

**Answer: A**

Explanation:
GitHub Copilot is described as an AI pair programmer that offers autocomplete-style suggestions. It is a tool integrated into development environments like Visual Studio Code that helps developers by providing code suggestions as they type. Copilot can suggest entire lines or blocks of code based on the context of what you're writing, making it a valuable assistant in coding, but not a replacement for developers.

**NEW QUESTION # 40**
What qualifier finds issues that mention a certain user?

- A. $mentioned:

- B. mentioned:
- C. threads:
- D. mentions:

**Answer: D**

Explanation:
The qualifier mentions: is used in GitHub's search functionality to find issues that mention a certain user. For example, if you want to find all issues where a specific user is mentioned, you would use mentions:username. This helps in tracking where a user has been involved in discussions across issues or pull requests.

## NEW QUESTION # 41
What is the purpose of GitHub Sponsors?

- A. It offers a way for companies to purchase software on GitHub.
- B. It provides a channel for GitHub to support open source projects.
- C. It allows the developer community to financially support open source projects.
- D. It funds the most popular open source projects based on stars.

**Answer: C**

Explanation:
GitHub Sponsors is a program designed to provide a platform for developers and companies to financially support open-source projects and their maintainers.
Financial Support for Open Source Projects:
Option D is correct because the main purpose of GitHub Sponsors is to allow members of the developer community, including individuals and organizations, to financially support open-source projects and maintainers. This helps sustain open-source development by providing developers with the resources they need to continue their work.
Incorrect Options:
Option A is incorrect because GitHub Sponsors is not based on project popularity (e.g., stars); it is based on voluntary contributions.
Option B is incorrect because while GitHub provides the platform, the purpose of GitHub Sponsors is not for GitHub itself to fund projects, but to enable the broader community to do so.
Option C is incorrect because GitHub Sponsors is not a marketplace for purchasing software but a platform for supporting developers.

GitHub Docs: GitHub Sponsors

## NEW QUESTION # 42
What is a gist?

- A. GitHub Pages site
- B. Markdown document
- C. Git repository
- D. GitHub app

**Answer: C**

Explanation:
A gist on GitHub is essentially a Git repository, albeit a simplified one, designed for sharing snippets of code, notes, or other text content. Gists support version control and can be public or secret.
Gist as a Git Repository:
Option B is correct because each gist is a Git repository, meaning you can clone it, commit changes, and even fork it, just like any other Git repository.
Incorrect Options:
Option A is incorrect because a gist is not an app; it's a feature of GitHub that provides a simplified repository.
Option C is incorrect because while a gist may contain Markdown documents, it is fundamentally a repository that can hold various file types.
Option D is incorrect because GitHub Pages is a separate service for hosting websites, not related to gists.
